Petroleum Migration:

Petroleum Geology R.E. Chapman, 2000-04-01 **Petroleum Geology** William A. England, A. J. Fleet, 1991 This title follows petroleum from its generation in source rocks through migration to the reservoir or the surface Part 1 deals with both the generation of petroleum by the thermal breakdown of kerogen and the expulsion of the petroleum from the source rock Part 2 considers secondary migration Part 3 contains case studies which show how understanding of generation expulsion and secondary migration can be used to explain the distribution of oil and gas in a basin Part 4 examines leakage from accumulations

Petroleum and Basin Evolution Dietrich H. Welte, Brian Horsfield, Donald R. Baker, 2012-12-06 This book has been prepared by the collaborative effort of two somewhat separate technical groups the researchers at the Institute for Petroleum and Organic Geochemistry Forschungszentrum Jilich KFA and the technical staff of Integrated Exploration Systems IES One of us Donald R Baker from Rice University Houston has spent so much time at KFA as a guest scientist and researcher that it is most appropriate for him to contribute to the book During its more than 20 year history the KFA group has made numerous and significant contributions to the understanding of petroleum evolution The KFA researchers have emphasized both the field and laboratory approaches to such important problems as source rock recognition and evaluation oil and gas generation maturation of organic matter expulsion and migration of hydrocarbons and crude oil composition and alteration IES Jilich has been a leader in the development and application of numerical simulation basin modeling procedures The cooperation between the two groups has resulted in a very fruitful synergy effect both in the development of modeling software and in its application The purpose of the present volume developed out of the 1994 publication by the American Association of Petroleum Geologists of a collection of individually authored papers entitled The Petroleum System From Source to Trap edited by L B Magoon and W G Dow
