**Nature in Greek Poetry** George Soutar, 1971      Nature in Greek Poetry George Soutar, 2006-11 Originally published in 1913 Author Henri Lichtenberger Language English Keywords History Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive Obscure Press are republishing these classic works in affordable high quality modern editions using the original text and artwork Keywords English Keywords 1900s Language English Artwork      *Nature in Greek Poetry, Studies Partly Comparative, by George Soutar, ...* George Soutar, 1939      Nature in Greek Poetry, Studies Partly Comparative George Soutar, 1971      **Nature, Ethics and Gender in German Romanticism and Idealism** Alison Stone, 2018-10-25 This book provides an account of the development of ideas about nature from the Early German Romantics into the philosophies of nature of Schelling and Hegel In clear and accessible language Alison Stone explains how the project of philosophy of nature took shape and made sense in the post Kantian context She also shows how ideas of nature were central to the philosophical and literary projects of the Early German Romantics with attention to Friedrich Schlegel Novalis and Holderlin Stone advances a distinctive original perspective on Romantic and Idealist accounts of nature and their ethical implications regarding human nature relations and intra human political relations especially but not only around gender and race The book demonstrates how these approaches to nature have contemporary relevance to a range of current debates such as those over naturalism the environmental crisis and the politics of gender race and colonialism      **Classics in Translation** Paul Lachlan MacKendrick, Herbert Marshall Howe, 1952 Annotation Here translated into modern idiom are many works of the authors whose ideas have constituted the mainstream of classical thought This volume of new translations was born of necessity to answer the needs of a course in Greek and Roman culture offered by the Department of Integrated Liberal Studies at the University of Wisconsin Since its original publication in 1952 Classics in Translation has been adopted by many different academic institutions to fill similar needs of their undergraduate students This new printing is further evidence of this collection's general acceptance by teachers students and the reviewing critics      The interpretation of nature in English poetry from Beowulf to Shakespeare Frederic William Moorman, 2018-02-05 No detailed description available for The interpretation of nature in English poetry from Beowulf to Shakespeare      **Nature-study; Or, The Art of Attaining Those Excellencies in Poetry and Eloquence which are Mainly Dependent on the Manifold Influences of Universal Nature** Henry Dircks, 1869      *Nature* Peter Coates, 2013-04-26 Nature is a deceptively simple and ahistorical term suggesting intrinsic unchanging reality Yet nature has a history too both in terms of human attitudes and human impacts Coates outlines the major understandings of nature in the western world since classical times from nature as higher authority to its more recent meaning of threatened physical space and life forms Unlike many others this book places the history of attitudes to nature within the story of human induced changes in the material environment And few others take a supranational perspective or cross the divides between historical

eras A distinctive unifying theme is Coates's interest in how green writers over the last thirty years have interpreted our past dealings with nature specifically their efforts to diagnose the roots of contemporary ecological problems and their search for ancestors He concludes with a discussion of the future of nature in the context of developments such as the new ecology global warming advances in genetic engineering and research on animal behaviour Assuming no previous knowledge Nature provides the reader with an accessible synthesis and introduction to some of environmental history's central features and debates confirming its status as one of the most enthralling current pursuits within historical studies This will be essential reading for second year undergraduates and above in cultural history and environmental history as well as to the general reader interested in environmental issues

**The Language of Natural Description in Eighteenth-Century Poetry** John Arthos, 2020-01-08 Originally published in 1949 this title was written in order to help establish a better understanding of the stock diction of eighteenth century English poetry and in particular of the diction commonly used in the description of nature The language characteristic of so much of the poetry of this period had been severely criticized for a long time But in the twenty or thirty years prior to publication some effort had been made to review the subject and the problem However several questions still remained unanswered and more exhaustive analysis needed to be undertaken This volume was an effort to provide answers for some of these questions and to begin the analysis that was required
