## **Petronas Towers The Architecture Of High Construction:**

**Petronas Twin Towers** Cesar Pelli, Michael J. Crosbie, 2001-03-23 In a world with Jumbo jets, microchips and artificial hearts, architecture had appeared to have lost its wonder, but with the building of the Petronas Towers in Kuala Lumpur, now the tallest buildings on earth, this has changed and their construction has rightly restored architecture as a world wonder. It is not just because the towers are the tallest that they can make this claim. Their design by Cesar Pelli also reflects a melding of East and West. The towers embody the great spirit born of the American mid West and now found all over the world. They also reflect the latest technology in making tall buildings with modern materials such as stainless steel cladding, which makes their spires glisten on the horizon. The design of the Petronas Towers began with an international design competition. In June 1991, eight firms were invited to participate. The architects were asked to provide a general plan for the Kuala Lumpur City Centre and a more detailed design for two towers to be occupied by Petronas, the national petroleum company of Malaysia. The Petronas Towers were expected to define a gateway, a place that people can identify as unique to Kuala Lumpur and Malaysia. It was never discussed that the towers should become the tallest buildings in the world, only that they be beautiful.

*Architecture and Urban Form in Kuala Lumpur* Yat Ming Loo, 2016-04-08 Kuala Lumpur, the capital city of Malaysia, is a former colony of the British Empire which today prides itself in being a multicultural society par excellence. However, the Islamisation of the urban landscape, which is at the core of Malaysia's decolonisation projects, has marginalised the Chinese urban spaces which were once at the heart of Kuala Lumpur. Engaging with complex colonial and postcolonial aspects of the city from the British colonial era in the 1880s to the modernisation period in the 1990s, this book demonstrates how Kuala Lumpur's urban landscape is overwritten by a racial agenda through the promotion of Malaysian Architecture, including the world-famous mega projects of the Petronas Twin Towers and the new administrative capital of Putrajaya. Drawing on a wide range of Chinese community archives, interviews and resources, the book illustrates how Kuala Lumpur's Chinese spaces have been subjugated. This includes original case studies showing how the Chinese re-appropriated the Kuala Lumpur old city centre of Chinatown and Chinese cemeteries as a way of contesting state's hegemonic national identity and ideology. This book is arguably the first academic book to examine the relationship of Malaysia's large Chinese minority with the politics of architecture and urbanism in Kuala Lumpur. It is also one of the few academic books to situate the Chinese diaspora spaces at the centre of the construction of city and nation. By including the spatial contestation of those from the margins and their resistance against the state ideology, this book proposes a recuperative urban and architectural history seeking to revalidate the marginalised spaces of minority community and re-script them into the narrative of the postcolonial nation-state.

There is also a mixture of religions, with Islam predominating among the Malays and others, Hinduism and Sikhism among the Indians, mainly Daoism and Confucianism among the Chinese, but also some Christians as well as older indigenous beliefs in certain places. This second edition of *Historical Dictionary of Malaysia* contains a chronology, an introduction, appendixes and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on important personalities, politics, economy, foreign relations, religion and culture.
