practitioner or a gathering of celebrants The dimensions of Sacred Science esoteric architecture cosmic resonance and magical practice are outlined in detail and demonstrated in a program for practical everyday use Authentic and richly detailed this guidebook also Presents beautiful rituals patterned on ancient Egyptian texts for modern initiates Serves as an excellent reference on many aspects of the Egyptian mysteries that have not been accessible elsewhere Contains a complete repertoire of ancient hymns litanies spells and ceremonies that allows for reading in the ancient tongue Enter the timeless realm of Egyptian sacred ritual Experience for yourself the ultimate realization of ancient Egyptian spirituality the assumption of divine knowledge and grace *Palestine, Its Holy Sites and Sacred History* John Tillotson, 1871 **Sacred Sites of the Knights Templar (Nipb)** , All across the continent of Europe massive stone monuments erected by a prehistoric culture can be found These megalithic stones resisting centuries of weathering or assaults by modern men are all that remain of a society that has been erased by time Stonehenge is the most familiar of these megalithic monuments but in fact represents only one of many similar sites Who were the people who built these monuments Why were these stones significant to them Sacred Sites of the Knights Templar examines sacred megalithic sites across the globe such as Stonehenge and Rennes le Chateau revealing the astronomical significance of these sites as well as the secrets that significance bore to the Knights Templar This revolutionary book offers a new explanation for two main subjects The distribution and meaning of the megalithic monuments of Europe which were constructed to commemorate astronomical events Evidence for a continuing and hidden philosophy based on ancient astronomy maintained in secret by the Knights Templar and in turn by the Freemasons The author offers theories regarding these sites their meanings their secrets their lasting impression on the Western World and their sacred symbolic influences on Freemasonry throughout history Sacred Landscapes in Antiquity Ralph Haussler, Gian Franco Chiai, 2020-07-31 From generation to generation people experience their landscapes differently Humans depend on their natural environment it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities such as droughts famines floods and landslides need to be appeased We presume that in many societies lakes rivers rocks mountains caves and groves were considered sacred Individual sites and entire landscapes are often associated with divine actions mythical heroes and etiological myths Throughout human history people have also felt the need to monumentalize their sacred landscape But this is where the similarities end as different societies had very different understandings believes and practices The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi disciplinary approach More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it We see the role of performance ritual orality textuality and memory in people s sacred landscapes A diachronic view allows us to study how landscapes were rewritten adapted and redefined in the course of time to suit new cultural political and

religious understandings not to mention the impact of urbanism on people's understandings. A key question is how was the landscape manipulated, transformed and monumentalized, especially the colossal investments in monumental architecture we see in certain socio-historic contexts or the creation of an alternative human-made seemingly non-natural landscape with perfectly astronomically aligned buildings that define a cosmological order. Sacred Landscapes therefore aims to analyze the complex links between landscape religiosity and society, developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic holistic contextual and historical perspective.
