Searching For A Corporate Savior The Irrational Quest For Charismatic Ceos:

Searching for a Corporate Savior Rakesh Khurana, 2002 Corporate CEOs are headline news Stock prices rise and fall at word of their hiring and firing Yet we know surprisingly little about how CEOs are selected and dismissed or about their true power This text takes us into the often secretive world of the CEO selection process [Searching for a Corporate Savior](#) Rakesh Khurana, 2011 Corporate CEOs are headline news Stock prices rise and fall at word of their hiring and firing Business media debate their merits and defects as if individual leaders determined the health of the economy Yet we know surprisingly little about how CEOs are selected and dismissed or about their true power This is the first book to take us into the often secretive world of the CEO selection process Rakesh Khurana's findings are surprising and disturbing In recent years he shows corporations have increasingly sought CEOs who are above all else charismatic whose fame and force of personality impress analysts and the business media but whose experience and abilities are not necessarily right for companies specific needs The labor market for CEOs Khurana concludes is far less rational than we might think Khurana's findings are based on a study of the hiring and firing of CEOs at over 850 of America's largest companies and on extensive interviews with CEOs corporate board members and consultants at executive search firms Written with exceptional clarity and verve the book explains the basic mechanics of the selection process and how hiring priorities have changed with the rise of shareholder activism Khurana argues that the market for CEOs which we often assume runs on cool calculation and the impersonal forces of supply and demand is culturally determined and too frequently inefficient Its emphasis on charisma artificially limits the number of candidates considered giving them extraordinary leverage to demand high salaries and power It also raises expectations and increases the chance that a CEO will be fired for failing to meet shareholders hopes The result is corporate instability and too little attention to long term strategy The book is a major contribution to our understanding of corporate culture and the nature of markets and leadership in general *The Accountable Organization* John Marchica, 2004 This book lays out the strategies guidelines and tools to help anyone with the desire to influence change in organizations move from purpose to action [From Higher Aims to Hired Hands](#) Rakesh Khurana, 2010-03-22 Is management a profession Should it be Can it be This major work of social and intellectual history reveals how such questions have driven business education and shaped American management and society for more than a century The book is also a call for reform Rakesh Khurana shows that university based business schools were founded to train a professional class of managers in the mold of doctors and lawyers but have effectively retreated from that goal leaving a gaping moral hole at the center of business education and perhaps in management itself Khurana begins in the late nineteenth century when members of an emerging managerial elite seeking social status to match the wealth and power they had accrued began working with major universities to establish graduate business education programs paralleling those for medicine and law Constituting business as a profession however required codifying the knowledge relevant for practitioners and developing enforceable standards of

conduct Khurana drawing on a rich set of archival material from business schools foundations and academic associations traces how business educators confronted these challenges with varying strategies during the Progressive era and the Depression the postwar boom years and recent decades of freewheeling capitalism Today Khurana argues business schools have largely capitulated in the battle for professionalism and have become merely purveyors of a product the MBA with students treated as consumers Professional and moral ideals that once animated and inspired business schools have been conquered by a perspective that managers are merely agents of shareholders beholden only to the cause of share profits According to Khurana we should not thus be surprised at the rise of corporate malfeasance The time has come he concludes to rejuvenate intellectually and morally the training of our future business leaders **The New CEOs** Richard L.

Zweigenhaft,G. William Domhoff,2011-07-16 The New CEOs looks at the women and people of color leading Fortune 500 companies exploring the factors that have helped them achieve success and their impact on the business world and society more broadly As recently as fifteen years ago there had only been three women CEOs of Fortune 500 companies and no African Americans By now there have been more than 100 women African American Latino and Asian American CEOs of Fortune 500 companies Richard L Zweigenhaft and G William Domhoff look at these new CEOs closely Weaving compelling interview excerpts with new research the book traces how these new CEOs came to power questions whether they differ from white male Fortune 500 CEOs in meaningful ways asks whether the companies that hired them differ from other companies and discusses what we can learn about power in America from the emergence of these new CEOs As Americans continue to debate corporate compensation glass ceilings and colorblind relationships The New CEOs shares information critical to understanding our current situation and looks toward the future in our increasingly globalized world The paperback edition of The New CEOs features a new Introduction and an updated comprehensive list of new CEOs to date

Selectors John E. Jayne,C. Ambrose Rogers,2002-08-11 Though the search for good selectors dates back to the early twentieth century selectors play an increasingly important role in current research This book is the first to assemble the scattered literature into a coherent and elegant presentation of what is known and proven about selectors and what remains to be found The authors focus on selection theorems that are related to the axiom of choice particularly selectors of small Borel or Baire classes After examining some of the relevant work of Michael and Kuratowski Ryll Nardzewski and presenting background material the text constructs selectors obtained as limits of functions that are constant on the sets of certain partitions of metric spaces These include selection theorems for maximal monotone maps for the subdifferential of a continuous convex function and for some geometrically defined maps namely attainment and nearest point maps Assuming only a basic background in analysis and topology this book is ideal for graduate students and researchers who wish to expand their general knowledge of selectors as well as for those who seek the latest results **Constructing Crisis** Bert
