The Antarktos Cycle Robert M. Price, 2006 Horror and Wonder at the Ends of the Earth Writers are drawn to the unreachable places of the Earth to the greatest mountains and depths of the sea the most barren deserts and to the white frozen deserts surrounding the north and south poles In our minds eyes the beauty and mystery of the ice descends from Poe to the present and into the future an infinite realm of wonder Can Snow Leopards Roar? Amelia Lionheart, 2013-01-10 JOIN THE JEACs J Junior E Environmentalists A And C Conservationists in their fourth incredible

adventure Kinnaird Wildlife Conservation Centre KWCC situated in the Cairngorm mountain range in Scotland had their biggest success with the captive breeding of Panthera uncia. Commonly known as snow leopards, these beautiful creatures are currently on the endangered species list. KWCC staff celebrated this success with their community, but the day after the event, three cubs and their parents were discovered missing. Foul play is suspected. Arriving three weeks after this contemptible incident to spend their Christmas holidays at KWCC, the JEACs are horrified at the news. Naturally, they are determined to catch the felons. Join Rohan, Umedh, Amy, Nimal, Anu, Gina, Mich, and their new Scottish mates as they use their ingenuity to discover the plot and protect the beautiful snow leopards. Professional Paper, 1909 Geological Survey Professional Paper, 1970 **Landslides - Disaster Risk Reduction** Kyoji Sassa, Philippo Canuti, 2008-11-07. This book documents the First World Landslide Forum, which was jointly organized by the International Consortium on Landslides (ICL), eight UN organizations (UNESCO, WMO, FAO, UNISDR, UNU, UNEP, World Bank, UNDP) and four NGOs (International Council for Science, World Federation of Engineering Organizations, Kyoto Univ, and Japan Landslide Society) in Tokyo in 2008. The material consists of four parts: The Open Forum, Progress of IPL Activities, Four Thematic Lectures in the Plenary Symposium, Global Landslide Risk Reduction, Six Keynote Lectures in the Plenary session, and the aims and overviews of eighteen parallel sessions dealing with various aspects necessary for landslide disaster risk reduction, such as observations from space, climate change and slope instability, landslides threatening heritage sites, the economic and social impact of landslides, monitoring, prediction, and early warning, and risk management strategies in urban areas, etc. Thus, it enables the reader to benefit from a wide range of research intended to reduce risk due to landslide disasters as presented in the first global multi-disciplinary meeting. **Planetquake** Umoya Lister, 2014-01-25. This is a geofictione cli-fi where our planet is a key actor. Greenhouse gases lead to natural disasters and the dismal politics of scarcity. Yes, our world is groaning, symbolised by a tsunami hitting the Scottish holy island of Iona. A scientist couple begin an evidence-based protest, but this morphs into a fight against a charismatic African empire builder, even as they face their own private temptations and tragedies. Nobody taught them just how difficult this path would be, nor how much the whole world would become their battleground. **Geographic Uncertainty in Environmental Security** Ashley Morris, Svitlana Kokhan, 2007-09-14. On June 28 through July 1, 2006, a NATO advanced research workshop was held in Kyiv, Ukraine. This meeting of scholars from both NATO and NATO partner countries brought together the leading researchers in the field of Fuzziness and Uncertainty in GIS for Environmental Security and Protection. The papers based upon the presentations at this meeting are included in this book. They were all quite good, some focusing on the use of fuzzy sets in geography, others focusing on explicit environmental concerns in Ukraine. What this book cannot show is the camaraderie and spirit of cooperation that permeated the atmosphere of this workshop. These researchers, many of whom had never met before, are now colleagues and are continuing to collaborate on research to this day and probably beyond. Scholars from various

positions and countries have chosen to work together in the spirit of cooperation to make the ideas presented in this book come to fruition At press time we do not know if Ukraine will become a NATO member or not In any case the editors wish to thank the NATO Science Committee for their funding encouragement and work in making this workshop a reality We hope that the spirit of cooperation and intellectual curiosity that was so lively at the conference will encourage the reader in the perusal of this work

Submarine Mass Movements and Their Consequences D.C. Mosher, Craig Shipp, Lorena Moscardelli, Jason Chaytor, Chris Baxter, Homa Lee, Roger Urgeles, 2009-10-27 Recent global events such as the devastating 1998 Papua New Guinea tsunami the 2004 Sumatran tsunami and the 2006 SE Asia undersea network cable failure underscore the societal and economic effects of submarine mass movements These events call upon the scientific community to understand submarine mass movement processes and consequences to assist in hazard assessment mitigation and planning Additionally submarine mass movements are beginning to be recognized as prevalent in continental margin geologic sections As such they represent a significant if not dominant role in margin sedimentary processes They also represent a potential hazard to hydrocarbon exploration and development but also represent exploration indicators and targets This volume consists of a collection of the latest scientific research by international experts in geological geophysical engineering and environment aspects of submarine mass failures focussed on understanding the full spectrum of challenges presented by submarine mass movements and their consequences
