[The SAGE Encyclopedia of Pharmacology and Society](#) Sarah E. Boslaugh, 2015-09-15 The SAGE Encyclopedia of Pharmacology and Society explores the social and policy sides of the pharmaceutical industry and its pervasive influence in society While many technical STM works explore the chemistry and biology of pharmacology and an equally large number of clinically oriented works focus on use of illegal drugs substance abuse and treatment there is virtually nothing on the immensely huge business Big Pharma of creating selling consuming and regulating legal drugs With this new Encyclopedia the topic of socioeconomic business and consumer and legal and ethical issues of the pharmaceutical industry in contemporary society around the world are addressed Key Features 800 signed articles authored by prominent scholars are arranged A to Z and published in a choice of electronic or print formats Although arranged A to Z a Reader's Guide in the front matter groups articles by thematic areas Front matter also includes a Chronology highlighting significant developments in this field All articles conclude with Further Readings and Cross References to related articles Back matter includes an annotated Resource Guide to further research a Glossary Appendices

e.g. statistics on the amount and types of drugs prescribed etc and a detailed Index The Index Reader's Guide and Cross References combine for search and browse capabilities in the electronic edition The SAGE Encyclopedia of Pharmacology and Society is an authoritative and rigorous source addressing the pharmacology industry and how it influences society making it a must have reference for all academic libraries as a source for both students and researchers to utilize *The Future of Health Economics* Olivier Ethgen, Ulf Staginnus, 2016-10-14 The pharmaceutical industry faces a well documented perfect storm on the one hand the patent cliff the lack of new blockbusters and on the other economic pressure on pricing from markets with growing expectations and shrinking budgets In the face of such pressure traditional health economics models no longer seem appropriate and yet what do we have to replace them The growing focus on value and cost effectiveness are evidence of new emerging thinking although even here with the shift from medicine as cure to medicine as palliative as a treatment for chronic illness and with the growing emphasis on preventative approaches the landscape is complex and challenging The Future of Health Economics offers a window into some of the most influential emerging issues in pharmacoeconomics issues such as risk sharing and alternative pricing models or the potential impact of radical new approaches such as personalized medicine as well as exploring the changing role of government and regulators Ulf Staginnus and Olivier Ethgen themselves two of the most well regarded practitioners in this field have brought together some leading edge thinkers from industry and academia around the world to provide the industry policy makers regulators health practitioners and academics with the raw material for their future scenarios **Spending Wisely** Alexander S. **Interpreting TRIPS** Hiroko Yamane, 2011-03-21 Protection of intellectual property rights IPRs has become a global issue The Trade Related Aspects of Intellectual Property TRIPS Agreement outlines the minimum standards for IPR protection for WTO members and offers a global regime for IPR protection However the benefits of TRIPS are more questionable in poorer countries where national infrastructure for research and development R D and social protection are inadequate whereas the cost of innovation is high Today after more than a decade of intense debate over global IPR protection the problems remain acute although there is also evidence of progress and cooperation This book examines various views of the role of IPRs as incentives for innovation against the backdrop of development and the transfer of technology between globalised knowledge based high technology economies The book retraces the origins content and interpretations of the TRIPS Agreement including its interpretations by WTO dispute settlement organs It also analyses sources of controversy over IPRs examining pharmaceutical industry strategies of emerging countries with different IPR

policies The continuing international debate over IPRs is examined in depth as are TRIPS rules and the controversy about implementing the flexibilities of the Agreement in the light of national policy objectives The author concludes that for governments in developing countries as well as for their business and scientific communities a great deal depends on domestic policy objectives and their implementation IPR protection should be supporting domestic policies for innovation and investment This in turn requires a re casting of the debate about TRIPS to place cooperation in global and efficient R D at the heart of concerns over IPR protection
