P 47 Thunderbolt:

P-47 Thunderbolt at War Cory Graff, **The P-47 Thunderbolt** Len Morgan, 1963 **Thunderbolt** Dan Patterson, Paul Perkins, 2004 Thunderbolt **P-47 Thunderbolt vs German Flak Defenses** Jonathan Bernstein, 2021-10-28 Since the end of World War 2 the tactical air war over Europe has been largely overlooked by historians and authors alike in favour of analysis of the higher profile strategic bombing campaign Involving just as many aircraft as the daylight heavy bombing campaign the fighter bombers principally of the Ninth Air Force wreaked considerably more havoc on German ground forces Indeed Thunderbolt units undertaking such missions effectively complemented the strategic campaign ensuring the defeat of Nazi Germany P 47 pilots paid a high price to achieve this victory however as the German flak arm was well equipped nearly a quarter of all war related production was devoted to anti aircraft weaponry with weapons of various calibres to counter tactical air power s low to medium altitude threat The USAAF four numbered air forces that saw action over the European continent suffered significant fighter bomber losses to flak The principle fighter bomber from the summer of 1944 through to VE Day was the P 47D with both dedicated ground attack units and squadrons that had completed their bomber escort tasking seeking out targets of opportunity across occupied Western Europe While heavy calibre anti aircraft fire was intended to both shoot down enemy aircraft and force bombers to drop their ordnance sooner or from higher altitudes thus reducing bombing accuracy low altitude flak batteries put up a virtual wall of steel for enemy fighter bombers to fly through Damaging a low flying fighter bomber made it easier for other flak gunners to track engage and destroy it Innovations like lead computing gunsights gave gunners a higher probability of intercepting low altitude fighters Conversely the appearance of air to ground rockets beneath the wings of P 47s gave pilots better standoff range and a harder hitting punch when dealing with low and medium altitude flak units This volume analyses the tactics and techniques used by both P 47 fighter bomber pilots and German flak gunners featuring full colour illustrations to examine the Allied tactical air power in Europe from 1943 and how German defences were overpowered by the air threat **P-47 Thunderbolt Pilot's Flight Operating Manual** Periscope Film Com, 2006-06-12 Known as the Jug because of its fuselage shape the Republic P 47 Thunderbolt flew in every theatre of WWII except Alaska Nearly 13 000 were built by war s end The large aircraft carrier eight Browning machine guns and up to 2 000 lbs of bombs or rockets and proved an effective fighter and bomber The radial Pratt and Whitney powerplant put out over 2500 h p and propelled the P 47 at a maximum speed of 426 mph at 30 000 feet Originally published by the U S Army Air Force this handbook taught pilots everything they needed to know before entering the cockpit This affordable facsimile of a real WWII manual has been reformatted Care has been taken to preserve the integrity of the text **Republic P-47 Thunderbolt** Mantelli - Brown - Kittel - Graf, 2015 The Republic P 47 Thunderbolt nicknamed Jug was an American fighter bomber used during the Second World War Because of its more than seven tons of weight and of considerable size is considered the single engine car largest and heaviest ever built before and during the conflict It was

equipped with an extremely powerful engine 2 000 HP or more and it was fast especially at high altitudes It was also heavily armed with eight 12.7 mm machine guns and its robustness allow him to return to base even if very damaged Since the early months of 1943 was used intensively on all fronts contributing significantly to consolidate the supremacy ally in the last two years of war It was built at a total of 15 678 copies at a cost of 83 000 each of the time with winning colors USAAF the remarkable total of 3 752 victories in combat against the loss of 824 machines and after the war he served in the air forces of fifteen countries including Italy

Thunderbolt Ernest R. McDowell, Don Greer, 1999 **Republic P-47 Thunderbolt** Maciej Noszczak, 2019-04-19 Before the P 47 Thunderbolt gained a bubble top fairing these fighters had slightly different some claim to be more racial figure In the first versions the plane had a typical canopy built into the fuselage which resulted in a slightly hunched line The first copies of the P 47B underwent a series of tests at the turn of 1941 and 1942 Initially they were not very promising One of the planes was lost because of the tail tearing off during the dive In addition at heights above 9144 m the flaps froze it was impossible to open the cabin hood and the forces on the rudders were very big At high speeds the paint covering the elevators fell off and the aerodynamic pressure inflated their sheath they were covered with canvas causing dangerous tail vibrations To remedy these problems metal sheathing was introduced elevators shape was changed and weight flaps were added The propulsion of the P 47B version was a 2000 HP R 2800 21 engine The time to reach the ceiling of 4572 m was 6.7 minutes The aircraft developed a speed of 690 km/h at an altitude of 8230 m in horizontal flight which was a great result

P-47 Thunderbolt Units of the Twelfth Air Force Jonathan Bernstein, 2012-08-20 The P 47 Thunderbolt originally designed as a high altitude interceptor became the principal US fighter bomber of World War II First adapted to the ground attack role by units of the Twelfth Air Force in early 1944 the strength and durability of the P 47 airframe along with its massive size earned it the nickname Juggernaut which was quickly shortened to Jug throughout the MTO and ETO By October 1943 with the creation of the Fifteenth Air Force nearly half of the Twelfth's fighter groups would be retasked with strategic escort missions leaving six groups to perform close air support and interdiction missions throughout the entire Mediterranean theatre The groups inflicted incredible damage on the enemy's transport routes in particular using rockets bombs napalm and machine gun rounds to down bridges blow up tunnels and strafe trains Myriad first hand accounts and period photography reveal the spectacular success enjoyed by the Thunderbolt in the MTO in the final year of the war
