Sacred Time:

In Search of Sacred Time Jacques Le Goff, 2014-02-23 How The Golden Legend shaped the medieval imagination It is impossible to understand the late Middle Ages without grasping the importance of The Golden Legend the most popular medieval collection of saints lives Assembled for clerical use in the thirteenth century by Genoese archbishop Jacobus de Voragine the book became the medieval equivalent of a best seller By 1500 there were more copies of it in circulation than there were of the Bible itself Priests drew on The Golden Legend for their sermons the faithful used it for devotion and piety and artists and writers mined it endlessly in their works In Search of Sacred Time is the first comprehensive history and interpretation of this crucial book Jacques Le Goff one of the world's most renowned medievalists provides a lucid compelling and unparalleled account of why and how The Golden Legend exerted such a profound influence on medieval life In Search of Sacred Time explains how The Golden Legend an encyclopedic work that followed the course of the liturgical calendar and recounted the life of the saint for each feast day worked its way into the fabric of medieval life Le Goff describes how this ambitious book was carefully crafted to give sense and shape to the Christian year underscoring its meaning and drama through the stories of saints miracles and martyrdoms Ultimately Le Goff argues The Golden Legend influenced how medieval Christians perceived the passage of time Christianizing time itself and reconciling human and divine temporality Authoritative eloquent and original In Search of Sacred Time is a major reinterpretation of a book that is central to comprehending the medieval imagination

Time Joel Burges, Amy Elias, 2016-08-02 The critical condition and historical motivation behind Time Studies The concept of time in the post millennial age is undergoing a radical rethinking within the humanities Time A Vocabulary of the Present newly theorizes our experiences of time in relation to developments in post 1945 cultural theory and arts practices Wide ranging and theoretically provocative the volume introduces readers to cutting edge temporal conceptualizations and investigates what exactly constitutes the scope of time studies Featuring twenty essays that reveal what we talk about when we talk about time today especially in the areas of history measurement and culture each essay pairs two keywords to explore the tension and nuances between them from past future and anticipation unexpected to extinction adaptation and serial simultaneous Moving beyond the truisms of postmodernism the collection newly theorizes the meanings of temporality in relationship to aesthetic cultural technological and economic developments in the postwar period This book thus assumes that time not space as the postmoderns had it is central to the contemporary period and that through it we can come to terms with what contemporaneity can be for human beings caught up in the historical present In the end Time reveals that the present is a cultural matrix in which overlapping temporalities condition and compete for our attention Thus each pair of terms presents two temporalities yielding a generative account of the time or times in which we live

Book jacket Religion on the Battlefield Ron E. Hassner, 2016-05-18 How does religion shape the modern battlefield Ron E Hassner proposes that religion acts as a force multiplier both enabling and constraining military operations This is true not only for religiously radicalized fighters but also for professional soldiers In the last century religion has influenced modern militaries in the timing of attacks the selection of targets for assault the zeal with which units execute their mission and the ability of individual soldiers to face the challenge of war Religious ideas have not provided the reasons why conventional militaries fight but religious practices have influenced their ability to do so effectively In Religion on the Battlefield Hassner focuses on the everyday practice of religion in a military context the prayers rituals fasts and feasts of the religious practitioners who make up the bulk of the adversaries in bystanders to and observers of armed conflicts To show that religious practices have influenced battlefield decision making Hassner draws most of his examples from major wars involving Western militaries They include British soldiers in the trenches of World War I U S pilots in World War II and U S

Religious Cycles Theresa Walton, 2025-03-04 *Religious Cycles* explores how calendars have profoundly shaped religious beliefs and practices across diverse faiths and historical periods The book argues that religious calendars are not merely time tracking tools but powerful instruments that shape religious consciousness and social behavior Calendars define religious identity reinforce communal solidarity and link religious life to the natural world The book begins with an introduction to key concepts like the sacred year and holy days Then it analyzes solar calendars such as those used in ancient Egypt and Mesopotamia highlighting the integration of agricultural cycles into religious practices Next the book examines lunar calendars focusing on the Islamic calendar and its impact on religious festivals Finally it explores lunisolar calendars using the Jewish calendar as an example of balancing lunar months with the solar year This book stands out by examining religious calendars as dynamic evolving systems shaped by both astronomical events and sociocultural needs By tracing the development and diffusion of calendrical practices *Religious Cycles* ultimately reveals how calendars have served as linchpins in preserving cultural continuity and fostering social cohesion within religious communities

The SAGE Encyclopedia of Intercultural Competence Janet M. Bennett, 2015-03-23 In 1980 SAGE published Geert Hofstede's *Culture's Consequences*. It opens with a quote from Blaise Pascal: "There are truths on this side of the Pyrenees that are falsehoods on the other." The book became a classic, one of the most cited sources in the Social Science Citation Index and subsequently appeared in a second edition in 2001. This new SAGE Encyclopedia of Intercultural Competence picks up on themes explored in that book. Cultural competence refers to the set of attitudes, practices, and policies that enables a person or agency to work well with people from differing cultural groups. Other related terms include cultural sensitivity, transcultural skills, diversity competence, and multicultural expertise. What defines a culture? What barriers might block successful communication between individuals or agencies of differing cultures? How can those barriers be understood and navigated to enhance intercultural communication and understanding? These questions and more are explained within the pages of this new reference work.

Key Features: 300 to 350 entries organized in A to Z fashion in two volumes. Signed entries that conclude with Cross References and Suggestions for Further Readings. Thematic Reader's Guide in the front matter grouping related entries by broad topic areas. Chronology that provides a historical perspective of the development of cultural competence as a discrete field of study. Resources appendix and a comprehensive Index.

The SAGE Encyclopedia of Intercultural Competence is an authoritative and rigorous source on intercultural competence and related issues, making it a must-have reference for all academic libraries.

Art and Its Significance Stephen David Ross, 1984-06-30 The philosophy of art, including the theory of interpretation, has been among the most generative branches of philosophy in the latter half of the twentieth century. Remarkable, interesting, and important work has emerged on both sides of the Atlantic from all the major sources of philosophic thought. For the first time, Stephen David Ross brings together the best of recent writing with the major historical texts and the most influential works of the past century to provide valuable insight into the nature of art and how we are to understand it. The selections in this collection comprise a remarkably wide array of positions on the nature and importance of art in human experience. A wealth of material is divided into four parts. Part I, from the history of philosophy, includes selections by the essential writers: Plato, Aristotle, Kant, Hegel, Nietzsche. In Part II, there are significant selections from Dewey, Langer, Goodman, Heidegger, and Merleau-Ponty. The major selections in Part III are from Hirsch and Gadamer on the nature of interpretation, supplemented by selections from Pepper, Derrida, and Foucault. Selections in Part IV sharpen the issues that emerge from the more theoretical discussions in the preceding sections. Part IV includes important psychological theories, seminal proclamations by twentieth-century artists, and selections from Bullough on aesthetic distance, as well as from Marcuse who develops an important variation on the Marxist view of art.
