Seal Wars Twentyfive Years On The Front Lines:

Seal Wars Paul Watson, 2003 Captain Paul Watson founding member of the Greenpeace Foundation writes of his twenty five years attempting to save the Canadian harp seal from slaughter and extinction *The Animal Liberation Front* Steven Best, Anthony J. Nocella, 2011-06 The actions of the Animal Liberation Front ALF constitute one of the most misunderstood components of the animal advocacy movement in the U K and U S Not so much an organization as an ever changing cluster of individuals who free animals from laboratories farms and other animal confinement facilities the ALF has been by turns romanticized and vilified hounded and lionized In this detailed introduction to the ALF which constitutes the opening chapter of their edited volume *Terrorists or Freedom Fighters* academics Steve Best and Anthony Nocella place the ALF in the context of other liberation and social justice movements and examine its stated commitment to nonviolence and the forces arrayed against it The result is a potent polemical and passionately engaged study of activism in an age of terror laws and fearmongering *For the Wild* Sarah M. Pike, 2017-10-03 *For the Wild* explores the ways in which the commitments of radical environmental and animal rights activists develop through powerful experiences with the more than human world during childhood and young adulthood The book addresses the question of how and why activists come to value nonhuman animals and the natural world as worthy of protection Emotions and memories of wonder love compassion anger and grief shape activists protest practices and help us understand their deep rooted dedication to the planet and its creatures Drawing on analyses of activist art music and writings as well as interviews and participant observation in activist communities Sarah M Pike delves into the sacred duties of these often misunderstood and marginalized groups with openness and sensitivity **From Environmental Action to Ecoterrorism?** Gerry Nagtzaam, 2017-01-27 This book scrutinizes the growth of the eco terrorism movement operating on a global scale focusing on the main groups and their more radical offshoots both historically and those currently active These include Earth First the Earth Liberation Front the Animal Liberation Front and the Sea Shepherd Conservation Society It critically examines how these groups form and how they have evolved their key personnel their strategies and tactics principles motivating philosophies and attitudes to violence Specifically the book seeks to understand whether such groups inevitably evolve from activists to militants to terrorists as the literature suggests Lastly it considers the future of such groups asking whether they will become more prominent as more people become ecologically aware and as global environmental conditions deteriorate or whether such groups have peaked as a force for environmental change *A Fate Worse Than Death* Britt Lind, 2021-08-18 As a homicide detective Rosemaria Baker is known for her street smarts her feisty personality and her ability to nail the bad guys Being the daughter of a cop and an actress gave little Rosemaria a dichotomous view of life Her mother was inclined to get lost in her fantasies while her father had to face the harsh realities of a world filled with murder and mayhem Nine year old Rosemaria loved both her parents and admired her mother s talent but even at a young age she felt drawn to her father s work as a detective constantly

begging him to share with her every detailed description of the dangerous criminals and close calls he survived while chasing the bad guys Whatever Rosemaria did she did it well be it hitting baseballs shooting baskets writing school papers she put her all into every endeavor When tragedy invaded her world at the tender age of ten she survived because of her innate ability to compartmentalize her feelings and move forward While still in college she was faced with a terrifying situation where she had to use all of her mental and physical capabilities in an effort to save her father s life Ignoring what would have been safe and expected of her and asking no one s advice she risked everything to find him and bring him home alive

Green Syndicalism Jeff Shantz,2012-10-10 It is widely understood that the burdens of ecological destruction are borne disproportionately by working class and poor communities both through illness and disease caused by pollutants and through the depletion of natural resources from which they make a living Yet consistently the voices of the working class are the most marginalized excluded and silenced when discussing how to address ecological concerns and protect the environment from future destruction Both mainstream environmental groups such as the Sierra Club and Greenpeace and radical environmentalists such as EarthFirst are reluctant to engage with working class and poor communities often viewing blue collar workers as responsible for the destruction these groups are trying to prevent In Green Syndicalism Shantz issues a call to action to the environmental movement and labor activists particularly rank and file workers to join forces in a common struggle to protect the environment from capitalism corporate greed and the extraction of resources He argues for a major transformation to address the jobs versus the environment rhetoric that divides these two groups along lines of race and class Combining practical initiatives and theoretical perspectives Shantz offers an approach that brings together radical ecology and revolutionary unionism in a promising vision of green politics Green syndicalists work as coalitions to increase community based economics and productive decision making that encourages the participation of all stakeholders in the process Drawing in part on his own experiences growing up in a working class family and organizing within radical ecology and labor movements Shantz charts a path that accesses the commonalities between these groups in an effort to take on the forces that destroy the environment exploit people and harm their communities Seal Victoria Dickenson,2015-11-15

Playful and inquisitive seals have long been interested in humans and humans have reciprocated that interest falling for their beauty grace and charm as they frolic alongside our boats or loll on sandy shores In this newest entry in the Animal series Victoria Dickenson traces the history of our interaction with these beautiful fascinating swimmers from the centuries of hunting in which people killed countless seals for their skin oil and meat to the present when the white furred baby seal has become one of the most potent symbols of the need for ecological conservation Along the way she offers an approachable account of seal biology and behavior and she delineates the threats they face from habitat destruction and climate change Beautifully illustrated and packed with stories from folklore myth and history Seal offers a richly immersive view of a much loved storied creature **Oceans** Participant,Jon Bowermaster,2010-03-23 This unique tie in to the major motion picture

Greening the Academy Samuel Fassbinder,Anthony Nocella,Richard Kahn,2012-12-30 This is the academic Age of the Neoliberal Arts Campuses as places characterized by democratic debate and controversy wide ranges of opinion typical of vibrant public spheres and service to the larger society are everywhere being creatively destroyed in order to accord with market and military models befitting the academic industrial complex While it has become increasingly clear that facilitating the sustainability movement is the great 21st century educational challenge at hand this book asserts that it is both a dangerous and criminal development today that sustainability in higher education has come to be defined by the complex friendly green campus initiatives of science technology engineering and management programs By contrast Greening the Academy Ecopedagogy Through the Liberal Arts takes the standpoints of those working for environmental and ecological justice in order to critique the unsustainable disciplinary limitations within the humanities and social sciences as well as provide tactical reconstructive openings toward an empowered liberal arts for sustainability Greening the Academy thus hopes to speak back with a collective demand that sustainability education be defined as a critical and moral vocation comprised of the diverse types of humanistic study that will benefit the well being of our emerging planetary community and its numerous common locales

Soul, Self, and Society Edward L. Rubin, 2015-02-17 Political and social commentators regularly bemoan the decline of morality in the modern world They claim that the norms and values that held society together in the past are rapidly eroding to be replaced by permissiveness and empty hedonism But as Edward Rubin demonstrates in this powerful account of moral transformations these prophets of doom are missing the point Morality is not diminishing instead a new morality centered on an ethos of human self fulfillment is arising to replace the old one As Rubin explains changes in morality have gone hand in hand with changes in the prevailing mode of governance throughout the course of Western history During the Early Middle Ages a moral system based on honor gradually developed In a dangerous world where state power was declining people relied on bonds of personal loyalty that were secured by generosity to their followers and violence against their enemies That moral order exemplified in the early feudal system and in sagas like *The Song of Roland* *The Song of the Cid* and the Arthurian legends has faded but its remnants exist today in criminal organizations like the Mafia and in the rap music of the urban ghettos When state power began to revive in the High Middle Ages through the efforts of the European monarchies and Christianity became more institutionally effective and more spiritually intense a new morality emerged Described by Rubin as the morality of higher purposes it demanded that people devote their personal efforts to achieving salvation and their social efforts to serving the emerging nation states It insisted on social hierarchy confined women to subordinate roles restricted sex to procreation centered child rearing on moral inculcation and countenanced slavery and the marriage of pre teenage girls to older men Our modern era which began in the late 18th century has seen the gradual erosion of this morality of higher purposes and the rise of a new morality of self fulfillment one that encourages individuals to pursue the most meaningful and rewarding life path Far from being permissive or a moral abdication it demands that people respect each other s choices that sex be mutually enjoyable that public positions be allocated according to merit and that society provide all its members with their minimum needs so that they have the opportunity to fulfill themselves Where people once served the state the state now functions to serve the people The clash between this ascending morality and the declining morality of higher purposes is the primary driver of contemporary political and cultural conflict A sweeping big idea book in the vein of Francis Fukuyama s *The End of History* Charles Taylor s *The Secular Age* and Richard Sennett s *The Fall of Public Man* Edward Rubin s new volume promises to reshape our understanding of morality its relationship to government and its role in shaping the emerging world of High Modernity

Environmentalism of the Rich

Peter Dauvergne,2018-02-09 What it means for global sustainability when environmentalism is dominated by the concerns of the affluent eco business eco consumption wilderness preservation Over the last fifty years environmentalism has emerged as a clear counterforce to the environmental destruction caused by industrialization colonialism and globalization Activists and policymakers have fought hard to make the earth a better place to live But has the environmental movement actually brought about meaningful progress toward global sustainability Signs of global unsustainability are everywhere from decreasing biodiversity to scarcity of fresh water to steadily rising greenhouse gas emissions Meanwhile as Peter Dauvergne points out in this provocative book the environmental movement is increasingly dominated by the environmentalism of the rich diverted into eco business eco consumption wilderness preservation energy efficiency and recycling While it s good that for example Barbie dolls packaging no longer depletes Indonesian rainforest and that Toyota Highlanders are available as hybrids none of this gets at the source of the current sustainability crisis More eco products can just mean more corporate profits consumption and waste Dauvergne examines extraction booms that leave developing countries poor and environmentally devastated with the ruination of the South Pacific island of Nauru a case in point the struggles against consumption inequities of courageous activists like Bruno Manser who worked with indigenous people to try to save the rainforests of Borneo and the manufacturing of vast markets for nondurable goods for example convincing parents in China that disposable diapers made for healthier and smarter babies Dauvergne reveals why a global political economy of ever

more more growth more sales more consumption is swamping environmental gains Environmentalism of the rich does little to bring about the sweeping institutional change necessary to make progress toward global sustainability
