and Aging is the first reference to combine the fields of health care aging and social work in a single authoritative volume. The volume's 102 original chapters and 13 overviews written by the most experienced and prominent gerontological health care scholars in the United States and across the world provide social work practitioners and educators with up to date knowledge of evidence based practice guidelines for effectively assessing and treating older adults and their families new models for intervention in both community based practice and institutional care and knowledge of significant policy and research issues in health and aging. A truly monumental resource this handbook represents the best research on health and aging available to social workers today.
