The Museum Effect Jeffrey K. Smith, 2014-05-29 Museums libraries and cultural institutions provide opportunities for people to understand and celebrate who they are were and might be These institutions educate the public and civilize society in a variety of ways ranging from community events to a single child making a first visit The Museum Effect documents this phenomenon explains how it happens and shows how institutions can facilitate this process Cultural institutions vary dramatically in size nature and purpose but they all allow visitors to hold conversations with artists and authors perhaps long dead These conversations sometimes with others present and sometimes with artists scientists explorers or authors not present allow visitors to explore their lives and their possible selves Cultural institutions inspire personal reflection and help visitors better themselves in that they leave having contemplated what is noble excellent or exemplary about the society in which they live The museum effect is a process through which cultural institutions educate and civilize us as individuals and as societies These institutions allow visitors to spend some time with their thoughts elevated and leave the institution better people in some meaningful fashion than when they entered This visionary book presents the underlying idea and the argument for the museum effect along with empirical research supporting that argument It will help those working in museums libraries and archivists to facilitate this process and study how this is working in their own institutions
