Machinery And Economic Development:

Machinery and Economic Development Martin Fransman,1986-10-24 **Machinery and Economic Development** Martin Fransman,1986-01-01 Used Machinery and Economic Development Dilmus D. James,1974 Monograph on the potential role of second hand equipment in economic development of developing countries covers choice of technology maintenance and equipment cost considerations the evaluation of social costs and benefits of used machinery supply and other aspects of the used machinery market etc Bibliography pp 197 to 206 references and statistical tables **China's Economic Development** Cai Fang,2022-10-20 Cai Fang is one of China s most distinguished economists This book elucidates the worldwide significance of China s economic development over the past 70 years from the perspectives of economic history and growth theory The Chinese economy has undergone an unprecedented period of growth and development since the reform and opening up in the late 1970s a process which the hallmarks of neoclassic economic theory have often proved inadequate to explain Examining the Chinese economy in the light of Chinese history and the development of the world economy as a whole the book charts the milestones and critical reforms of China s economic development providing insights into unique attributes as well as more generic patterns The discussion covers multiple hot topics in the field including the so called Great Divergence dual sector economic development real world experience of the reform and opening up rural reform urbanization economic reform poverty reduction the latter day slowdown of China s economic growth and China s role in and response to globalization global supply domination and other headwinds The book will be a must read for students scholars and general readers interested in the Chinese economy economic development political economy and development economics Machines and Economic Growth Natalie McPherson,1994-10-26 The historical record concerning industrialization since 1770 is consistent with the classical view of economic growth but not with the currently accepted neo classical growth theory Flaws in the logic and empirical short comings of the neo classical theory suggest that it should be rejected Specifically ideas that originate in static concepts cannot be applied to growth a dynamic process Nineteenth century industrialization the world wars and the Depression the post war boom and the more recent slowdown in growth are discussed The Economic Development of Continental Europe 1780-1870 Alan Milward,S. B. Saul,2013-05-13 Upon its initial publication in 1973 this was the first textbook to present a unified view and comprehensive treatment of the economic development of Europe from a continental rather than a British perspective At the same time it is more than mere textbook it is an interpretive analysis of a wide range of research on the subject in many countries which explores the objective validity of earlier theories and provides an ideal starting point for further research into economic development and European history The work deals mainly with Western Europe but in principally studying both France and Germany up to 1870 the authors by no means neglect the smaller countries Indeed the work is unusual in dealing fully with the Scandinavian countries and others such as Switzerland and Belgium This is a reissue of the fully revised and corrected

second edition of the work first published in 1979 **The Economic Development of France and Germany 1815-1914** John Harold Clapham, 1955 The Machinery Question and the Making of Political Economy 1815-1848 Maxine

Berg, 1982-02-04 Dr Berg argues that technical change was one of the foremost theoretical concerns of Ricardo and his successors and the foundation for their distinctly optimistic view of the future She shows how the Machinery Question fostered the social conditions in which the status of Political Economy as a discipline was established and concludes that by the 1840s the divisions over machinery were firmly embedded in the great rival creeds of the future liberalism and socialism

The Economic Development of France and Germany, 1815-1914 Sir John Harold Clapham, 1928 *Encyclopaedia of Economic Development* P. K. Jalan, 2005 **Soviet Economic Development Since 1917** Maurice Dobb, 2012-06-12 This

book follows on from the author's volume *Russian Economic Development* and although it encompasses some of the same material it charts the history and progress of the Soviet economy down to the efforts at reconstruction after The Second World War A new chapter was added which covers the post war decade from the end of the war to the announcement of the Sixth Year Plan *Strategies of Economic Development* Kurt Martin, 1991-06-18 In the aftermath of the debt crisis

disappointment with the results of structural adjustment policies is leading to a reappraisal of theories of economic development and industrialization strategies This book comprises a collection of essays on economic development **The Urban Growth Machine** Andrew E. G. Jonas, David Wilson, 1999-08-12 Harvey Molotch's city as a growth machine thesis is one of the most influential approaches to the analysis of urban politics and local economic development in the United States However the nature and context of urban politics have changed considerably since the growth machine thesis was first proposed more than twenty years ago and recent attempts to apply it to settings outside the U S have revealed conceptual and empirical limitations This book offers a unique critical assessment of the contribution of the growth machine thesis to research in urban political economy Written from an interdisciplinary and international perspective it brings together leading urban studies scholars These contributors explore three organizing themes urban growth discourse and ideology new dimensions of urban politics and the growth machine in comparative perspective These themes not only provide the focus for the critical examinations of the growth machine thesis but also offer exciting new ways of thinking about and researching urban politics and local economic development As Harvey Molotch himself notes in this book's concluding chapter The growth machine idea makes a substantive argument about the empirical substance of U S urban regimes It asserts that virtually every city and state government is a growth machine and long has been It asserts that this puts localities in chronic competition with one another in ways that harm the vast majority of their citizens as well as their environments It anticipates an ideological structure that naturalizes growth goals as a background assumption of civic life In a social science realm where successful empirical generalizations have been few the growth machine idea robustly and usefully describes reality Contributors include Thabit Abu Rass Keith Bassett Mark Boyle Allan Cochrane Kevin R Cox Kyle Crowder Melissa R Gilbert
