brothers meet up with the real Tasmanian Devil Full color **Saving the Tasmanian Devil** Dorothy Hinshaw Patent, 2019

In this addition to the critically acclaimed Scientist in the Field series Dorothy Patent follows the scientists trying to put a stop to a gruesome disease before it's too late. Tasmanian devils are dying at an alarming rate from a type of tumor that appears to be contagious. What scientists are learning while researching the Tasmanian devil has potential to affect all animals and even humans as they learn more about how to prevent and hopefully eradicate certain genetic diseases. In 1995 a deadly disease began sweeping across the Australian island state of Tasmania, killing every infected Tasmanian devil. The disease moved so fast that some scientists feared the species would be wiped out in the wild within a few decades. Where did this disease, named Devil Facial Tumor Disease, come from? What caused it: a virus, bacteria, or something else? How did it pass from one devil to another? What could be done to fight it? When author Dorothy Hinshaw Patent learned of the race to save the devil from her friend, Australian geneticist Jenny Graves, she felt compelled to travel to Australia to learn firsthand from scientists what they were finding out about these iconic Tasmanian animals and what they were doing to help it from disappearing in the wild. Follow Dorothy as she takes readers on a fascinating journey into the Australian mainland and Tasmania, visiting parks and wildlife refuges and joining geneticists, ecologists, and other researchers as they work tirelessly to save Tasmania's unique icon.
