This volume explores Husserl's theory of sensibility and his conceptualization of spatial and temporal constitution. The author maps the linkages between Husserl's transcendental aesthetic, the theory of pure experience in empirio-criticism, as well as Immanuel Kant's transcendental philosophy. The core argument in this analysis centers on the relationship between spatiality and temporality in Husserl's philosophy. The study interrogates Husserl's understanding of the relationship between spatiality and temporality in terms of stratifications, analogies, and parallelisms. It incorporates a discussion of the potentialities and limitations of such an understanding. It concludes that such limits can be overcome by adopting an understanding of spatiality and temporality as interwoven moments of sensible experience, a spatio-temporal intertwining. This intertwining is made explicit in a thorough inquiry into three central topics in the phenomenological analysis of sensible experience: spatio-temporal individuation, perspectival givenness, and bodily experience. The book shows how such an inquiry can form the bedrock of a dynamic and relational understanding of experience as a whole. **Phantom's World** Frew,

The Internet Felix von Keudell, 2009 **The Forbidden Archives** Shade Raven, 2025-03-18 What If Everything You Knew About History Was a Lie? Beneath the surface of the history you were taught lies a world of secrets, shocking, chilling, and deliberately erased from the pages of time. The Forbidden Archives unlocks the hidden corridors of history, exposing the darkest cover-ups, the most mind-blowing conspiracies, and the forbidden truths buried by those in power. Inside this book, you will discover the horrific war crimes and massacres the world was meant to forget. Lost civilizations and ancient technologies that defy logic. Stansfeld, 2022-01-30 Japanese Carriers and Victory in the Pacific focuses on the pre war debate between building a new generation of super battleships or adopting aircraft carriers as the capital ships of the future An Asian power in particular sees carriers as a way of challenging the USA and the colonial empires initially losing the contest yet coming out all right in the Cold War aftermath Martin Stansfeld examines the much overlooked genesis of Japan's so called shadow fleet that was a secret attempt to bring about parity with the US in carriers albeit only with slower speed conversions of liners and auxiliaries but along with the super battleships cluttered launch facilities when these could have been devoted to keel up fast fleet carrier production This first analytical look at what major launch facilities were available in Japan shows that the Imperial Japanese Navy could have doubled its fast carrier fleet thereby able to give sufficient air cover for an invasion of Hawaii rather than just the raid on Pearl Harbor but only providing nobody noticed they were building all these carriers This is shown to have been entirely possible given the IJN's extraordinary success at covering up their super battleship and shadow fleet production This secret fast carrier fleet program is given the name phantom fleet by Stansfeld who proceeds to demonstrate how the strategy of the Pacific War would have been transformed Weaving through the chapters is an exotic cast of characters led most notably by Admiral Isoroku Yamamoto the conceiver of Pearl Harbor and a figure of mythic status to Japanese today and famous around the world thanks to the movies Stansfeld dwells on the ironies of war notably how without the day that will live in infamy America might never have become the worldwide super power it is today
