**Lumped Distributed Passive Networks** R.M. Wohlers,     **Lumped and Distributed Passive Networks** M. Ronald Wohlers,2013-10-22 Lumped and Distributed Passive Networks A Generalized and Advanced Viewpoint considers the mathematical study of a subset of passive linear operators This five chapter focuses on the questions of analysis and representation of such operators and illustrates the results of these analyses by obtaining some of the limitations that are imposed on the performance of passive systems The first two chapters deal with the structure of general linear passive operators These chapters specifically look into the theory of distributions called generalized functions The third and fourth chapters illustrate the application of passive operator theory to rational lumped and irrational distributed systems The fifth chapter discusses some applications of optimization theory to the study of networks     *The Electronics Handbook* Jerry C.
