Meaning Of Reminiscence And Life Review:

The Meaning of Reminiscence and Life Review Jon Hendricks, 2019-04-04 Robert Butler's call for life reviews has exerted a key influence on the way gerontologists have looked at reminiscence and remembering. Widely thought to be a helpful mechanism for integrating past and future, the process of life review needs better specification and evaluation based on sound research. *The Meaning of Reminiscence and Life Review* brings together both research and application pieces covering the range of possibilities. It examines important controversies and asks: Does it work and what is the evidence? Given their own voice, what do old people say about looking back?

International Perspectives on Reminiscence, Life Review and Life Story Work Faith Gibson, 2018-11-21 This book collates the latest research developments and evidence base for reminiscence, life review and life story work in a single volume. Charting the wide applications for narrative therapeutic methods, the book emphasises the effectiveness of these approaches with varied people from different cultural backgrounds.

Clinical Perspectives on Meaning Pninit Russo-Netzer, Stefan E. Schulenberg, Alexander Batthyany, 2016-12-30 *Clinical Perspectives on Meaning: Positive and Existential Psychotherapy* is an outstanding collection of new contributions that build thoughtfully on the past while at the same time take the uniquely human capacity for meaning making to important new places. From the preface by Carol D. Ryff and Chiara Ruini: This unique theory to practice volume presents far reaching advances in positive and existential therapy with emphasis on meaning making as central to coping and resilience, growth and positive change. Innovative meaning based strategies are presented with clients facing medical and mental health challenges such as spinal cord injury, depression and cancer. Diverse populations and settings are considered including substance abuse, disasters, group therapy and at risk youth. Contributors demonstrate the versatility and effectiveness of meaning making interventions by addressing novel findings in this rapidly growing and promising area. By providing broad international and interdisciplinary perspectives, it enhances empirical findings and offers valuable practical insights. Such a diverse and varied examination of meaning encourages the reader to integrate his or her thoughts from both existential and positive psychology perspectives as well as from clinical and empirical approaches and guides the theoretical convergence to a unique point of understanding and appreciation for the value of meaning and its pursuit. Included in the coverage: The proper aim of therapy: Subjective well being, objective goodness or a meaningful life; Character strengths and mindfulness as core pathways to meaning in life; The significance of meaning to conceptualizations of resilience and posttraumatic growth; Practices of meaning making interventions; A comprehensive matrix; Working with meaning in life in chronic or life

P. Wong,2013-06-19 The first edition of The Human Quest for Meaning was a major publication on the empirical research of meaning in life and its vital role in well being resilience and psychotherapy This new edition continues that quest and seeks to answer the questions what is the meaning of life How do we explain what constitutes meaningful relationships work and living The answers as the eminent scholars and practitioners who contributed to this text find are neither simple nor straightforward While seeking to clarify subjective vs objective meaning in 21 new and 7 revised chapters the authors also address the differences in cultural contexts and identify 8 different sources of meaning as well as at least 6 different stages in the process of the search for meaning They also address different perspectives including positive psychology self determination integrative narrative and relational perspectives to ensure that readers obtain the most thorough information possible Mental health practitioners will find the numerous meaning centered interventions such as the PURE and ABCDE methods highly useful in their own work with facilitating healing and personal growth in their clients The Human Quest for Meaning represents a bold new vision for the future of meaning oriented research and applications No one seeking to truly understand the human condition should be without it

The SAGE Encyclopedia of Abnormal and Clinical Psychology, a 7-volume A-Z work in print and electronic formats, is such an authoritative work. Its more than 1,400 entries provide information on fundamental approaches and theories, various mental health disorders, assessment tools, and psychotherapeutic interventions, and the social, legal, and cultural frameworks that have contributed to debates in abnormal and clinical psychology. Key features include 1,400 signed articles contained in 7 volumes and available in choice of print and/or electronic formats. Although organized A to Z, front matter includes a Reader's Guide grouping related entries thematically. Back matter includes a Chronology, Resource Guide, Bibliography, and detailed Index. Counseling Older Adults John Blando, 2014-04-08. Counseling Older Adults provides an introduction to gerontological counseling, covering theories of aging and their practical application in counseling work with older adults.

Counseling the Contemporary Woman Suzanne Degges-White, Marcela Kopic, Wendy Killam, 2020-05-22. This book provides a comprehensive exploration of the challenges women may face as they navigate the multiple roles that they carry. Attention is given to the unique cultural identities that women embody, and suggestions are provided to help counselors acknowledge the various aspects of each client's intersectional identity. In addition to theory, we provide suggestions for practical application of relevant interventions and strategies for helping women achieve their goals. A foundation is provided that explores the multiple layers of development that occur during adolescence, adulthood, midlife, and older adulthood. Women face numerous challenges related to identity development and relationships. These challenges can generate psychological and emotional distress that lead women to seek professional assistance in finding solutions to their issues. With more choices than in generations past, women can face unexpected and unanticipated challenges and barriers to their individual and relational development. This book is organized around contemporary developmental and relational rites of passage women experience in adulthood. Traditional rites of passage include birth, menarche, marriage, and death. These events still hold significance, but women's lives today follow expanded and complex trajectories. Numerous transitions, such as attending college, navigating

employment opportunities and the relational challenges that women face in various areas of life are presented and addressed in this book from a clinician's perspective providing practitioners with insight and practical knowledge. In this book we cover choices related to such topics as career relationships, parenthood and support networks. We also explore the struggles that women face including abuse, depression, anxiety, feelings of low self-worth, loss, and addictions. Best practices in counseling women are highlighted and utilized in case study examples. The relationships created by women impact their lives and this book helps the reader to gain insight into how women can take ownership for their relationships and choices. **Inpatient**

Geriatric Psychiatry Howard H. Fenn, Ana Hategan, James A. Bourgeois, 2019-06-07 This book offers mental health guidelines for all medical professionals facing the emerging challenges presented by an aging population worldwide. The text acknowledges that as the geriatric demographic grows, limited resources and infrastructures demand quality protocols to deliver inpatient geriatric psychiatric care and that many physicians may not be trained to address these specific needs. This text fills this gap with guidelines assessing, diagnosing, and treating aging patients as they present in the emergency room and other settings. Unlike any other text, this book focuses on how to optimize the use of the inpatient setting by recommending evaluations and treatments and offering flow charts and figures of key points to guide both general workup and continued evaluation and treatment. This approach aims to minimize instances of premature release or readmissions and to improve outcomes. Chapters cover the various issues that clinicians face when working with an older patient, including legal topics, limitations to treatment, prescription-related complications, patients struggling with substance abuse, and various behavioral concerns. Written by experts in the field, the text takes a multidisciplinary approach to deliver high-quality care as needs of the aging population evolve. **Inpatient Geriatric Psychiatry** is a vital resource for all clinicians working with an aging population, including geriatricians, psychiatrists, neurologists, primary care providers, hospitalists, psychologists, neuropsychologists, emergency room and geriatric nurses, social workers, and trainees. **Global Perspectives on Health**

Assessments for an Aging Population Ribeiro, Luis Vieira, Ribeiro, Anabela Magalhães, 2023-04-03 Today's society recognizes that the last decades of an individual's life are usually those in which health tends to deteriorate and chronic pathologies increase. Action at this level is verified through the increased concern of government officials with the elderly population motivated by the socio-economic impact of costs associated with the provision of healthcare in this group. **Global Perspectives on Health Assessments for an Aging Population** provides relevant theoretical frameworks and the latest empirical research findings in the area of health assessments for an aging population. Covering topics such as ambulatory wellbeing, gerontology, and neuropsychological assessment, this premier reference source is a valuable resource for gerontological healthcare professionals, gerontological social workers, psychologists, students, and educators of higher education, researchers, and academicians.
