Analyzing Media James W. Chesebro, Dale A. Bertelsen, 1998-10-01 For the past 25 years critics of communication have focused on the content and form of verbal and nonverbal communication while for the most part neglecting what traditionally has been considered a technical rather than a critical issue the impact of how messages are produced or formatted in the various media Topics such as the sexual and violent content of television and films the meaning of pornography and the persuasive efforts of advertisers largely have been examined with the use of social science methodologies that ignore the behavioral and message generating implications of specific media systems themselves Filling a significant void in the literature this volume eschews the notion of communication technologies as neutral conduits and instead depicts them as active and creative determinants of meaning In doing so it offers an illuminating examination of the dynamic relationships among communication cognition and social organization Providing a framework for the chapters that follow the first section of the book presents a history of human communication from a technological perspective explores the integral role of communication technologies in everyday life and isolates the ways in which criticism can function as an assessment system Three specific technological cultures that define human communication are identified the oral the literate and the electronic The authors identify structural features and discuss the social implications of each They also provide descriptions interpretations and evaluations of these technological cultures and show how criticism changes when the media of transmission is taken into account The book concludes with a cogent discussion of a range of topics surrounding media criticism such as its pedagogical implications how multiple selves can exist in a world of varied communication technologies the integration of communication technologies and how media studies should be incorporated into the disc

Image, Reality and Media Construction Fengmin Yan, 2019-09-24 This book explores how news media construct social issues and events and thereby convey certain perceptions within the scope of framing theory By operationalizing media framing as a process of interpretation through defining problem diagnosing causes making moral judgments and suggesting solutions the book

proposes a systematic and transparent approach to images in news discourse Based on a frame analysis it examines how German news media framed a list of China related issues and events and thereby conveyed particular beliefs and opinions on this country Moreover it investigates whether there were dominant patterns of interpretation and the extent to which diverse views were evident by comparing two major daily newspapers with opposite political orientations the FAZ and the taz Motivated by the relationship between image and reality the book explores image formation and persistence from media construction of meaning and human cognitive complexity in perceiving others Media select certain issues and events and then interpret them from particular perspectives A variety of professional and non professional factors behind news making may result in biased representations In addition from a social psychological perspective inaccurate perceptions of foreign cultures may arise from categorical thinking biased processing of stimulus information intergroup conflicts of interest and in group favoritism Accordingly whether media coverage deviates from reality is not the main concern of this book instead it emphasizes the underlying logics upon which the conclusions and judgments were drawn It therefore contributes to a rational understanding of Western discourse and holds practical implications for both Chinese public diplomacy and a more constructive role of news media in promoting the understanding of others

Wilbur Schramm and Noam Chomsky Meet Harold Innis Robert E. Babe, 2015-04-21 Wilbur Schramm and Noam Chomsky Meet Harold Innis is an original critical in depth analysis of the media and communication thought of Canada s most highly acclaimed scholar Harold Adams Innis Even in Canada however Innis s writings until now have been only partially cited and interpreted Innis is usually stereotyped as being merely an economic historian fixated on previous civilizations whereas in fact he was an astute analyst whose main concerns were with present problems and future trajectories In the United States meanwhile Innis s media and communication writings have been quite neglected and even denigrated Drawing on Innis s less frequently cited work including his long neglected Political Economy in the Modern State Robert Babe opens up Innis s media scholarship as a whole unfolding it in startling critical yet ultimately appreciative ways By comparing Innis s media scholarship with Wilbur Schramm s and Noam Chomsky s moreover Babe tests the claims positions and modes of analysis not only of Innis but also of the other two celebrated scholars as well casting new light on their works and allowing the reader to imagine what sort of discourses might have been possible had the three been in conversation together Wilbur Schramm and Noam Chomsky Meet Harold Innis provides comparative insight into foundational media scholarship in the United States and Canada and explores in some detail the relevance of Innis for twenty first century digitized society

a substantial high tech sector limits on growth environmentally friendly policies and a generally well educated population In New Money Nice Town Leonard Nevarez takes a close look at how new economy firms in quality of life cities interact with local political structures finding that they are both more liberal and more detached than their traditional counterparts This new global economy has created communities whose politics are more democratic but also more tenuous and unstable

Political Behavior Annual, 1989 *Talking Politics* William A. Gamson, 1992-08-28 Those who analyze public opinion have long contended that the average citizen is incapable of recounting consistently even the most rudimentary facts about current politics that the little the average person does know is taken strictly from what the media report with no critical reflection and that the consequence is a polity that is ill prepared for democratic governance And yet social movements comprised by and large of average citizens have been a prominent feature of the American political scene throughout American history and have experienced a resurgence William Gamson asks how is it that so many people become active in movements if they are so uninterested and badly informed about issues The conclusion he reaches in this book is a striking refutation of the common wisdom about the public's inability to reason about politics

Transcultural Realities Virginia H. Milhouse, Molefi Kete Asante, Peter O. Nwosu, 2001-07-24 *Transcultural Realities* is an important collection of essays written by an outstanding cast of critical scholars who discuss the importance of transculture in interdisciplinary contexts The primary goal of the contributors is to help the reader to understand that a state of community or harmony cannot be achieved in the world until we are all ready to accept different cultural forms norms and orientations In this book transculture is defined as a form of culture created not from within separate spheres but in the holistic forms of diverse cultures It is based on the principle that a single culture in and of itself is incomplete and requires interaction and dialogue with other cultures *Transcultural Realities* is divided into five parts Transcultural issues in international and cross cultural contexts Historical and religious struggles within and between nations Socially constructed racial identities and their consequences for transculturalism in the United States The transformative effects of sojourning in diverse cultural environments The fundamentals of transcultural research Editors Virginia H Milhouse Molefi Kete Asante and Peter O Nwosu set out to meet three specific needs First that the book's interdisciplinary approach to theory and practice in cross cultural relations will make it an important book for several fields of study including intercultural and

interpersonal communication international relations human relations psychology anthropology philosophy and sociology
Second that the book will be a reference tool for scholars of transcultural research providing up to date information on cross cultural relations that are transcultural in nature And finally through the use of research is critical to a fuller understanding of cross cultural relations in a transcultural world Southwestern Mass Communication Journal ,1995 **Media-rich, Media-poor** Larry Lester Pearson,1990 Doctoral dissertation examining two media systems one media rich and one media poor the functions of various media in the systems existence and degree of knowledge gaps in each and the influence of individual preference on the gaps as well as the extent to which Alaskan policy makers have been able to determine the function of the media in rural Alaska Into the Future:The Foundations of Library and Information Services in the Post-Industrial Era ,1993 Proceedings of the Annual Meeting American Society for Information Science,1986
