# Phantom Of The Poles

**William REED (Geographical Writer.)**

## **Phantom Of The Poles:**

*The Phantom of the Poles* William Reed, 1995-11 1906 Much in demand by students of the theory that the earth is hollow and those interested in caves and flying saucers Contents Flattening of the Earth at the Poles Length of Polar Nights Working of the Compass Around the Curve Mysteries of **Phantom of the Poles** Reed William, 1901 **The Phantom of the Poles (Classic Reprint)** William Reed, 2017-09-12 Excerpt from *The Phantom of the Poles* To conclude that an Opinion is worthless because it is not expressed in the best form is a great mistake To study out a problem and to be able to convey the thought clearly and forcibly to the public is quite another thing Whether I can state my views on this subject in a manner that will convince others I know not I only hope that the reader will give credit to my ideas rather than my expression I claim that the earth is not only hollow but that all or nearly all Of the explorers have spent much Of their time past the turning point and have had a look into the interior Of the earth When Lieutenant Greely was beholding the mock sun at 120 deg L he was looking into our sister world and when Nansen saw the square sun lined with horizontal bars he was gazing on what may be the future home of his daughter then but two years Old About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works [The Phantom of the Poles](#) William Reed, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1906 edition Excerpt CHAPTER XII WHY IT IS WARMER NEAR THE POLES One of the principal proofs that the earth is hollow is that it is warmer near the poles If this be so to what are we to attribute the heat Nothing however has been found to produce heat near the poles to make it warmer If it can be shown by quoting those who made the farthest advance toward the supposed poles that it is warmer that vegetation shows more life that game is more plentiful than farther south then we have a reasonable right to claim that the heat comes from the interior of the earth as that seems to be the only place from which it could come In presenting the reports of those best able to judge very little comment will be made as the reader should form his own opinions In Captain Hall's Last Trip page 166 is read We find this a much warmer country than we expected From Cape Alexander the mountains on either side of the Kennedy Channel and Robeson's Strait we found entirely bare of snow and ice with the exception of a glacier that we saw covering about latitude 80 deg 30 min east side the strait and extending east northeast direction as far as can be seen from the mountains by Polaris Bay We have found that the country abounds with life and seals game geese ducks musk cattle rabbits wolves foxes bears partridges lemmings etc Our sealers have shot two seals

in the open water while at this encampment Our long Arctic night commenced October 13th having seen only the upper limb of the sun above the glacier at meridian October 12th Nansen draws special attention to the warmth for he says Fancy only 12 deg 2i 4 deg Fahr of frost in the middle of December We might almost imagine ourselves at home forget that we were in a land of

*The Phantom of the Poles. [With Illustrations.].* William REED (Geographical Writer.),1906 [The Phantom of the Poles, Pp. 1-282](#) William Reed,2017-09-16 Trieste Publishing has a massive catalogue of classic book titles Our aim is to provide readers with the highest quality reproductions of fiction and non fiction literature that has stood the test of time The many thousands of books in our collection have been sourced from libraries and private collections around the world The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original Our readers see the books the same way that their first readers did decades or a hundred or more years ago Books from that period are often spoiled by imperfections that did not exist in the original Imperfections could be in the form of blurred text photographs or missing pages It is highly unlikely that this would occur with one of our books Our extensive quality control ensures that the readers of Trieste Publishing s books will be delighted with their purchase Our staff has thoroughly reviewed every page of all the books in the collection repairing or if necessary rejecting titles that are not of the highest quality This process ensures that the reader of one of Trieste Publishing s titles receives a volume that faithfully reproduces the original and to the maximum degree possible gives them the experience of owning the original work We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality but also providing value to every one of our readers Generally Trieste books are purchased singly on demand however they may also be purchased in bulk Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates

**Browning's Industrial Magazine** ,1906 [The Signal Engineer](#) ,1921 *Travel* ,1906 *Arktos* Joscelyn Godwin,1996 *Arktos* is the first book ever written on the archetype of the Poles celestial and terrestrial North and South It is a hair raising voyage through cosmology occultism and conspiracy theory leads to startling revelations about the secrets of the Poles The author investigates legends of a Golden Age which some claim ended in a prehistoric catastrophe a shift in the earth s axis This is examined in the light of the latest geological theories as are predictions of a coming pole shift The perennial fascination of these ideas is shown to be part of a polar tradition of hidden wisdom There are many recorded tales of an ancient race said to have lived in the Arctic regions which later spread through the Northern Hemisphere This supposedly Aryan Race entered the pantheon of Nazi Germany with dreadful consequences The author examines the origins of modern neo Nazi ideology its polar inspiration and its links with other arcana including the survival of Hitler German bases in Antarctica UFOS the Hollow Earth and the hidden kingdoms of Agartha and Shambhala However *Arktos* differs from most writings on these subjects in its responsible and scholarly treatment and its extensive use of foreign language sources Provided by publisher [Unexplained Phenomena](#) John Michell,Bob Rickard,Robert J. M. Rickard,2000 *The Rough Guide to Unexplained Phenomena* is an

exploration of the zone that lies between the known and the unknown a shadowy territory that s home to lake monsters combusting people teleporting frogs and man eating trees Taking a Fortean path between dogmatic scientists and credulous believers the authors trace tales of wonder back to their sources drawing from a huge archive of observations opinions and discussions As the third millennium begins many things are not yet known or understood about our world as this Rough Guide shows there are still many riddles to solve and wonders to experience     *The Four-track News* ,1906     **Railway Signaling and Communications** ,1922     **The Flaming Sword** ,1906     *Industrial Magazine* ,1906     **Proceedings of the Session of the American Railroad Association** Association of American Railroads. Communications Section,American Railway Association. Telegraph and Telephone Section,1927 Includes a volume called Proceedings of the joint meeting of the members of the Committee of Direction chairmen of committees and subcommittees and consulting members of the Association of American Railroads Communications section held New York February 7 1946     *Railway Signal Engineer* ,1921     **Trade-Offs in Analog Circuit Design** Chris Toumazou,George S. Moschytz,Barrie Gilbert,2007-05-08 As the frequency of communication systems increases and the dimensions of transistors are reduced more and more stringent performance requirements are placed on analog circuits This is a trend that is bound to continue for the foreseeable future and while it does understanding performance trade offs will constitute a vital part of the analog design process It is the insight and intuition obtained from a fundamental understanding of performance conflicts and trade offs that ultimately provides the designer with the basic tools necessary for effective and creative analog design Trade offs in Analog Circuit Design which is devoted to the understanding of trade offs in analog design is quite unique in that it draws together fundamental material from and identifies interrelationships within a number of key analog circuits The book covers ten subject areas Design methodology Technology General Performance Filters Switched Circuits Oscillators Data Converters Transceivers Neural Processing and Analog CAD Within these subject areas it deals with a wide diversity of trade offs ranging from frequency dynamic range and power gain bandwidth speed dynamic range and phase noise to tradeoffs in design for manufacture and IC layout The book has by far transcended its original scope and has become both a designer s companion as well as a graduate textbook An important feature of this book is that it promotes an intuitive approach to understanding analog circuits by explaining fundamental relationships and in many cases providing practical illustrative examples to demonstrate the inherent basic interrelationships and trade offs Trade offs in Analog Circuit Design draws together 34 contributions from some of the world s most eminent analog circuits and systems designers to provide for the first time a comprehensive text devoted to a very important and timely approach to analog circuit design     *Proceedings of the Session of the American Railway Association, Telegraph and Telephone Section* American Railway Association. Telegraph and Telephone Section,1919     **Stories & Poems by a Guyanese Village Boy** Dr. Hanif Gulmahamad,2009-02-20 Book Description This book is a compilation of 27 short stories and 17 poems written by Dr Hanif Gulmahamad who was born in

1945 on Springlands Sugar Estate Corentyne Berbice in what was then the colonial territory of British Guiana The stories in this book are based on real incidences and events that took place in the 1950 s and early 1960 s while the author was a young lad residing at No 73 Village Corentyne Berbice Guyana The characters mentioned in the stories were real people though most of them are probably now deceased This book was written in 2008 and it is based on the author s best recollections of events which occurred over 45 years ago Due to the fact that four and a half decades elapsed between the actual occurrence of these events and the time they were written these stories may not be completely accurate It is not the intention of the author to portray anyone in these stories in a negative light Real names were mentioned in the stories in an attempt to be as pragmatic as possible Great consideration effort and time were expended in order to keep these stories as realistic and accurate as possible The 1950 s and 1960 s was an idyllic and carefree time for a young lad growing up in a far away village in British Guiana The country was still under colonial rule at that time and there were laws and rules and there was the rule of law It was a safe and secure place to grow up as a young boy Most people in the villages were poor but there were ample opportunities to hunt fish farm and eke out a living For a lad of my age at the time every day was an adventure All you had to do was walk across the road and enter the farmlands and an adventure began Life was simple and even though people worked hard for a living they were for the most part a happy lot Wealth and material possessions were not necessary ingredients for a happy and fulfilling life People accepted their lot in life and did not aspire to unachievable ideals and goals You made do with what you had and you were grateful for what little you had The stories in this book cover a wide variety of events and situations some of which are humorous Children in Guyana particularly those who live away from the cities will find these stories fascinating It is the author s hope that children in Guyana who can most relate to these stories are afforded an opportunity to read this book Back in the day when the author was a young boy in Guiana books were very scarce commodities and anything and everything in print were read with great relish Books told the author things and took him places he could only imagine at the time In those days there were only two radio stations in the entire country and there was no television Two movies theatres were located at Skeldon and the cost of one shilling to attend a movie there was often cost prohibitive to many people The events in these stories were set in a place and time that is now gone and most probably lost forever One of the major goals of the author was to record these stories for posterity The poems in this book cover diverse times topics and places The author currently lives in southern California and works in Los Angeles Some of these poems reflect great nostalgia and longing for a life place and time that is gone For example the poems I am not from here I still have my memories and it was supposed to be a temporary thing convey great yearning for what the author perceives as things that he has lost having left Guyana and migrated to the United States The contents of this book cast some light on the author s life story which is a remarkable one Born to functionally illiterate parents on a British sugar plantation in a faraway place in Guyana the author went on to obtain a PhD degree from the University of California Riverside He has written and published

over 60 technical and scientific papers including two chapters in books It is important
