Mechanization Of Agriculture In Brazil:

Mechanization of Agriculture in Brazil ... Minas Gerais Harold M. Clements, 1969 **The Mechanization of Agriculture in Brazil** Harold M. Clements, 1969 Brazilian Agricultural Development, 1890-1950 Earl Richard Downes, 2025-02-08 This book provides a comprehensive history of Brazilian agricultural economic development between 1890 and 1950. It details the US agricultural education that made an impact on Brazil and how this translated into private capital in the US. The book highlights the shifting priorities of Brazil's regional elites during the First Republic and takes readers through its downfall in 1930. Chapters cover how US educators implanted the philosophy and practices of US agricultural education at the nation's three most prominent university-level institutes of agronomist education. The history also documents the activist role played by the United States in the agricultural development of Brazil during an early part of the century which was before the US was a world leader economically. Earl Richard Downes provides detailed documentation of the creation of the major agricultural education institutions in Brazil and their initial contributions to Brazil's agricultural development. He also provides insight into the Brazilian federal government reaction to international crises with opportunities for profit through increased production for external markets. The resulting book breaks down the specific social and economic history that led to heightened economic development in a developing nation. Mechanization and Employment in Brazilian Agriculture, 1950-71 J.H. Sanders Junior, 1973 The agricultural mechanization decision in many developing countries is complicated by the existence of a large agricultural population, high rural-urban migration rates since the Second World War, and a capital-intensive industrialization process. All of these factors reduce the ability of the non-agricultural sector to absorb labor. Moreover, many developing countries may have affected mechanization decisions in agriculture by their intervention in factor and product markets. Brazil is an ideal country to examine the determinants and effects of agricultural mechanization. Brazilian mechanization has occurred at an extremely rapid rate in the post-war period, and Brazil has actively intervened in its factor markets. The major results of the thesis are: 1. Timeseries analysis indicated that subsidized financing was the statistically most significant variable determining investment in tractors, and its effect swamped the relative price variables. This financing of the Bank of Brazil was provided at negative real interest rates. 2. The elasticity of substitution between labor and tractors was statistically significant and greater than one in most cases; hence shifts in relative factor prices have had large effects upon factor proportions. The factor proportions choice between tractors and labor was statistically associated with agricultural wages, the level of biochemical expenditures per hectare, the crop mix, and the distribution of crop-farm size. Concentrations of crop area on large farms increased. *Agricultural Development in Brazil* Antonio M. Buainain, Rodrigo Lanna, Zander Navarro, 2019-05-20 In the last few decades, Brazilian agriculture has experienced a seismic transformation, and its contradictory facets have fed different and opposing narratives regarding recent changes. This book covers these changes, exploring the issues from several empirical and analytical angles, including

the role of agriculture in the contemporary Brazilian economy the dynamics of Brazilian agricultural value chains environmental challenges and the processes of social differentiation Brazilian agriculture continues to be viewed in the international literature either through the lenses of the past century those of former problems relating to land use and land tenure or apologetically This collection of essays aims at updating the current interpretations providing objective accounting of the main transformations its determinants results contradictions and limitations As it covers the most relevant traits of Brazilian agricultural and rural development the book will provide the reader with an encompassing view of contemporary Brazilian agriculture including the positive and negative sides of the so called tropical agriculture revolution It highlights the tremendous economic potential as well as the continuing structural heterogeneity concentration of production and marginalization of millions of small farmers Written in an engaging and accessible style this book will be perfect for all those interested in learning about Brazilian agriculture It will be of particular interest to undergraduate and graduate students of economic development agricultural economics rural sociology comparative economic development rural development and agricultural policies Brazil, a Survey of U.S. Export Opportunities United States.
