Klein, 2001 *Gender in Pre Hispanic America* offers rich opportunities for comprehending current trends and considering future directions in research It is unique in that it puts social theory at the forefront of the discussion The book has a special intellectual presence and contemporary relevance in its engagement with the social lives and constructs of its authors and readers alike The consideration of the role of gender in our daily lives including in our professions becomes inescapable when reading this book It is not simply a question of men's roles having been possibly overemphasized and overstudied to the detriment of women's The fact that genders as opposed to sexes are socially constructed categories focuses our attention on the ways in which these and other social constructs have shaped our

present understanding of the past and informed past peoples understand of their present In various articles in this book the reader will not find unanimity in what is meant by gender or how to go about studying it What will be found however is a collection of interesting informed thought provoking and often lively essays It is hoped that this volume will mark a stage in an evolving study of this field and provoke new research in the future Mines of Silver and Gold in the Americas Peter Bakewell,2020-02-13 This volume focuses on Latin America since it was mainly there that Europeans or their colonial descendants actually engaged in mining in the 16th 19th centuries elsewhere they traded metals mined by others The principal metals produced and in prodigious quantities were silver in the Spanish colonies and gold mainly in Brazil in the 18th century These articles analyse the volume and pattern of production and the forms of labour found in mining Particular attention is given to the technologies of extraction and refining notably the adoption of the mercury amalgamation process this had a major impact driving down silver production costs because the mercury mines were a royal monopoly it also handed control to the Spanish crown **Archaeology of Ancient Mexico and Central America** Susan Toby Evans,David L. Stein,2017-04-24 This two volume set documents the essential role of the sea and maritime activity across history from travel and food production to commerce and conquest In all eras water transport has served as the cheapest and most efficient means of moving cargo and people over any significant distance Only relatively recently have railroads and

aircraft provided an alternative Most of the world s bulk goods continue to travel primarily by ship over water Even today 95 percent of the cargo that enters and leaves the United States does so by ship Similarly people around the world rely on the sea for food and in recent years the sea has become an important source of oil and other resources with the longterm effects of our continuing efforts to extract resources from the sea further highlighting environmental concerns that range from pollution to the exhaustion of fish stocks This chronologically organized two volume reference addresses the history of the sea beginning with ancient civilizations 4000 to 1000 BCE and ending with the modern era 1945 to the present day Each of the eight chapters is further broken down into sections that focus on specific nations or regions offering detailed descriptions of that area of the world and shorter entries on specific topics individuals and events The book spans maritime history covering major seafaring peoples and nations famous explorers travelers and commanders events battles and wars key technologies including famous ships important processes and ongoing events such as piracy and the slave trade and more Readers will benefit from dozens of primary source documents ranging from ancient Egyptian tales of seafaring to texts by renowned travelers like Marco Polo Zheng He and Ibn Battuta that provide firsthand accounts from the age of discovery as well as accounts of battle from World War I and II and more modern accounts of the sea

In Search of Maya Sea Traders Heather Irene McKillop, 2005 Stone temples rising above the rainforest canopy and elaborate hieroglyphs carved onto stone monuments give silent testimony to the high culture of the Maya ancestors of the indigenous peoples of Central America They have inspired generations of archaeologists professional and avocational to take to the field in search of the past One such archaeologist is Heather McKillop who in 1979 first visited the coast of Belize in search of a little known aspect of ancient Maya life the sea trade that helped move salt obsidian coral and other goods around the interior of the empire In 1982 she began bringing volunteers and students to the islands off the coast of Port Honduras Belize Since then she has returned many times to excavate sites that reveal the scope and diversity of the trade that passed by water throughout the Maya world In this book McKillop tells the story of the search for the Maya sea traders as well as the story of the traders themselves as it emerges from the excavations In Search of Maya Sea Traders describes the trading port of Wild Cane Cay where exotic obsidian jade gold and other goods including highly crafted pots were traded from distant lands McKillop also tells us about the more coastal inland trade of salt seafood and other marine resources Through the story of her own work and that of her students and volunteers McKillop models both the research design and the field work that are required to interpret the civilizations of the past She includes the adventure of discovery the challenges of working in wild environments from snakes and rising sea levels to falling coconuts and the tedium of daily measured digs in a near tropical setting Through her experiences the reader also gets to know some of the local residents of Port Honduras and Wild Cane Cay descendants of the ancient Maya In Search of Maya Sea Traders will appeal to that part of each of us that longs to explore distant places and cultures in quest of a seldom glimpsed past

Man Across the Sea Carroll L. Riley, J. Charles

Kelley, Campbell W. Pennington, Robert L. Rands, 2014-10-14 Whether humans crossed the seas between the Old World and the New in the times before Columbus is a tantalizing question that has long excited scholarly interest and tempted imaginations the world over From the myths of Atlantis and Mu to the more credible perhaps but hardly less romantic tales of Viking ships and Buddhist missionaries people have speculated upon what is after all not simply a question of contact but of the nature and growth of civilization itself To the specialist it is an important question indeed If people in the Western Hemisphere and in the Eastern Hemisphere developed their cultures more or less independently from the end of the last Ice Age until the voyages of Columbus the remarkable similarities between New World and Old World cultures reveal something important about the evolution of culture If on the other hand there were widespread or sustained contacts between the hemispheres in pre Columbian times these contacts represent events of vast significance to the prehistory and history of humanity Originally delivered at a symposium held in May 1968 during the national meeting of the Society for American Archaeology the papers presented here by scholars eminent in the field offer differing points of view and considerable evidence on the pros and cons of pre Columbian contact between the Old World and the New Various kinds of data archaeological botanical geographical and historical are brought to bear on the problem with provocative and original results Introductory and concluding remarks by the editors pull together and evaluate the evidence and suggest ground rules for future studies of this sort Man across the Sea provides no final answers as to whether people from Asia Africa or Europe visited the American Indian before Columbus It does however present new evidence suggested lines of approach and a fresh attempt to delineate the problems involved and to establish acceptable canons of evidence for the future **Sea and Land**

Philip D. Morgan, John Robert McNeill, Matthew Mulcahy, Stuart B. Schwartz, 2022 Sea and Land provides an in depth environmental history of the Caribbean to ca 1850 with a coda that takes the story into the modern era It explores the mixing movement and displacement of peoples and the parallel ecological mixing of animals plants microbes from Africa Europe elsewhere in the Americas and as far away as Asia It examines first the arrival of Native American to the region and the environmental transformations that followed It then turns to the even more dramatic changes that accompanied the arrival of Europeans and Africans in the fifteenth century Throughout it argues that the constant arrival dispersal and mingling of new plants and animals gave rise to a creole ecology Particular attention is given to the emergence of Black slavery sugarcane and the plantation system an unholy trinity that thoroughly transformed the region s demographic and physical landscapes and made the Caribbean a vital site in the creation of the modern western world Increased attention to issues concerning natural resources conservation epidemiology and climate have now made the environment and ecology of the Caribbean a central historical concern Sea and Land is an effort to integrate that research in a new general environmental history of the region Intended for scholars and students alike it aims to foster both a fuller appreciation of the extent to which environmental factors shaped historical developments in the Caribbean and the extent to which human actions have

transformed the biophysical environment of the region over time The combined work of eminent authors of environment and Latin American and Caribbean history *Sea and Land* offers a unique approach to a region characterized by Edenic nature and paradisiacal qualities as well as dangers diseases and disasters Gordon R. Willey and American Archaeology Jeremy A. Sabloff, William Leonard Fash, 2007 Gauging the impact of one scholar s contributions to modern archaeology Island Historical Ecology Peter E. Siegel, 2018-01-29 In the first book length treatise on historical ecology of the West Indies *Island Historical Ecology* addresses Caribbean island ecologies from the perspective of social and cultural interventions over approximately eight millennia of human occupations Environmental coring carried out in carefully selected wetlands allowed for the reconstruction of pre colonial and colonial landscapes on islands between Venezuela and Puerto Rico Comparisons with well documented patterns in the Mediterranean and Pacific islands place this case study into a larger context of island historical ecology The Archaeology of Maritime Landscapes Ben Ford, 2011-05-21 Maritime cultural landscapes are collections of submerged archaeological sites or combinations of terrestrial and submerged sites that reflect the relationship between humans and the water These landscapes can range in size from a single beach to an entire coastline and can include areas of terrestrial sites now inundated as well as underwater sites that are now desiccated However what binds all of these sites together is the premise that each aspect of the landscape cultural political environmental technological and physical is interrelated and can not be understood without reference to the others In this maritime cultural landscape approach individual sites are treated as features within the larger landscape and the interpretation of single sites add to a larger analysis of a region or culture This approach provides physical and theoretical links between terrestrial and underwater archaeology as well as prehistoric and historic archaeology consequently providing a framework for integrating such diverse topics as trade resource procurement habitation industrial production and warfare into a holistic study of the past Landscape studies foster broader perspectives and approaches extending the study of maritime cultures beyond the shoreline Despite this potential the archaeological study of maritime landscapes is a relatively untried approach with many questions regarding the methods and perspectives needed to effectively analyze these landscapes The chapters in this volume which include contributions from the United States the United Kingdom Norway and Australia address many of the theoretical and methodological questions surrounding maritime cultural landscapes The authors comprise established scholars as well as archaeologists at the beginning of their careers providing a healthy balance of experience and innovation The chapters also demonstrate parity between method and theory where the varying interpretations of culture and space are given equal weight with the challenges of investigating both wet and dry sites across large areas *Pre-Columbian Landscapes of Creation and Origin* John Staller, 2008-03-12 Pre Columbian Andean and Mesoamerican cultures have inspired a special fascination among historians anthropologists archaeologists as well as the general public As two of the earliest known and studied civilizations their origin and creation mythologies hold a special interest The existing and Pre Columbian cultures

from these regions are particularly known for having a strong connection with the natural landscape and weaving it into their mythologies A landscape approach to archaeology in these areas is uniquely useful shedding insight into their cultural beliefs practices and values The ways in which these cultures imbued their landscape with symbolic significance influenced the settlement of the population the construction of monuments as well as their rituals and practices This edited volume combines research on Pre Columbian cultures throughout Mesoamerica and South America examining their constructed monuments and ritual practices It explores the foundations of these cultures through both the creation mythologies of ancient societies as well as the tangible results of those beliefs It offers insight on specific case studies combining evidence from the archaeological record with sacred texts and ethnohistoric accounts The patterns developed throughout this work shed insight on the effect that perceived sacredness can have on the development of culture and society This comprehensive and much needed work will be of interest to archaeologists and anthropologists focused on Pre Columbian studies as well as those in the fields of cultural or religious studies with a broader geographic focus

The Worlds of the Moche on the North Coast of Peru Elizabeth P. Benson, 2012-07-15 The Moche or Mochica created an extraordinary civilization on the north coast of Peru for most of the first millennium AD Although they had no written language with which to record their history and beliefs the Moche built enormous ceremonial edifices and embellished them with mural paintings depicting supernatural figures and rituals Highly skilled Moche artisans crafted remarkable ceramic vessels which they painted with figures and scenes or modeled like sculpture and mastered metallurgy in gold silver and copper to make impressive symbolic ornaments They also wove textiles that were complex in execution and design A senior scholar renowned for her discoveries about the Moche Elizabeth P Benson published the first English language monograph on the subject in 1972 Now in this volume she draws on decades of knowledge as well as the findings of other researchers to offer a grand overview of all that is currently known about the Moche Touching on all significant aspects of Moche culture she covers such topics as their worldview and ritual life ceremonial architecture and murals art and craft supernatural beings government and warfare and burial and the afterlife She demonstrates that the Moche expressed with symbolic language in metal and clay what cultures in other parts of the world presented in writing Indeed Benson asserts that the accomplishments of the Moche are comparable to those of their Mesoamerica contemporaries the Maya which makes them one of the most advanced civilizations of pre Columbian America
