Sebastian Sculpture Emotional Geometry Geometrma Emocional:

Philosophers in the Technological Age Ulrich Richter Morales, 2023-04-26 Greek philosophers built great discussions about reality which are still current in our times and still inspire today's great thinkers. From mathematical teachings by Pythagoras encompassing Plato's and Aristotle's ideas, these great discussions have been essential for our present intellectual development. Today, however, this role has been adopted by a new class of visionaries. Brought together by this new Platonic Academy based in Stanford University, devoted to proving and making use of the supremacy of numbers and mathematics in the digital world, intent on finding the new Holy Grail embodied in the perfect algorithm, present time's entrepreneurs of new technologies have radically transformed for good or otherwise the world as we know it. Ulrich Richter Morales delves deep into the legacy, sometimes clear, sometimes mystical and esoteric, of the Pythagoreans in their diverse historical incarnations. He particularly emphasizes their dominant role in these digital times while he introduces a debate regarding the sort of machines we ought to develop. Elon Musk, Steve Jobs, Bill Gates, Jeff Bezos, Larry Page, and Sergey Brin, among others, are declared heirs of the Mathematician from Samos and always engrossed in polemic discussions, they are inseparable from our concept of how the world works. Getting to know them as persons and as thinkers is a way to better understand modern day life and our role as citizens in the unstable, volatile grounds we tread on today. Mathias Goeritz Jennifer Josten, 2018-01-01 The first major work in English on Mathias Goeritz, 1915-1990, this book illuminates the artist's pivotal role within the landscape of twentieth century modernism. Goeritz became recognized as an abstract sculptor after arriving in Mexico from Germany by way of Spain in 1949. His call to integrate abstract forms into civic and religious architecture outlined in his Emotional Architecture manifesto had a transformative impact on midcentury Mexican art and design. While best known for the experimental museum El Eco and his collaborations with the architect Luis Barragán, including the brightly colored towers of Satellite City, Goeritz also shaped the Bauhaus inspired curriculum at Guadalajara's School of Architecture and the iconic Cultural Program of Mexico City's 1968 Olympic Games. Josten addresses the Cold War implications of these and other initiatives that pitted Goeritz, an advocate of internationalist abstraction, against Diego Rivera and David Alfaro Siqueiros, ardent defenders of the realist style that prevailed in official Mexican art during the postrevolutionary period. Exploring Goeritz's dialogues with leading figures among the Parisian and New York avant gardes, such as Yves Klein and Philip Johnson, Josten shows how Goeritz's approach to modernism, which was highly attuned to politics and place, formed part of a global enterprise. **Geometry of Emotion** Jeff M.
