Smith,2013-10-28 An international team of specialists in politics policy and activism provide an indispensable guide to the persistent challenges and emerging issues posed by the global HIV AIDS epidemic now in its fourth decade The HIV AIDS epidemic is at a critical turning point Compelling new findings herald the potential to eventually

grind the epidemic to a halt through a combination of expanded treatment coverage and new biomedical approaches to prevention. At the same time the severe global economic downturns have negatively affected wealthy donor nations that have provided the funds and technical support for programs in the developing world. It is against this backdrop that this landmark three volume set was developed. It provides a broad overview of the critical political issues surrounding HIV/AIDS, inspects key areas of policy and policymaking and spotlights the most important forms of activism and community mobilization. The volumes reflect an eclectic and wide ranging set of issues written by an international team comprising dozens of authors from nations including the United States, the United Kingdom, Ghana, South Africa, Brazil, Cambodia, Norway, and Qatar. The international contributors represent a variety of disciplines and bring with them a range of styles and methodological approaches appropriate to their specific topics and disciplines. An important addition to academic and public libraries, this expansive work will benefit students and other readers interested in politics, policymaking, public health, activism, and community mobilization both in the United States and globally.

Steven J. Taylor, 2021-07-26. A tribute to the influence of one of the intellectual forbearers of Disability Studies in Education (DSE), this collection of six essays honors the scholar and activist Steven J. Taylor. The Centennial Professor of Disability Studies and director of the Center on Human Policy at the Syracuse University School of Education, was recognized internationally for his enduring commitment to disability policy advocacy and the meaningful inclusion of people with disabilities throughout society. His research, teaching, and scholarship shaped our understanding of disability through a sociological lens honed over decades of enquiry that trace back from his early work on deinstitutionalization and to the present disability trends and controversies. Taylor made clear how we socially construct humanness, belonging, community, and care in much the same way we construct deviance and stigma. Steven J. Taylor's *Blue Man Living in a Red World* provides insight into the theoretical grounding that has fueled DSE research and scholarship for decades. You will also find opportunities for personal reflection about how one might find Taylor's work intrinsic to current efforts to challenge the persistent segregation and mistreatment of people labeled with intellectual or developmental disabilities. As the third volume in this series that is devoted to unraveling and better understanding the evolution of thought among those recognized as the early voices and critical leaders who laid the foundation for disability studies in education, the contributors to this text reexamine the impact of Taylor's scholarship on their own thinking, teaching, academic, and civic activities. These essays will help you discover that Taylor continues his mentorship of those who ascribe to DSE tenets and more importantly encourages each of us to use our positions to influence the next generation of disability activists and scholars. Contributors are Julie Allan, Jennifer Randhare, Ashton Elisabeth De Schauwer, Cheryl M. Jorgensen, Nancy Rice, Janet Story Sauer, Ashley Taylor, Geert Van Hove, and Linda Ware.

University in Bloomington Indiana in the United States of America Ellen was recognized internationally as an educator and critical theorist and celebrated for her incisive and unyielding critique of special education research policy and practice that spanned several decades Brantlinger held that the impoverished nature of special education theory and practice was rooted to conformance with the most rigid constructs of standardization normalcy and its resulting inequitable outcomes for children with disabilities When the push for educational inclusion gained currency in some quarters in the United States mid 1980s Brantlinger was among a handful of scholars who identified special education as the major obstacle to the inclusion of disabled students in the educational system She was widely published in North American journals well known in special education teacher education multicultural education sociology of education urban education school counseling curriculum theory qualitative education and feminist teaching This book offers an elaboration of the scholarly contributions made by Ellen Brantlinger to research in education special education inclusive education and the early development of Disability Studies in Education Many of its contributors move between the paradigmatic locations of special education inclusive education and disability studies as they consider Ellen s influence Contributors are Julie Allan Subini A Annamma Jessica Bacon Alicia A Broderick Kathleen M Collins David J Connor Dianne L Ferguson Philip M Ferguson Amy L Ferrel Beth Ferri Joanne Kim Janette Klingner Corrine Li Brooke A Moore Emily A Nusbaum and Janet S Sauer Handbook of the Life Course Michael J.
