Health Care in Contexts of Risk, Uncertainty, and Hybridity Daniel Messelken, David Winkler, 2021-11-23 This book sheds light on various ethical challenges military and humanitarian health care personnel (HCP) face while working in adverse conditions. Contexts of armed conflict, hybrid wars, or other forms of violence short of war, as well as natural disasters, all have in common that ordinary circumstances can no longer be taken for granted. Hence, the provision of health care has to adapt, for example, to a different level of risk to scarce resources or uncommon approaches due to external incentives or requirements. This affects the practice of health care as well as its ethics. This book offers a panoramic overview on various challenges healthcare faces in extraordinary situations and provides new insights from practitioners as well as from academic scholars' perspectives.

Multimorbidity Management 1st Edition uses detailed Exemplar Case Studies and Practice case studies to teach you how to think like an expert geriatric clinician. Because most older adults have more than one condition when seeking care, both Exemplar and Practice Case Studies place a strong emphasis on multimorbidity management. The management of patients with a host of complex interacting conditions. To provide extensive practice in learning how to think like an expert, case studies reflect the reality that care does not necessarily begin or end in the primary care setting; cases move fluidly from primary care to acute care to inpatient rehabilitation to assisted living to long-term care. Building on foundational introductory chapters, cases also call on you to develop interprofessional collaboration skills and reflect the diversity of today's older adults in terms of age (young old to old old), gender, culture, ethnicity, sexuality, socioeconomic status, and more. As you work through both basic level and advanced Practice Case Studies, you can make extensive notes in the printed book and then go online to submit answers for grading and receive expert feedback for self-reflection.

NEW Introductory unit on the core principles of caring for older adults gives you a strong foundation in the principles of geriatric primary care and multimorbidity management.

NEW and UNIQUE Exceptionally detailed unfolding Exemplar Case Studies demonstrate how an expert advanced practitioner thinks clinically to provide care to older adults with multiple conditions.
