Real Food Nina Planck,2016-05-10 Hailed as the patron saint of farmers markets by the Guardian and called one of the great food activists by Vanity Fair's David Kamp Nina Planck was on the vanguard of the real food movement and her first book remains a vital and original contribution to the hot debate about what to eat and why In lively personal chapters on produce dairy meat fish chocolate and other real foods Nina explains how ancient foods like beef and butter have been falsely accused while industrial foods like corn syrup and soybean oil have created a triple epidemic of obesity diabetes and heart disease The New York Times said that Real Food poses a convincing alternative to the prevailing dietary guidelines even those treated as gospel A rebuttal to dietary fads and a clarion call for the return to old fashioned foods Real Food no longer

seems radical if only because the conversation has caught up to Nina Planck Indeed it has become gospel in its own right This special tenth anniversary edition includes a foreword by Nina Teicholz The Big Fat Surprise and a new introduction from the author

**Earth Energies** Serge Kahili King, 1992-11-01 Examinations and accounts of experimentation with subtle energies In addition to the scientifically accepted forces of electricity magnetism and gravity there are according to the author psychoenergetic forces those that interact with the mind as well as the body His research deals with the energies behind extraordinary phenomena like non physical healing levitation telekinesis superstrength and many others in which the mind is always an important factor He touches on pyramid power dowsing feng shui and the use of magnets for healing These and many more sources may have a single energy in common the same way different physical elements all have electrons in common Leave skepticism behind and be fascinated by his examples and observations that may someday prove to be of practical value and no more strange than bread mold being used to cure disease
