Julie Donovan

Ryanair How A Small Irish Airline Conquered Europe:

Ryanair Siobhán Creaton, 2004 Just a few years ago Ryanair was a tiny impoverished airline competing unsuccessfully with Aer Lingus In 2003 the company was worth more than British Airways This is the story of its meteoric rise told by both the people who have served the company and also through the eyes of major rivals **Up in the Air** Greg J. Bamber, Jody Hoffer Gittell, Thomas A. Kochan, Andrew Von Nordenflycht, 2013-07-15 And you thought the passengers were mad Airline employees are fed up too with pay cuts increased workloads and management's miserly ways which leave workers to explain to often enraged passengers why flying has become such a miserable experience New York Times December 22 2007 When both an industry's workers and its customers report high and rising frustration with the way they are being treated something is fundamentally wrong In response to these conditions many of the world's airlines have made ever deeper cuts in services and their workforces Is it too much to expect airlines or any other enterprise to provide a fair return to investors high quality reliable service to their customers and good jobs for their employees Measured against these three expectations the airline industry is failing In the first five years of the twenty first century alone U S airlines lost a total of 30 billion while shedding 100 000 jobs forcing the remaining workers to give up over 15 billion in wages and benefits Combined with plummeting employee morale shortages of air traffic controllers and increased congestion and flight delays a total collapse of the industry may be coming Is this state of affairs inevitable Or is it possible to design a more sustainable less volatile industry that better balances the objectives of customers investors employees and the wider society Does deregulation imply total abrogation of government's responsibility to oversee an industry showing the clear signs of deterioration and increasing risk of a pending crisis Greg J Bamber Jody Hoffer Gittell Thomas A Kochan and Andrew von Nordenflycht explore such questions in a well informed and engaging way using a mix of quantitative evidence and qualitative studies of airlines from North America Asia Australia and Europe **Up in the Air** provides clear and realistic strategies for achieving a better more equitable balance among the interests of customers employees and shareholders Specifically the authors recommend that firms learn from the innovations of companies like Southwest and Continental Airlines in order to build a positive workplace culture that fosters coordination and commitment to high quality service labor relations policies that avoid long drawn out conflicts in negotiating new agreements and business strategies that can sustain investor employee and customer support through the ups and downs of business cycles **The Airline Industry**, 2006 The Airline industry has been under increasing pressure recently from the increased competition of low cost airlines and the terrorist events of 2001 to name but a few Various US airlines including Delta and Northwest have been declared bankrupt oil prices have soared and seat prices are still being forced down the supply far outweighing the demand This e book looks at recent case studies of airlines in crisis Continental Airlines and also airlines which have excelled at expansion during this turbulent time such as Easyjet and Ryanair and offers examples of successful strategies previously used The collection also features interviews with high profile

figures from airlines such as Go Qatar Airways and SWISS International Airlines Contemporary Ireland Sara O'Sullivan, 2007

Recently there has been a growing scholarly interest in Sydney Lady Morgan nee Sydney Owenson. The reasons are many. In this work Dr Donovan contextualizes an important yet relatively neglected author by analyzing an emblematic Irishness that was too often dismissed in the early 19th century as excessive showmanship. The criticism was not without some basis since Owenson was an actor's daughter and grew up in the company of traveling performers. The study includes an extensive discussion of Morgan's personal papers and artifacts housed in the national Library of Ireland and the Royal Irish Academy. No previous study has fully considered this crucial archival material and its implications. In addition, unpublished and hitherto unconsulted papers from the Yale University collection are also part of this original research monograph. Owenson's writing is far ranging: she is known both as a polemicist and the author of works on post-restoration Italy as well as Ireland, and she commanded the friendship and respect of many early 19th-century authors and poets including Byron, Shelley, Moore, among many others. The table of contents includes Introduction, Body Text, and Textile in The Wild Irish Girl, Sydney Owenson's Self-Fashioning, How Sydney Owenson Played the Harp, Ireland in Europe and the World, Sydney Owenson's Travel Writing, Owenson in the 19th Century, Irish Research Series No 55.

Strategic Management for Tourism, Hospitality and Events Nigel Evans, 2015-01-30

Strategic Management for Tourism, Hospitality and Events is the must-have text for students approaching this subject for the first time. It introduces students to fundamental strategic management principles in a Tourism, Hospitality and Events context and brings theory to life by integrating a host of industry-based case studies and examples throughout. Among the new features and topics included in this edition are: Extended coverage to Hospitality and Events to reflect the increasing need and importance of a combined sector approach to strategy; New international Tourism, Hospitality and Events case studies from both SMEs and large-scale businesses are integrated throughout to show applications of strategic management theory such as objectives, products and markets, and strategic implementation; Longer combined sector case studies are also included at the end of the book for seminar work; New content on emerging strategic issues affecting the tourism, hospitality and events industries such as innovation, employment, culture, and sustainability; Web Support for tutors and students providing explanation and guidelines for instructors on how to use the textbook and case studies; additional exercises, case studies, and video links for students. This book is written in an accessible and engaging style and structured logically with useful features throughout to aid students' learning and understanding. This book is an essential resource to Tourism, Hospitality and Events.

Airline Finance Peter S. Morrell, 2019-09-30 Air transport industry finance with its complexity and special needs such as route rights airport slots aircraft leasing options and frequent flyer programmes requires specific knowledge While there are numerous financial management and corporate finance texts available few of these provide explanations for the singularities of the airline industry with worked examples drawn directly from the industry itself Revised and updated in its third edition this internationally renowned and respected book provides the essentials to understanding all areas of airline finance Designed to address each of the distinct areas of financial management in an air transport industry context it also shows how these fit together while each chapter and topic provides a detailed resource which can be also consulted separately Supported at each stage by practical airline examples it examines the financial trends and prospects for the airline industry as a whole contrasting the developments for the major regions and airlines Important techniques in financial analysis are applied to the airline industry together with critical discussion of key issues Thoroughly amended and updated throughout the third edition reflects the many developments that have affected the industry since 2001 It features several important new topics including Low Cost Carriers LCCs fuel hedging and US Chapter 11 provisions The sections on financial statements and privatisation have been expanded and a new chapter has been added on equity finance and IPOs New case studies have been added as well as the latest available financial data The range and perspective is even greater than before with significant expansion of material specific to the US and Asia The book is a key resource for students of airline management and a sophisticated and authoritative guide for analysts in financial institutions and consultancies executives in airlines and related industries and civil aviation departments

Evolution of International Aviation Professor Dawna L Rhoades, 2014-11-28 As with the previous two editions *Evolution of International Aviation* reviews the historical development of the international aviation system From this foundation it then provides an updated and expanded account of the current state of the aviation and aerospace industry including profitability consolidation and merger activity New to this edition the book broadens the coverage of the industry segments airlines air cargo and manufacturing to include the emerging commercial space sector Because this book is intended for both the interested amateur and the more serious student references are provided in the text and at the end of each chapter to allow for further in depth study The third edition also adds to each chapter a set of learning objectives and a concluding series of questions for discussion

Clipping the Clouds

Marc Dierikx, 2008-06-30 *Mixing in elements of pop culture* Dierikx provides a chronological history of the evolution of air travel He covers the significant challenges and developments in air transportation for a specific period starting with how and why aviation came to play an important role in international politics and economic relations He follows with an examination of how improvements in technology influenced existing concepts of distance created new travel patterns and what effect the growth in numbers of passenger and cargo had on air transportation Finally Dierikx looks at how airlines have become increasingly detached from national interests and state control concluding with an overview of the current state of air travel and a description of the role air transportation played in the creation of a global society At the beginning of the twenty first century it is difficult to imagine our world without aircraft Airplanes are everywhere and rapid air transport has become one of the necessities of our time Yet one of the peculiarities of powered flight is that it has stayed in the public focus for over a century *Clipping the Clouds* looks at the history of aviation in a challenging new way covering not just the technology but the way aviation has interacted with society since its very beginnings *Mixing in pop culture* each chapter opens and closes with an excerpt from a movie that depicts elements of air transport illustrating the chapter s theme Dierikx provides a chronological history of the evolution of air travel since 1919 He covers the significant challenges and developments in air transportation for each of four chronological periods starting with how and why aviation came to play an important role in international politics and economic relations He follows with an examination of how improvements in technology influenced existing concepts of distance created new travel patterns and what effect the growth in numbers of passenger and cargo had on air transportation Finally Dierikx looks at how airlines have become increasingly detached from national interests and state control concluding with an overview of the current state of air travel and a description of the role air transportation has played in the creation of a global society

The politics of airport expansion in the United Kingdom Steven

Griggs, David Howarth, 2016-05-16 The massive expansion of global aviation its insatiable demand for airport capacity and its growing contribution to carbon emissions make it a critical societal problem Alongside traditional concerns about noise and air pollution airport politics has been connected to the problems of climate change and peak oil Yet it is still thought to be a driver of economic growth and connectivity in an increasingly mobile world *The politics of airport expansion in the United Kingdom* provides the first in depth analysis of the protest campaigns and policymaking practices that have marked British aviation since the construction of Heathrow Airport Grounded in documentary analysis interviews and policy texts it constructs and employs poststructuralist policy analysis to chart rival groups and movements seeking to shape public policy This book will appeal to people interested in the history of aviation and airports in Britain local campaigns and environmental protests and the politics of climate change

Consuming Books Stephen Brown, 2006-04-18 The buying selling and writing of books is a colossal industry in which marketing looms large yet there are very few books which deal with book marketing how to texts excepted and fewer still on book consumption This innovative text not only rectifies this but also argues that far

from being detached the book business in fact epitomises today's Entertainment Economy fast moving hit driven intense competition rapid technological change etc Written by an impressive roster of renowned marketing authorities many with experience of the book trade and all gifted writers in their own right Consuming Books steps back from the practicalities of book marketing and takes a look at the industry from a broader consumer research perspective Consisting of sixteen chapters divided into four loose sections this key text covers a historical overview the often acrimonious marketing literature interface the consumers of books from book groups to bookcrossing a consideration of the tensions that both literary types and marketers feel With something for everyone Consuming Books not only complements the how to genre but provides the depth that previous studies of book consumption conspicuously lack A Europe of the Air? Martin Staniland, 2008-06-09 This definitive book offers the first full study of the development of the European Union's air transport policy Crucial to both globalization and regional integration commercial aviation along with other transport industries provides the logistics for business activities political life and contact between cultures Paradoxically however the airline industry was one of the last to be liberalized in the process of European integration and the creation of a single market in air transport was attended by sharp political disputes unreconstructed nationalism and persistent foot dragging Exploring the long struggle to create a Europe of the air through both regulatory change and airline strategizing Martin Staniland examines the political bargains that have shaped a highly fragmented industry and its regulation He argues that rather than focusing on directives and regulations issuing from Brussels students of integration should examine the ways in which the contentious interaction between leaders of an industry and relevant politicians and officials creates distinctive market orders Such market orders enable firms to minimize the risks inherent in business while allowing regulators to pursue the mandates of their organizations and to realize their notions of public interest Economic integration is therefore an often painful struggle to create a market order defined both by regulatory jurisdiction and by competition among firms An invaluable case study in industrial policy this book will be essential reading for students of aviation as well as for scholars interested in regulatory change and European integration **Book of Answers for a Young CEO** Debasish Sahoo, 2007-08 When asked about the qualities needed to be an effective CEO the answers are to me quite basic Respect for and ability to get along with many different kinds of people including those that do not share your views The will to honor promises that one makes to his family and the understanding that work and home life must be balanced Gerard J Arpey CEO American Airlines Be positive about challenges you encounter for no matter how successful you are you will encounter them William Clay Ford Chairman and CEO Ford Motor Company In the real world leaders are rarely faced with a simple choice between right and wrong Leaders can't avoid ambiguity but must learn to be decisive in spite of it Sy Sternberg CEO New York Life I think anyone willing to work hard for their goals learn from their mistakes and care about others has the markings to become a wonderful Leader Gary Kelly CEO Southwest Airlines Find the right people and the right information to help you get the job done Ronald A

The Economic Geography of Air Transportation John T. Bowen, 2010-04-05 Like the railroad and the automobile the airliner has changed the very geography of the societies it serves Fundamentally air transportation has helped redefine the scale of human geography by dramatically reducing the cost of distance both in terms of time and money The result is what the author terms the airborne world meaning all those places dependent upon and transformed by relatively inexpensive air transportation The Economic Geography of Air Transportation answers three key questions how did air transportation develop in the century after the Wright Brothers what does it mean to live in an airborne world and what is the future of aviation in this century Examples are drawn from throughout the world In particular ample consideration is given to the situation in developing countries where air transportation is growing rapidly and where to a considerable degree the future of the airborne world will be determined The book weaves together the technological development of aviation the competition among aircraft manufacturers and their stables of airliners the deregulation and privatization of the airline industry the articulation of air passenger and air cargo services in everyday life and the challenges and controversies surrounding airports It will be of particular interest to students and researchers in air transport history the geography of the airline industry air transport technological development competition in the commercial aircraft industry airport development geography and economics It will also be useful to professionals working in the airline airport and aircraft manufacturing industries

The Geographies of Air Transport Andrew R. Goetz, Lucy Budd, 2016-03-09 Making a detailed contribution to geographies of air transport and aeromobility this book examines the practices and processes that produce particular patterns of air transport provision both regionally and globally In so doing it updates the seminal contributions of Eva Taylor 1945 Kenneth Sealy 1957 Brian Graham 1995 and others to the study of air transport geography Leading scholars in the field offer a unique insight into the key developments that have occurred in the field and the implications that these developments have had for geography geographers and global patterns of past present and future air transport Although globalization and liberalization processes have greatly expanded the demand for air transport over the last two decades the industry has experienced several major setbacks due to economic security and environmental concerns Many of these impacts have been much more pronounced in some regions such as North America and Europe while others such as Asia Pacific have not been as adversely affected Accordingly there is a clear need to

examine these recent economic and geopolitical changes from a geographical perspective given the differentiated pattern of effects from global processes Addressing this need this volume opens with thematic chapters covering key topics such as the historical geographies socio cultural mobilities environmental externalities urban geographies and sustainability of the global air transport industry followed by regional analysis of the industry in Asia Pacific Latin America Greater Middle East and Africa as well as North America and Europe *Airline Network Development in Europe and its Implications for Airport Planning* Guillaume Burghouwt, 2016-03-23 The ongoing deregulation and liberalization of worldwide air transport markets confronts airport planners with an increasingly problematic context On the one hand the capital intensive large scale and complex airport investments need a detailed long medium term planning of airport infrastructure Such planning requires at least predictable traffic volumes and traffic composition within the planning horizon On the other hand airline route networks are increasingly dynamic structures that frequently show discontinuous changes As a consequence the much more volatile airport traffic restricts the value of detailed traffic forecasts Volatility of airport traffic and its composition requires flexibility of airport strategies and planning processes The book explores this dilemma through a detailed study of airline network development airport connectivity and airport planning in the deregulated EU air transport market The questions the book seeks to answer are how have airlines responded to the regime changes in EU aviation with respect to the configuration of their route networks what has been the impact of the reconfiguration of airline network configurations for the connectivity of EU airports how can airport planners and airport authorities deal with the increasingly uncertain airline network behaviour in Europe **Air Transportation** John Wensveen, 2023-05-24 Now in its ninth edition *Air Transportation A Global Management Perspective* by John Wensveen is a well proven accessible textbook that offers a comprehensive introduction to the theory and practice of air transport management In addition to explaining the fundamentals the book transports the reader to the leading edge of the discipline using past and present trends to forecast future challenges and opportunities the industry may face encouraging the reader to think deeply about the decisions a manager implements The word Global has been added to the subtitle for this edition reflecting an increased emphasis on worldwide operations including North America Latin America Caribbean Europe Asia Pacific the Middle East and Africa The ninth edition focuses on the Age of Acceleration addressing trends related to emerging technologies such as autonomy artificial intelligence augmented reality virtual reality 3 D printing data analytics blockchain cybersecurity etc New material includes extra information on airport management and operations air carrier business models aviation risk safety and security and how changing political landscapes impact the aviation industry Enhanced content is supported by the addition of new chapters and online supplemental resources including PowerPoint presentations chapter quizzes exam questions and links to online resources This wide ranging textbook is appropriate for nearly all aviation programs that feature business and management Its student friendly structure and style make it highly suitable for modular courses and distance learning programs or for self directed study and continuing

Low-Cost Carriers in Emerging Countries John Bowen, 2019-02-13 Low Cost

Airline Carriers in Emerging Countries traces the development of low cost carriers LCCs in Asia Latin America the Middle East and Africa examining airlines that have become significant players in their home markets but little known at a global scale The book maps the geography of the LCC phenomenon explaining the starkly varying success of budget airlines and assessing their current social economic and environmental impacts The book concludes with insights into the future potential of the LCC phenomenon along with its global ramifications Beginning with Southwest Airlines in the 1970s low cost carriers LCCs have democratized air travel around the world fostering huge increases in airline traffic and transforming the airline industry At the same time however the ascent of these budget airlines has exacerbated aviation related problems such as aircraft noise airport congestion greenhouse gas emissions and more LCCs have been extensively studied in the US and Europe but not in emerging regions of the globe Yet the impact of such airlines is greatest in low and middle income economies where only a small fraction of the population has ever flown and where competition from alternative modes road rail is weak Examines the evolution of low cost carriers around the world how established airlines react to their entry and the wide ranging societal implications for individual countries and the world Places emerging countries LCCs into a global context comparing them to their US and European counterparts Offers original quantitative analysis of LCC networks at several spatial scales global regional national airport vs airport using global schedule data from OAG Includes professionally produced maps of representative airlines networks
