Scrutinizing Feminist Epistemology An Examination Of Gender In Science:

Scrutinizing Feminist Epistemology Cassandra L. Pinnick, Noretta Koertge, Robert F. Almeder, 2003 This volume presents the first systematic evaluation of a feminist epistemology of science's power to transform both the practice of science and our society Unlike existing critiques this book questions the fundamental feminist suggestion that purging science of alleged male biases will advance the cause of both science and by extension social justice The book is divided into four sections the strange status of feminist epistemology testing feminist claims about scientific practice philosophical and political critiques of feminist epistemology and future prospects of feminist epistemology Each of the essays most of which are original to this text directly confronts the very idea that there could be a feminist epistemology or philosophy of science Rather than attempting to deal in detail with all of the philosophical views that fall under the general rubric of feminist epistemology the contributors focus on positions that provide the most influential perspectives on science Not all of the authors agree amongst themselves of course but each submits feminist theories to careful scrutiny

Feminist Epistemology and Philosophy of Science Heidi E. Grasswick, 2011-05-16 Having enjoyed more than twenty years of development feminist epistemology and philosophy of science are now thriving fields of inquiry offering current scholars a rich tradition from which to draw In addition to a recognition of the power of knowledge itself and its effects on women's lives a central feature of feminist epistemology and philosophy of science has been the attention they draw to the role of power dynamics within knowledge seeking practices and the implications of these dynamics for our understandings of knowledge science and epistemology *Feminist Epistemology and Philosophy of Science* Power in Knowledge collects new works that address today's key challenges for a power sensitive feminist approach to questions of knowledge and scientific practice The essays build upon established work in feminist epistemology and philosophy of science offering new developments in the fields and

representing the broad array of the feminist work now being done and the many ways in which feminists incorporate power dynamics into their analyses **Feminist Epistemology and Philosophy of Science** Sharon Crasnow, Kristen

Intemann, 2024-03-25 *Feminist Epistemology and Philosophy of Science* An Introduction is structured around six questions and the answers to them that have been offered by feminist epistemologists and philosophers of science By showing how these answers differ from those of traditional philosophical approaches the book situates feminist work in relation to philosophy more generally The questions are Who knows What do we have knowledge of How do we know What don't we know Why does it matter and How can we know better In addressing these questions the book reviews feminist accounts of objectivity agnotology issues in social epistemology including epistemic injustice and considers how feminist epistemology and philosophy of science aim at better knowledge production The audience for the book is upper division undergraduates but it will be useful as a foundation for graduate students and other philosophers who are seeking a general understanding of feminist work in these areas Key Features Provides an overview of contemporary feminist epistemology and philosophy of science Contrasts feminist epistemology and philosophy of science with traditional philosophy in these areas Provides clear examples of the benefits of feminist approaches Includes in each chapter an initial overview and at the end of the chapter suggested additional readings and discussion questions *Feminist Science Fiction and Feminist Epistemology* Ritch

Calvin, 2016-09-11 This book argues that feminist science fiction shares the same concerns as feminist epistemology challenges to the sex of the knower the valuation of the abstract over the concrete the dismissal of the physical the focus on rationality and reason the devaluation of embodied knowledge and the containment of some bodies Ritch Calvin argues that feminist science fiction asks questions of epistemology because those questions are central to making claims of subjectivity and identity Calvin reveals how women who have historically been marginal to the deliberations of philosophy and science have made significant contributions to the reconsideration and reformulation of the epistemological models of the world and the individuals in it Out from the Shadows Sharon L. Crasnow, Anita M. Superson, 2012-02-14 This collection draws

together 18 mostly new papers on topics in standard areas of traditional analytical philosophy written from a feminist perspective It aims to bring out from the shadows traditional philosophy by challenging it in a constructive socially critical way that is essential for philosophy's fundamental goal of pursuing truth that matters *The Routledge Handbook of*

Epistemic Contextualism Jonathan Jenkins Ichikawa, 2017-03-16 Epistemic contextualism is a recent and hotly debated topic in philosophy Contextualists argue that the language we use to attribute knowledge can only be properly understood relative to a specified context How much can our knowledge depend on context Is there a limit and if so where does it lie What is the relationship between epistemic contextualism and fundamental topics in philosophy such as objectivity truth and relativism The Routledge Handbook of Epistemic Contextualism is an outstanding reference source to the key topics problems and debates in this exciting subject and is the first collection of its kind Comprising thirty seven chapters by a team of

international contributors the Handbook is divided into eight parts Data and motivations for contextualism Methodological issues Epistemological implications Doing without contextualism Relativism and disagreement Semantic implementations Contextualism outside knows Foundational linguistic issues Within these sections central issues debates and problems are examined including contextualism and thought experiments and paradoxes such as the Gettier problem and the lottery paradox semantics and pragmatics the relationship between contextualism relativism and disagreement and contextualism about related topics like ethical judgments and modality The Routledge Handbook of Epistemic Contextualism is essential reading for students and researchers in epistemology and philosophy of language It will also be very useful for those in related fields such as linguistics and philosophy of mind

The Ethics of Belief Jonathan Matheson, Rico Vitz, 2014 How do people form beliefs and how should they do so This book presents seventeen new essays on these questions drawing together perspectives from philosophy and psychology The first section explores the ethics of belief from an individualistic framework It begins by examining the question of doxastic voluntarism i e the extent to which people have control over their beliefs It then shifts to focusing on the kinds of character that epistemic agents should cultivate what their epistemic ends ought to be and the way in which these issues are related to other traditional questions in epistemology The section concludes by examining questions of epistemic value of whether knowledge is in some sense primary and of whether the ethics of belief falls within the domain of epistemology or ethics The second section extends this traditional debate to issues concerning the social dimensions of belief formation It begins with essays by social psychologists discussing the past three decades of research in lay epistemics It continues by examining Humean Kantian and feminist insights into the social aspects of belief formation as well as questions concerning the ethics of assertion The section concludes with a series of essays examining a topic that is currently of great interest to epistemologists namely the significance of peer disagreement

Meta-Philosophical Reflection on Feminist Philosophies of Science Maria Cristina Amoretti, Nicola Vassallo, 2015-12-21 This volume offers a meta philosophical reflection on feminist philosophies of science It emphasizes and discusses both the connections and differences between traditional philosophies of science and feminist philosophies of science The collection systematically analyses feminist contributions to the various philosophies of specific sciences Each chapter is devoted to a specific area of philosophy of science general philosophy of science philosophy of biology philosophy of climate sciences philosophy of cognitive sciences and neurosciences philosophy of economics philosophy of history and archaeology philosophy of logic and mathematics philosophy of medicine philosophy of psychology philosophy of physics and philosophy of social sciences Since some of these areas have so far rarely been addressed by feminist philosophers this new collection provides new angles and stimulates the debate on pivotal issues that are part and parcel of both traditional philosophies of science and feminist philosophies of science Using a range of different methodologies and styles the essays all show great clarity in both arguments and contents

as researchers educators and activists interested in cross disciplinary engagement and theoretical advancement in areas of
concern to feminists **Climate Technology, Gender, and Justice** Tina Sikka, 2018-12-14 This book is the first to
undertake a gendered analysis of geoengineering and alternative energy sources Are either of these technologies sufficiently
attendant to gender issues Do they incorporate feminist values as articulated by the renowned social philosopher Helen
Longino such as empirical adequacy novelty heterogeneity complexity and applicability to human needs The overarching

argument in this book contends that while mitigation strategies like solar and wind energy go much further to meet feminist objectives and virtues geoengineering is not consistent with the values of justice as articulated in Longino's feminist approach to science. This book provides a novel feminist argument in support of pursuing alternative energy in the place of geoengineering. It provides an invaluable contribution for academics and students working in the areas of gender science and climate change as well as policy makers interested in innovative ways of taking up climate change mitigation and gender.

Gadamer and the Social Turn in Epistemology Carolyn Culbertson, 2024-06-01 While some take Gadamer's Truth and Method to be a departure from epistemological questions and concerns author Carolyn Culbertson reads Gadamer's work as offering a valuable reflection on the nature of understanding one that is deeply resonant with the recent social turn in epistemology. Like social epistemologists Gadamer worries about the epistemic irresponsibility that we encourage when we treat an attitude of objectivity wherein the inquirer lacks any awareness of their social and historical situation as an epistemic ideal. Like social epistemologists too Gadamer argues that understanding that one is socially and historically situated does not mean believing that one is fated to simply repeat traditional ideas without critique or modification a concern frequently raised in response to critiques of Enlightenment epistemology. By developing such parallels Gadamer and the Social Turn in Epistemology offers seasoned readers of Gadamer a new context in which to appreciate his discussion of understanding in Truth and Method and readers unfamiliar with Gadamer a productive point of access into his major work.

Epistemic Responsibility for Undesirable Beliefs Deborah K. Heikes, 2023-09-21 This book considers whether we can be epistemically responsible for undesirable beliefs such as racist and sexist ones. The problem with holding people responsible for their undesirable beliefs is first what constitutes an undesirable belief will differ among various epistemic communities second it is not clear what responsibility we have for beliefs simpliciter and third inherent in discussions of socially constructed ignorance like white ignorance is the idea that society is structured in such a way that white people are made deliberately unaware of their ignorance which suggests their racial beliefs are not epistemically blameworthy. This book explores each of these topics with the aim of establishing the nature of undesirable beliefs and our responsibility for these beliefs with the understanding that there may well be rare occasions when undesirable beliefs are not epistemically culpable.
