Looking For The Last Percent The Controversy Over Census Undercounts:

Differential Undercounts in the U.S. Census William P. O'Hare, 2019-02-13 This open access book describes the differences in US census coverage also referred to as differential undercount by showing which groups have the highest net undercounts and which groups have the greatest undercount differentials and discusses why such undercounts occur In addition to focusing on measuring census coverage for several demographic characteristics including age gender race Hispanic origin status and tenure it also considers several of the main hard to count populations such as immigrants the homeless the LGBT community children in foster care and the disabled However given the dearth of accurate undercount data for these groups they are covered less comprehensively than those demographic groups for which there is reliable undercount data from the Census Bureau This book is of interest to demographers statisticians survey methodologists and all those interested in census coverage

The Misuse, Misrepresentation, and Politicization of Statistics in American Society Robert E. Parker, 2022-07-18 The Misuse Misrepresentation and Politicization of Statistics in American Society critically examines the early measurement efforts of several government agencies responsible for some of the most widely watched social indicators on unemployment life expectancy crime and population It argues that official statistics are dubious at best better seen not so much as objective barometers of social life but rather as socially constructed metrics that are easily manipulated and often politicized This book argues that official statistics powerfully frame social reality ultimately helping to determine who counts and what matters in society It makes the case that as with other types of official accounts data derived from government sources needs to be regarded skeptically and systematically investigated This book concludes that official statistics are a kind of sanctioned cover up of everyday reality hiding the true extent of joblessness distorting the real increase in life expectancy obscuring where crime actually happens and understating the undeniable growth of minority populations
