Looking Into Pictures:

Looking Into Pictures Heiko Hecht, Robert Schwartz, Margaret Atherton, 2003 In this text philosophers psychologists and art historians explore the implications of theories of vision for our understanding of the nature of pictorial representation and picture perception

Deeper Into Pictures Flint Schier, 1986-10-09 This book presents an original theory of the nature of pictorial representation The most influential recent theory of depiction put forward by Nelson Goodman holds that the relation between depictions and what they represent is entirely conventional Flint Schier argues to the contrary that depiction involves resemblance to the things depicted providing a sophisticated defence of our basic intuitions on the subject Canvassing an attractive theory of generativity rather than resemblance Dr Schier provides a detailed account of depiction showing how it illuminates and resolves many of the enigmas of pictorial representation while remaining true to our basic intuitions on the subject Philosophers psychologists and art theorists will find this a sophisticated and stimulating treatment of one of the central topics in aesthetics

Origins of Pictures Klaus Sachs-Hombach, Jörg R. J. Schirra, 2014-10-29 Anyone talking about pictures by necessity refers to those using pictures It is therefore essentially the competence of using pictures that has to be considered Such competence is not common among higher developed mammals at least as far as we know today This fact raises the question whether and to what extent that ability has to be conceived as a strictly anthropological one In an interdisciplinary approach the first international conference of the Society for Interdisciplinary Image Science GiB titled Origins of Pictures has taken a closer look at the role of pictures for the *conditio humana* The primary goal of the conference was to present empirical findings of the origins of picture uses considering in particular research in paleo anthropology archeology cultural anthropology and developmental psychology Furthermore those findings were to be related to philosophical considerations concerning the conditions of the conceptual formation of picture competence

The Collected Essays and Criticism, Volume 2 Clement Greenberg, 2008-04-09 Clement Greenberg 1909-1994 champion of abstract expressionism and modernism of Pollock, Miró, and Matisse has been esteemed by many as the greatest art critic of the second half of the twentieth century and possibly the greatest art critic of all time. On radio and in print, Greenberg was the voice of the new American painting and a central figure in the postwar cultural history of the United States. Greenberg first established his reputation writing for the *Partisan Review*, which he joined as an editor in 1940. He became art critic for the *Nation* in 1942 and was associate editor of *Commentary* from 1945 until 1957. His seminal essay *Avant Garde and Kitsch* set the terms for the ongoing debate about the relationship of modern high art to popular culture. Though many of his ideas have been challenged, Greenberg has influenced generations of critics, historians, and artists, and he remains influential to this day.
