of the Loom Gail Fowler Mohanty, 2012-11-12 Labor and Laborers of the Loom Mechanization and Handloom Weavers 1780-1840 develops several themes important to understanding the social cultural and economic implications of industrialization. The examination of these issues within a population of extra factory workers distinguishes this study. The volume centers on the rapid growth of handloom weaving in response to the introduction of water powered spinning. This change is viewed from the perspectives of mechanics, technological limitations, characteristics of weaving skills, income, and cost. In the works of Duncan Bythell and Norman Murray, the displacement of British and Scottish hand weavers loomed large, and the silence of American handloom weavers in similar circumstances was deafening. This study reflects the differences between the three cultures by centering not on displacement but on survival. Persistence is closely tied to the gradual nature of technological change. The contrasts between independent commercial artisans and outwork weavers are striking. Displacement occurs but only among artisans devoting their time to independent workshop weaving. Alternatively, outwork weavers adapted to changing markets and survived. The design and development of spinning and weaving devices is stressed, as are the roles of economic conditions, management, organization, size of firms, political implications, and social factors contribute to the impact of technological change on outwork and craft weavers. **Journal of the Textile Institute**, 1912

More&More Marina Zurkow, 2016-01-29 More More is an art and research project that explores the language and mechanics of global trade, container shipping, and the exchange of goods. It questions a mercantile structure that by necessity disallows the presence of the ocean as a real space in order to flatten the world into a Pangaea of capital. The project is presented in two volumes released in conjunction with an exhibition of Marina Zurkow's work with collaborators Sarah Rothberg, Surya Mattu, and others at bitforms gallery in New York City in February 2016. This book, **More More: A Guide to the Harmonized System**, is an experimental brick of a book that intervenes in the Harmonized Commodity Description and Coding System, also known as the HS Code. The HS Code is the internationally accepted standard of product classification which codifies the way nations conduct import/export. All legal trade products and illegal ones that find loopholes are shipped using this system. **More More: A Guide to the Harmonized System** lists the astonishing variety of items that are shipped around the world and includes instructions for using the code to ship items both legally and illegally. It also includes poetic, personal, and scholarly annotations by Stacy Alaimo, Heather Davis, Kathleen Forde, Dylan Gauthier, Elena Glasberg, Calliope Mathios, Steve Mentz, Astrida Neimanis, Chris Piuma, Elspeth Probyn, Sarah Rothberg, Phil Steinberg, Rita Wong, and Marina Zurkow. Its companion book, **More More: The Invisible Oceans**, is a catalog of the exhibition featuring many full color images of the art on display, including video stills, bespoke bathing suits, and fungal sculptures, as well as an introduction by Marina Zurkow and a conversation between Zurkow and international curator Kathleen Forde. **Textile Recorder**, 1918
