Subcommittee on Department of Defense, 1970 **Marines Under Armor** Kenneth Estes, 2013-04-11 In this story of men machines and missions Kenneth Estes tells how the U S Marine Corps came to acquire the armored fighting vehicle and what it tried to do with it The longtime Marine tank officer and noted military historian offers an insider's view of the Corps's acquisition and use of armored fighting vehicles over the course of several generations a view that illustrates the characteristics of the Corps as a military institution and of the men who have guided its development His book examines the planning acquisition and employment of tanks amphibian tractors and armored cars and explores the ideas that led to the fielding of these weapons systems along with the doctrines and tactics intended for them and their actual use in combat Drawing on archival resources previously untouched by researchers and interviews of both past and serving crewmen Estes presents a unique and unheralded story that is filled with new information and analysis of the armored vehicles their leaders and the men who drove these steel chariots into battle Such authoritative detail and documentation of the decisions to acquire develop and organize armored units in the U S Marine Corps assures the book's acknowledgement as a definitive reference **Breaking The Mold: Tanks In The Cities [Illustrated Edition]** Kendall D. Gott, 2014-08-15 Illustrated with 30 maps Few lessons are as prevalent in military history as is the adage that tanks don't perform well in cities The notion of deliberately committing tanks to urban combat is anathema to most In Breaking the Mold Tanks in the Cities Mr Ken Gott disproves that notion with a timely series of five case studies from World War II to the present war in Iraq This is not a parochial or triumphant study These cases demonstrate that tanks must do more than merely arrive on the battlefield to be successful in urban combat From Aachen in 1944 to Fallujah in 2004 the absolute need for specialized training and the use of combined arms at the lowest tactical levels are two of the most salient lessons that emerge from this study When properly

employed well trained and well supported units led by tanks are decisive in urban combat The reverse is also true Chechen rebels taught the Russian army and the world a brutal lesson in Grozny about what happens when armored units are poorly led poorly trained and cavalierly employed in a city The case studies in this monograph are high intensity battles in conflicts ranging from limited interventions to major combat operations It would be wrong to use them to argue for the use of tanks in every urban situation As the intensity of the operation decreases the second and third order effects of using tanks in cities can begin to outweigh their utility The damage to infrastructure caused by their sheer weight and size is just one example of what can make tanks unsuitable for every mission Even during peace operations however the ability to employ tanks and other heavy armored vehicles quickly can be crucial A study on the utility of tanks in peace operations is warranted and planned Timothy R Reese Colonel Armor *Tactical warfare* United States.
