Adjudication in Construction Law

Darryl Royce, 2022-01-20 This book collects all the relevant material regarding the process of adjudication in construction. It provides clarity for those involved in the adjudication process or related proceedings with detailed and reliable analysis of them supported by statutory provisions and judicial observations. Adjudication in Construction Law discusses the role of true value adjudications following 'smash and grab' decisions on the basis of the absence of a pay less notice, the restraint of adjudication by injunction, hybrid contracts dealing with both construction operations and other operations, and timing and content of payment notices and pay less notices. Additionally, this book includes a summary of the different procedures adopted in other jurisdictions as well as an explanation of the payment procedures under the statutory framework. It also goes on to append all the relevant statutory material, contractual adjudication procedures and forms. A new feature of this edition is a detailed analysis and discussion of the development and of the rules relating to the acceptability of a wrong answer provided that the right question has been dealt with, only one dispute being susceptible to adjudication and the necessity or otherwise of a dispute arising under the construction contract. A clear and comprehensive aid, this book is an essential read for lawyers or construction professionals involved in adjudication.

Construction Procurement

Brian Greenhalgh, Graham Squires, Abdul-Majeed Mahamadu, 2021-12-30 This book is an easy-to-read introduction to the principles and methods of building procurement and is aimed at first-year students or non-cognate graduates starting out on a career in construction, property, quantity surveying and construction management. The book starts with a brief introduction to the construction industry, including how the industry is organised into contractors, consultants and clients. After a discussion of the historical development of procurement methods, which show a steady shift of risk and responsibility towards the supply side, contractors' various roles and responsibilities, which must be carried out in any project, are discussed in detail. The aim is to show the reader that procurement routes are effectively a permutation of these responsibilities between the various parties. The book then explains the various methods by which the contractor is paid, either by pre-negotiated lump sums or by some form of cost reimbursement. Variants of these two systems are also discussed. Several chapters are given to the detailed discussion of the main procurement routes, together with the appropriate standard forms of contract designed for that route. More modern developments such as Private Financing and PPP are discussed, and a chapter covering emerging trends in procurement completes the book. Containing discussion points, chapter summaries and case studies, this book is ideal for use in a variety of degree programs and courses across the built environment and engineering.

Code of Practice for Project Management for Construction and Development Chartered Institute of Building, 2010-01-19 In 1991 the Chartered Institute of Building initiated a multi-institute task force and a Code of Practice for Project Management for Construction and Development was published in 1992 with second and third editions in 1996 and 2002.
