*Biological Science and Biotechnology in Russia* Russian Academy of Sciences, National Research Council, Policy and Global Affairs, Development, Security, and Cooperation, Office for Central Europe and Eurasia, Committee on Future Contributions of the Biosciences to Public Health, Agriculture, Basic Research, Counterterrorism, and Nonproliferation Activities in Russia, 2006-02-27 In July 2005 the National Academies released the report *Biological Science and Biotechnology in Russia Controlling Diseases and Enhancing Security* The report offered a number of recommendations that could help restore Russia's ability to join with the United States and the broader international community in leading an expanded global effort to control infectious diseases A proposed bilateral intergovernmental commission could play a pivotal role toward that end as cooperation moves from assistance to partnership The report proposed the establishment of two model State Sanitary Epidemiological Surveillance Centers in Russia more focused support of competitively selected Russian research groups as centers of excellence the promotion of investments in biotechnology niches that are well suited for Russian companies and expanded opportunities for young scientists to achieve scientific leadership positions in Russia Also the report highlighted the importance of U S programs that support the integration of former Soviet defense scientists with civilian researchers who had not been involved in military related activities

*Containing Russia's Nuclear Firebirds* Glenn E. Schweitzer, 2013-01-01 In the aftermath of the Soviet Union's breakup into fifteen independent states the governments of the United States the European Community Japan and Russia established the International Science and Technology Center in Moscow to address the dangers of nuclear scientists on the loose The purpose of the ISTC also known as the Moscow Science Center was to prevent the illicit flow of dangerous weapons expertise out of the former Soviet Union by helping its underemployed nuclear biological chemical and aerospace weapons scientists redirect their skills to peaceful civilian endeavors Since its creation in 1994 the ISTC has provided more than 1.3 billion to support 2,740 projects involving nearly 100,000 scientists from the former Soviet Union and international partners Thirty nine governments have become part of the ISTC family Somewhat unexpectedly in April 2010 the Russian government announced that it would withdraw from the agreement establishing the ISTC contending that the Center had accomplished its mission The Moscow Science Center will close its doors in 2015 effectively terminating ISTC activities based in Russia Schweitzer examines the impact and effectiveness of the ISTC and emphasizes opportunities for the internal community to draw on its legacy

*Knowledge Matters* Diana Rhoten, Craig Calhoun, 2011-02-22 Universities Are Changing Around The World In China and Africa there is massive expansion while many of America's greatest public universities are experiencing major budget cuts In Latin America universities have been affected by dictatorships and privatization but are now growing in ways central to economic development In Europe universities built as state institutions are being told to raise more money from private sources and are being reorganized so they will compete better in global rankings In this context clarity about the public mission of universities is vital yet it is lacking both outside

and inside academia When universities educate students is this simply a private benefit because it advances their careers Or is it a public good because informed citizens are integral to democracy and essential for national economic development How important is equal opportunity What are the effects of hierarchy Who pays now and who will pay tomorrow Should the results of academic research be private property for sale or openly available for public use Who sets the university research agendas What kinds of scholarship flourish and what kinds suffer Should producing competitive research take priority over educating competent students Do international rankings distort these and other university priorities or provide needed objective assessments What are the university's roles and responsibilities in terms of knowledge creation and dissemination today And tomorrow In this collection scholars report from Asia Africa Europe Latin America and North America They confront the realities and challenges of higher education as it is torn between multiple public and private agendas This comparative perspective illuminates both the continuing importance of the university's public mission and the pressing need to clarify it

Diana Rhoten is the founder and director of the Knowledge Institutions Program and the Digital Media and Learning Project at the Social Science Research Council She has published in a range of academic journals and advises cultural scientific and educational institutions on issues of organizational design creative collaboration and adaptive change Craig Calhoun is president of the Social Science Research Council and University Professor of the Social Sciences at New York University He has served in a variety of academic leadership positions including as a dean and has conducted research in many international settings His most recent book is an edited collection Robert K Merton *Sociology of Science and Sociology as Science* Columbia **Problems of Communism**, 1954 *Moscow DMZ: The Story of the International Effort to Convert Russian Weapons Science to Peaceful Purposes* Glenn E. Schweitzer, 2016-09-16 As the Soviet Union was collapsing in late 1991 reports began to reach the West about agents shopping for weapons systems and weapons scientists in the beleaguered Soviet military industrial complex In response the United States the European Community and Japan in cooperation with the Russian government created a program to reemploy Soviet scientific personnel in civilian projects dealing with the legacy of the Soviet system a polluted environment unsafe nuclear power facilities and economic underdevelopment In this fascinating first person account the American environmental scientist who led the effort to establish the International Science and Technology Center in Moscow tells the diplomatic scientific and human story behind a remarkable post Cold War conversion initiative
