John Purdy,1826 **The New Sailing Directory for the Mediterranean Sea** John Purdy,1826 **Sailing Directions for the Strait of Gibraltar and the Mediterranean Sea ...** John Purdy,1841 *Air-Sea Exchange: Physics, Chemistry and Dynamics* G.L. Geernaert,2013-04-17 During the 1980 s a wealth of information was reported from field and laboratory experiments in order to validate and/or modify various aspects of the surface layer Monin Obukhov M O similarity theory for use over the sea and to introduce and test new concepts related to high resolution flux magnitudes and variabilities For example data from various field experiments conducted on the North Sea Lake Ontario and the Atlantic experiments among others yielded information on the dependence of the flux coefficients on wave state In all field projects the usual criteria for satisfying M O similarity were applied The assumptions of stationarity and homogeneity was assumed to be relevant over both small and large scales In addition the properties of the outer layer were assumed to be correlated with properties of the surface layer These assumptions generally required that data were averaged for spatial footprints representing scales greater than 25 km or typically 30 minutes or longer for typical windspeeds While more and more data became available over the years and the technology applied was more reliable robust and durable the flux coefficients and other turbulent parameters still exhibited significant unexplained scatter Since the scatter did not show sufficient reduction over the years to meet customer needs in spite of improved technology and heavy financial investments one could only conclude that perhaps the use of similarity theory contained too many simplifications when applied to environments which were more complicated than previously thought *The Art of Siege Warfare and Military Architecture from the Classical World to the Middle Ages* Michael Eisenberg,Rabei Khamisy,2021-01-13 The papers in this book present for the first time the world of warfare both defensive and offensive from the Classical periods to end of the Middle Ages in one collection These scholarships have attracted ancient writers and generals and nowadays historians archaeologists and researchers poliorcetics Military historiography and ancient manuals are well familiar from the Classical period throughout the Hellenistic great battlefields until the end of the Middle Ages the chronological scope of this codex The current book is the first to encompass this long array of time while trying to enrich the reader with the continuity development and regression in the different periods and spheres of the ancient poliorcetics and beyond the papers presented here are focusing on the physical fortifications besieging and defense techniques development and efficiency of ancient projectiles and sieging machinery battlefields and the historiographical evidence The X papers of the book are written by some of the best scholars in their field presenting here for the first time the results of their research in the west and in the east **Putnam's Monthly Magazine of American Literature, Science, and Art** ,1854 **Scottish Castles** Adrian Pettifer,2024-10 Gazetteer of over 500 hundred surviving Scottish Castles Discover the castles of Scotland from early motte and bailey earthworks and impressive walled enclosures to

the many tower houses that dot the landscape Castles were built in increasing numbers from the 14th to the 17th century as residences for the Scottish nobility Some are still proudly occupied others are well maintained ruins many others slowly decay in fields and farmyards Here Adrian Pettifer provides a brief account of every Scottish castle to survive in a reasonable state of preservation including such iconic sites as Edinburgh Glamis and Cawdor Each of the more than five hundred main entries provides a brief history and description of a castle followed by advice on accessibility sources for further reading and cross references to related sites An introduction supplies the historical background while a glossary covers all aspects of Scottish castles in some detail Ordnance Survey references are given in the index

Fortification and Settlement in Crusader Palestine Denys Pringle,2023-06-14 These studies examine the physical remains of Frankish settlement in Palestine in the 12th and 13th centuries In recent years the view that Frankish settlement was largely confined to the fortified urban centres and castles with few westerners venturing into the open countryside has come to be challenged in the light of new archaeological evidence and re examination of the sources The present studies contribute to an understanding of the nature of Frankish settlement by illustrating aspects of the relationship between fortification and settlement in particular the role of castles and towers in promoting settlement and providing both security and domestic accommodation the relationship between castles towers and other semi fortified rural structures the physical planning of the new towns established by the canons of the Holy Sepulchre the measures undertaken to defend urban settlements and the contribution that town walls and castles made to the security of the kingdom

The Sea of Learning Steven B. Miles, 2020-05-11. In 1817 a Cantonese scholar was mocked in Beijing as surprisingly learned for someone from the boondocks. In 1855 another Cantonese scholar boasted of the flourishing of literati culture in his home region. Not without reason the second man pointed to the Xuehaitang Sea of Learning Hall as the main factor in the upsurge of learning in the Guangzhou area. Founded in the 1820s by the eminent scholar official Ruan Yuan, the Xuehaitang was indeed one of the premier academies of the nineteenth century. The celebratory discourse that portrayed the Xuehaitang as having radically altered literati culture in Guangzhou also legitimated the academy's place in Guangzhou and Guangzhou's place as a cultural center in the Qing empire. This study asks: Who constructed this discourse and why? And why did some Cantonese elites find this discourse compelling while others did not? To answer these questions, Steven Miles looks beyond intellectual history to local social and cultural history. Arguing that the academy did not exist in a scholarly vacuum, Miles contends that its location in the city of Guangzhou and the Pearl River Delta embedded it in social settings and networks that determined who utilized its resources and who celebrated its successes and values.

Toilers of the Sea Виктор Марш Гюро, 2021-12-02. Toilers of the Sea Victor Hugo, 2023-04-10T20:28:05Z. Gilliat is an accomplished sailor but due to a mysterious mother and a home locally regarded as haunted, his acceptance into Guernsey society is limited. That isolation doesn't stop him from falling for D'Arrette, the neat and delicate and pretty niece of local ferry owner Mess Lethierry. When the ship is involved in a catastrophic incident, D'Arrette announces that she will marry the man who can salvage it. Gilliat immediately steps forward to take on alone the impossible task. Victor Hugo wrote *Toilers of the Sea* while living on Guernsey in the Channel Islands. It followed his extremely successful novel *Les Misérables*, both written there after exile from France for criticizing Napoleon's 1851 coup d'état. The themes of individual struggle and triumph over the wild forces of nature are easily seen as a corollary for the industrialization happening in the society of the time, but the novel also records

the contemporary life language and superstitions of the Channel Islands The edition is based on the authorized translation of 1877 by William Moy Thomas This book is part of the Standard Ebooks project which produces free public domain ebooks
