Seasons Of Gray:

Gray's Island Shirley Brock Turney.,2013-10-30 This book is a collection of poems and childhood memories The poems are simple words from a simple mind Some were written to be just plain silly in hopes of making you smile The childhood memories are about growing up in the fifties when I spent most of my young years playing in the dirt swimming in the creek and walking on railroad tracks My family and I lived in a small house next door to a big three room school house There was a railroad in front of our house and a creek in the back The rest of the community was on the other side of the railroad tracks I always say that I grew up on the wrong side of the tracks Most memories are about Gray s Island where we spent the summers swimming in the creek and having many adventures It was always boys chasing girls dunking us in the creek and having battles throwing pine cones and crabapples at each other It was a time of innocence that could only be experienced during childhood

This book reviews the gray system and combines its latest research results in fishery science. The chapters cover the basic concept and theory of gray system, original data processing, and gray sequence generation, gray correlation analysis, gray cluster analysis, gray system modeling, gray prediction, gray decision making, and gray linear programming. The theory of gray system is a new cross-sectional discipline founded in 1982 by Professor Deng Julong, a well-known scholar in China. In recent decades, it has not only been deepened and expanded in theory but also widely used in the fields of society, economy, ocean, agriculture, fishery, and other fields, and made a series of significant scientific achievements. These have laid the foundation for the important position of the gray system theory. Due to the great uncertainty of the fishery resources and the fishery environment involved in the fishery science system, which is completely different from the natural resources on the land, the data and information belong to the category of poor information, and the variability and uncertainty are greater than other natural resources. As an extremely effective analytical method and tool, gray system theory has been applied increasingly in fishery science. The book is developed based on well-read and practical literature and will help scientists and research units engaged in scientific research and teaching in fishery science and related fields to develop new research methods and tools. **Monthly Weather Review**, 1989. Seeing Through Gray-Colored Lens Joe

Millard,2006-08-05 Seeing Through Gray Colored Lens is a collection of poems written by Joe Millard that describes how he sees the world from three views the world within us the world around us and the world we create The world is a beautiful blend of colors that we share but within us are shadows that tint our views In our youth we often see the world as black and white with right and wrong answers However as questions go unanswered the world becomes confusing and more interesting New experiences expand our choices and the shades of black and white blend Our lives change creating shades of gray in an ever changing world
