Finding Truth in Life and Love: One Man's Journey George Kyriacou, 2022-04-26 Finding Truth in Life and Love One Man's Journey Wow what a title but I hear you say the great thinkers of our time can explain Love Life and the Universe so why have you bothered writing a book Stephen Hawking says the universe can and will create itself from nothing Richard Dawkins explanation of life is We are survival machines robot vehicles blindly programmed to preserve the selfish molecules known as genes And as for love science has proven that love is just a bunch of chemical reactions So what can I offer on the subject at hand All these intelligent people indeed have more to say on the subject with all their knowledge gained through degrees and doctorates What can I add to the subject with my most prized qualification being my 100 yards swimming certificate from primary school Well indeed I do not have a lot of knowledge but I do consider that life has taught me to be wise You may ask what the difference is between knowledge and wisdom Well knowledge is knowing that a tomato is a fruit wisdom is not putting tomatoes in your fruit salad Reading some of the explanations by the world's greatest minds like Stephen Hawking when he says the universe will create itself from nothing I get the uneasy feeling that someone is messing with the fruit salad This uneasiness and my stubborn enquiring nature have set me on a half century discovery for truth The earth is travelling at 67 000 miles per hour through space Is someone driving What about all the religions of the world Are some or all of them true What is the truth in any case Does the truth matter Why don't we abandon the truth and all invent our reality to suit our lives

Missing Links John Reader, 2011-10-27 This is the story of the search for human origins from the Middle Ages when questions of the earth's antiquity first began to arise through to the latest genetic discoveries that show the interrelatedness of all living creatures Central to the story is the part played by fossils first in establishing the age of the Earth then following Darwin in the pursuit of possible Missing Links that would establish whether or not humans and chimpanzees share a common ancestor John Reader's passion for this quest palaeoanthropology began in the 1960s when he reported for Life Magazine on Richard Leakey's first fossil hunting expedition to the badlands of East Turkana in Kenya Drawing on both historic and recent research he tells the fascinating story of the science as it has developed from the activities of a few dedicated individuals into the rigorous multidisciplinary work of today His arresting photographs give a unique insight into the fossils the discoverers and the settings His vivid narrative reveals both the context in which our ancestors evolved and also the realities confronting the modern scientist The story he tells is peopled by eccentrics and enthusiasts and punctuated by controversy and even fraud It is a celebration of discoveries Neanderthal Man in the 1850s Java Man 1891 Australopithecus 1925 Peking Man 1926 Homo habilis 1964 Lucy 1978 Floresiensis 2004 and Ardipithecus
