Love's Executioner Irvin D. Yalom, 2013-04-04 Love's

Executioner offers us the humane and extraordinary insight of renowned psychiatrist Irvin D Yalom into the lives of ten of his patients and through them into the minds of us all Why was Saul tormented by three unopened letters from Stockholm What made Thelma spend her whole life raking over a long past love affair How did Carlos's macho fantasies help him deal with terminal cancer In this engrossing book Irvin Yalom gives detailed and deeply affecting accounts of his work with these and seven other patients Deep down all of them were suffering from the basic human anxieties isolation fear of death or freedom a sense of the meaninglessness of life that none of us can escape completely And yet as the case histories make touchingly clear it is only by facing such anxieties head on that we can hope to come to terms with them and develop Throughout Dr Yalom remains refreshingly frank about his own errors and prejudices his book provides a rare glimpse into the consulting room of a master therapist Dr Yalom demonstrates once again that in the right hands the stuff of therapy has the interest of the richest and most inventive fiction Eva Hoffman New York Times These remarkably moving and instructive tales of the psychiatric encounter bring the reader into novel territories of the mind and the landscape is truly unforgettable Maggie Scarf Love's Executioner is one of those rare books that suggests both the mystery and the poetry of the psychotherapeutic process The best therapists are at least partly poets With this riveting and beautifully written book Irvin Yalom has joined their ranks Erica Jong Dr Yalom offers a valuable insight into the delicate process of therapy Sunday Telegraph Dr Yalom is unusually honest both with his patients and about himself Anthony Storr Yalom is a gifted storyteller and from the sound of these tales a no less gifted psychotherapist Los Angeles Times

Deductive Logic David S. Clarke, Richard Behling, 1998 Deductive Logic is designed as an intermediate level text directed at upper division students from philosophy and the humanities Its focus is exclusively on deductive logic avoiding altogether topics such as informal reasoning and scientific method normally included in introductory logic courses Its exposition of logical topics is informal with emphasis on explaining the basic concepts and procedures of modern symbolic logic in the simplest and most intuitive manner possible rather than on developing a rigorous formal system and providing proofs of its properties The fact that the text presupposes a course offered to philosophy students and serves to introduce them to logic as the language of philosophy has strongly influenced the selection of topics The topics here are controversial and the problems not easily resolved but this text strives to relate the formal logical structures introduced to issues of philosophic interest
