Utopias and Architecture Nathaniel Coleman, 2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re-invention of what is. Through a detailed and innovative re-assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers, Coleman offers the reader a unique perspective of idealism in architectural design. With unparalleled depth and focus of vision on the work of Le Corbusier, Louis I. Kahn, and Aldo van Eyck, this book persuasively challenges predominant assumptions in current architectural discourse, forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper-modern stance and orthodox modernist architecture.

Dwell, 2009-05 At Dwell we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

Modern Architecture in Mexico City Kathryn E. O'Rourke, 2017-02-10 Mexico City became one of the centers of architectural modernism in the Americas in the first half of the twentieth century. Invigorated by insights drawn from the first published histories of Mexican colonial architecture which suggested that Mexico possessed a distinctive architecture and culture beginning in the 1920s, a new generation of architects created profoundly visual modern buildings intended to convey Mexico's unique cultural character. By midcentury these architects and their students had rewritten the country's architectural history and transformed the capital into a metropolis where new buildings that evoked pre-conquest colonial and International Style architecture coexisted. Through an exploration of schools, a university campus, a government ministry, a workers park, and houses for Diego Rivera and Luis Barragán, Kathryn O'Rourke offers a new interpretation of modern architecture in the Mexican capital, showing close links between design, evolving understandings of national architectural history, folk art, and social reform. This book demonstrates why creating a distinctively Mexican architecture captivated architects whose work was formally dissimilar and how that concern became central to the profession.
