Objects Daniel Z. Korman, 2015-11-26 What sorts of material objects are there Many philosophers opt for surprising answers to this question that seem deeply at odds with how we ordinarily think about the material world Some embrace radically eliminative views on which there are far fewer objects than we ordinarily take there to be while others go in for radically permissive views on which there are legions of extraordinary objects that somehow escape our notice despite being highly visible and right before our eyes In this book Daniel Z Korman defends our ordinary intuitive judgments about which objects there are The book responds to a wide variety of arguments that have driven people away from the intuitive view arbitrariness arguments debunking arguments overdetermination arguments arguments from vagueness and material constitution and the problem of the many It also criticizes attempts to show that permissive and eliminative views are despite appearances entirely compatible with our ordinary beliefs and intuitions *The Business of Bobbysoxers* Katie Beisel Hollenbach, 2024-11 Through an examination of World War II era Frank Sinatra fan communities in the United States The Business of Bobbysoxers considers celebrity following fan behavior and popular music culture as a window into the lives of wartime female youth **The Ragged End of Nowhere** Roy Chaney, 2009-11-10 Bodo Hagen thought his family had left Las Vegas for good He had joined the CIA and moved to Berlin while his younger brother had followed in their father s footsteps and joined the French Foreign Legion For a while they were free from the criminal underworld upon which the

Between Logic and the World Bernhard Nickel, 2016-03-25 Between Logic and the World presents a theory of generic sentences and the kind directed modes of thought they express The theory closely integrates compositional semantics with metaphysics to solve the problem that generics pose what do generics mean Generic sentences

are extremely simple yet if there are patterns to be discerned in terms of which are true and which are false these patterns are subtle and complex Ravens are black lions have manes sea turtles are long lived and bishops in chess move along diagonals Statistical measures cannot do justice to the facts but what else is there that at least has a hope of giving us insight into what we are capturing across so many domains Bernhard Nickel argues that generics are the top of a fundamentally explanatory iceberg By focusing on blackness in ravens and manes in lions for instance we can place the kinds into a framework structured by explanatory considerations Between Logic and the World argues that this explanatory framework is deeply intertwined with the semantics of the language we use to express them and in giving its integrated semantic and metaphysical theory of generics it aims to solve old puzzles and draw attention to new phenomena *The Intelligence War against the IRA* Thomas Leahy, 2020-03-26 Thomas Leahy investigates whether informers Special Forces and other British intelligence operations forced the IRA into peace in the 1990s *Documents of the Senate of the State of New York* New York (State).
