Jerlecki,2015-07-01 As with the previous volume of this series *Tales of Michigan II* is a collection of fifteen stories from across the Great Lakes State Chosen

to give the reader an insight into Michigan's rich and varied historical heritage each of these tales relates a different aspect of the state's past. Among others, stories in this book include a misunderstanding between a bridge tender and a lake freighter captain that resulted in a collision that severed the only land link between the upper portion of the Keweenaw Peninsula and the rest of the state; a mistake made by the overworked operator of an interurban railway car that led to a fatal collision near Monroe; the pioneering effort by Captain Curtis Boughton to open the hungry markets of Chicago to western Michigan fruit farmers; the days when dog sled teams provided many remote communities located in Michigan's Upper Peninsula with their only connection to the outside world during the long winter months; the devastation left behind by a fire that erupted in downtown Alpena during the summer of 1872; the tragic Easter Sunday crash of an airliner that investigators initially blamed on its crew until new information came to light nearly seven years later; the tale of a gasoline tanker stranded in Lake Michigan that prompted a series of dangerous salvage efforts to remove its valuable cargo; an international railway tunnel constructed below one of the busiest waterways in the world.

This series is dedicated to serving the growing community of scholars and practitioners concerned with the principles and applications of environmental management. Each volume is a thorough treatment of a specific topic of importance for proper management practices. A fundamental objective of these books is to help the reader discern and implement man's stewardship of our environment and the world's renewable resources. For we must strive to understand the relationship between man and nature, act to bring harmony to it and nurture an environment that is both stable and productive. These objectives have often eluded us because the pursuit of other individual and societal goals has diverted us from a course of living in balance with the environment. At times therefore the environmental manager may have to exert restrictive control which is usually best applied to man, not nature. Attempts to alter or harness nature have often failed or backfired as exemplified by the results of imprudent use of herbicides, fertilizers, water and other agents. Each book in this series will shed light on the fundamental and applied aspects of environmental management. It is hoped that each will help solve a practical and serious environmental problem.
