Excerpt from *Elementary Machine Shop Practice* The instructions given in this book should meet the requirements of beginners in general machine shop practice The main object is to reduce as much as possible the time required to bring a student with no previous shop experience to the point where he is able to do some real work The instructions given refer mainly to the cutting of metal since this usually gives the most trouble to beginners Little attempt has been made to describe the mechanism of the different machines because it varies so much with the type and make and is besides easily understood by the average student To obtain the best results with this book the following procedure is suggested In most cases it can be carried out without seriously interfering with the previously established work of the school

- 1 The instructor should give practical demonstrations for the different exercises and actually perform those operations which he considers necessary
- 2 The student should study the instructions given herein during his leisure time before and after the demonstration
- 3 Each student should have a book for use in the shop so that it may be consulted whenever necessary This will help to develop initiative
- 4 A certain amount of time should be allowed to complete the work This should be enough to enable the average student to finish on time

Many thanks are due to H P Miller Jr for his helpful assistance in the preparation of this book and to the following manufacturers for the half tone illustrations Smith any imperfections that remain are intentionally left to preserve the state of such historical works **Examples of**

Machine Shop Practice Howard Parker Fairfield,1908 **Machine Shop Practice** William J. Kaup,2015-06-16 Excerpt from *Machine Shop Practice A Manual for Apprentices and Journeyman Machinists and for Use in Trade Industrial and Technical Schools* In preparing this text the author has endeavored to present the fundamentals of Machine Shop Practice rather than to produce a complete or advanced treatise Above all he has desired to lead the pupil in the shop to think and not merely to do For this reason the why of each step or operation is emphasized quite as much as the how If the apprentice or the trade student can once be imbued with an attitude of thoughtfulness and investigation in connection with his work his future progress toward skill and efficiency may be regarded as assured The material is drawn mainly from mimeographed notes which were tried out for over twelve years in the shops of the School of Science and Technology Pratt Institute With the desire however to meet more closely the needs of the increasing number of secondary technical and industrial schools offering machine shop instruction the original text in which these notes were published has been carefully revised by Mr J A Chamberlain Supervisor of Manual Training in the schools of Washington D C It is believed that the value of the book as a practical manual for apprentices and journeyman machinists has in no respect been lessened in this revision while at the same time the order of treatment and the time demanded for the completion of the work laid down have been brought to a closer agreement with the conditions under which machine work is taught in the secondary school shop About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
