Allahar,2011-01-15 What happens to the liberal arts and science education when universities attempt to sell it as a form of job training In Lowering Higher Education a follow up to their provocative 2007 book Ivory Tower Blues James E C t and Anton L Allahar explore the subverted idea of the university and the forces that have set adrift the mission of these institutions C t and Allahar connect the corporatization

of universities to a range of contentious issues within higher education from lowered standards and inflated grades to the overall decline of Humanities Social Sciences and Natural Sciences instruction Lowering Higher Education points to a fundamental disconnect between policymakers who may rarely set foot in contemporary classrooms and the teachers who must implement their educational policies which the authors argue are poorly informed on a daily basis C t and Allahar expose stakeholder misconceptions surrounding the current culture of academic disengagement and supposed power of new technologies to motivate students While outlining what makes the status quo dysfunctional Lowering Higher Education also offers recommendations that have the potential to reinvigorate liberal education     History of Universities Mordechai Feingold,2004-04-08 Volume XIX 1 of History of Universities contains the customary mix of learned articles book reviews conference reports and bibliographical information which makes this publication such an indispensable tool for the historian of higher education Its contributions range widely geographically chronologically and in subject matter The volume is as always a lively combination of original research and invaluable reference material     Canadian Who's Who 2008 Elizabeth Lumley,2008-01-05 Now in its ninety eighth year of publication this standard Canadian reference source contains the most comprehensive and authoritative biographical information on notable living Canadians Those listed are carefully selected because of the positions they hold in Canadian society or because of the contribution they have made to life in Canada The volume is updated annually to ensure accuracy and 600 new entries are added each year to keep current with developing trends and issues in Canadian society Included are outstanding Canadians from all walks of life politics media academia business sports and the arts from every area of human activity Each entry details birth date and place education family career history memberships creative works honours and awards and full addresses Indispensable to researchers students media business government and schools Canadian Who's Who is an invaluable source of general knowledge The complete text of Canadian Who's Who is also available on CD ROM in a comprehensively indexed and fully searchable format Search astronaut or entrepreneur of the year aboriginal achievement award and Order of Canada and discover a wealth of information Fast easy and more accessible than ever the Canadian Who's Who on CD ROM is an essential addition to your electronic library     *Counting Out The Scholars* William Bruneau,Donald C. Savage,Canadian Association of University Teachers,2002-03-07 Canada's universities have lost their autonomy Under the guise of accountability reformers from government and large corporations have undermined the original purposes of these institutions insisting that they operate according to a business model The chief tool used to effect this change is the performance indicator a method of evaluation and ranking well suited to measuring sales per square foot for example but useless in assessing qualities such as critical thinking creativity and wisdom Evaluating use of performance indicators in Canada the United States United Kingdom and New Zealand the authors challenge readers to look beyond this narrow business based measure of value and to consider more creative and effective methods of evaluation Counting Out the Scholars is a penetrating analysis of current methods of

performance evaluation in the university one that offers alternatives to the prevailing orthodoxy     *Canadian Books in Print*  
,2003     **The Third Awokening** Eric Kaufmann,2024-05-14 We in the West are in the third wave of cultural left ideological enthusiasm Each Awokening has crested fallen a little consolidated then surged again to reach a higher level The cumulative result is an elite creed which has produced a crime wave a worsening education system chaos at the border and social division Fired by a cultural socialism that puts equal results and emotional protection for minorities at the center of their moral universe today s young people are twice as intolerant of conservative speech as older generations These young people will be the median voters and employees of tomorrow leading and controlling the country Woke cultural socialism is not the classical liberalism of the American Constitution but a modern majorities bad minorities good Left liberalism It is powered by a set of liberal emotional attachments rather than liberal principles These underpin a moral panic about whites and males combined with a starry eyed patronizing approach to minorities Today s woke extremism is not a repudiation of liberalism but a perverse extension of it Our only way out is to use elected constitutional government power to break the grip of wokeness in our institutions and schools steering them toward neutrality and classical liberalism To do so the conservative and moderate majority must place culture front and center and spare no effort to win the battle of ideas Nothing less than the future of our civilization depends on it     *Values in Conflict* Paul Axelrod,2002 Values in Conflict is a clarion call to policy makers business leaders and the public at large to rethink the current direction of the contemporary university Paul Axelrod demonstrates that liberal education the core of higher learning is threatened by the constricting pressures of the marketplace and shows how political and economic pressures are redefining higher learning Axelrod demonstrates how in the race for riches symbolised by endless rhetoric about the need for Canada to become globally competitive technologically advanced and proficient at churning out knowledge workers our schools and universities are being forced by government policy to narrow their educational vistas The decision making autonomy that universities must have to provide cultural intellectual community service and training functions is being eroded Values in Conflict explains why this is happening and why it matters     **The Pursuit of Division** Martin Loney,1998 The topic of equity policies and identity politics in Canada is at the forefront of public and media discussion and Martin Loney adds fuel to the fire In The Pursuit of Division he provides a provocative critique of recent government policies with respect to race gender and preferential hiring exposing the suspect methods of so called progressive thinkers in their pursuit of the politics of difference     *Canadian Books in Print. Author and Title Index* ,1975     Scientific Values and Civic Virtues Noretta Koertge,2005-08-04 This volume of contributed essays a follow up to Noretta Koertge s successful book on the science wars A House Built on Sand takes an affirming positive view of the relationship between the values embodied in science and the nature of a civil society It argues that recent attacks on the probity of science undermine the possibility of rational discourse in the political arena While science has traditionally been viewed as incorporating intellectual virtues like honesty and precision of language the contributors to this volume point to

additional benefits examining the idea that science can serve as a source of and inspiration for civic virtues in the need to be well informed about the way the world works in tolerating the viewpoints of others and in functioning as a fully global enterprise dedicated to the public good The contributors who include philosophers political scientists physicists biologists and engineers look at examples of scientific virtues in action and how they might be used as inspirations and practical resources for improving civic society The volume will appeal to a similarly broad audience interested in the relationship between science and society    **Canada and the United States** David Martin Thomas,2000 Deeply substantive thoughtful up to date and lively For anyone wanting to understand the differences and similarities between these two countries and the reasons behind them this is the place to start Kent Weaver Senior Fellow in Governance Studies The Brookings Institution

Resources in Education ,1998    **Virtual Sovereignty** Robert Anthony Wright,2004 September 11th resurrected an historic sovereignty debate one that burst into full flame when Canadians led by Prime Minister Jean Chrétien made the unprecedented decision not to fight alongside their American allies in Iraq This book explores the relationship between modern Canadian nationalism cultural policy popular discourse and the lives of ordinary Canadians Dr Robert Wright argues that Canadians understanding of art culture unity identity and sovereignty are formed by conflicting forces out of conditions of contradiction paradox and irony Canadians have developed remarkably sophisticated cultural and political strategies for deriving pleasure prosperity and peace of mind Living with contradiction has always been a fact of Canadian life paradox of tolerance has been the critical framework that has made this living not only possible but the envy of the world    **Canadian**
