**A Concise Introduction To Tibetan Astrology**

**[Men-Tsee-Khang-ཏེན་མཆོག་]** ,2013-03-23 Preface It was certainly the combination of a gigantic landmass a small population and primarily the nomadic pastoral lifestyle which made the ancient Tibetan s special awareness of their environment From time immemorial our ancestors have closely observed the movements of the Sun Moon planets and constellations and have calculated time based on day month and seasons They forecasted the weather based on the nature of the wind clouds rainbows appearance of the flora behaviour of the fauna and being conscious of microscopic changes in other natural phenomena These fine observations of nature formed the rich foundation on which Tibetan Astrology was later built upon Founded on primeval wisdom by the second century B C this had developed into a systematic science known as one of the 12 Fields of Knowledge of B n Tradition alongside medicine and an array of divinatory practices Over the centuries this fertile base was greatly expanded by the arrival of Buddhist philosophy and Chinese astrology in the seventh century A D With the advent of Buddhism from India came access to the K lacakra Tantra a teaching explaining the formation of the universe and living beings first preached by the Shakyamuni Buddha in 881 B C By the 11th century A D this complex tantric yoga was fully practiced in Tibet and was soon incorporated by scholars into astrological texts The history of Tibetan Astrology is a complex multi faceted and culturally unique just like the long history of the Tibetan empire Through the decades of exile in India this tradition has been carefully taught conserved and practiced by Men Tsee Khang the Tibetan Medical and Astro Institute alongside its complementary and more widely known science Tibetan Medicine Tibetan Astronomy and Astrology A Brief Introduction first published in 1995 by this institute has reached its eighth edition With world interest in all facets of Tibet s religion history arts and culture spiraling it was decided that a more ambitious and comprehensive illustrated book should be produced outlining all fundamental aspects of Tibetan Astrology We were assigned this project in late 2009 and as our research began to bear fruit we decided to include in the book the fundamental understanding of the indigenous Ancient Tibetan Astrology and its interface with the importation of Nag rTsis Elemental Astrology from China and dKar rTsis the astrology of K lacakra and Arising Vowels from India This led to the two major indigenous astrology lineages the Tsurlug and the Phuglug the latter of which is practiced by Men Tsee Khang Having the origin and authenticity of this we proceeded by explaining for the beginners the role of astrology in relation with the nine other traditional fields of science grammar medicine logic arts and crafts Buddhist philosophy poetry synonyms metrical science and theatrical performance Tibetan Astrology is an important feature of the Science of Healing and inseparable from the practice of Tibetan Medicine Since the objective of engaging in the study and practice of Tibetan Astrology is to ensure

good fortune and happiness to others and often to advise remedial measures and protections when obstacles are identified the final part of the text focuses on explaining the wide range of horoscopes and amulets which are routinely prepared by TMAI s Astrology Department The primary motivation of exiles gathered in Dharamshala has been the preservation of Tibet s religion and culture while we watch our beliefs practices and way of life being suppressed sinified and even erased under China s occupation of the Tibetan Plateau Tibetan Medicine and Astrology are key components in ensuring this cultural preservation With their roots stemming from the understanding and practice of Buddha Dharma and their ethical focus on the well being of all sentient life these ancient sciences can be seen as a precious offering of wisdom and healing to today s uncertain world Tenzin Sherab Astrologer Tenzin Tsewang Jamling Astrologer Men Tsee Khang December 2011

**MUNDANE STELLAR ASTROLOGY: The ancient science of Hermes on the secret connections between the stars and their reflections on earthly beings and events** GIACOMO ALBANO,2021-08-25 The techniques of mundane astrology inherited from tradition are not the most suitable for explaining and predicting events as in reality they only capture the last links in the chain of celestial causes that underlie them In fact the primary causes of all events always and only reside in the Eighth Sphere that is in the sky of the constellations and fixed stars In this book the Stellar Astrology techniques are developed and applied to the real prediction of world events but also to natal charts Heaven and the stars that populate it are living beings The various parts of the starry sky constellations parts of constellations asterisms and single stars are not isolated but communicate with each other and therefore must be conceived as parts of a community similarly to the relations between men who live on this earth Indeed our communities and our earthly bonds are nothing but the reflection and manifestation of these celestial bonds And just as happens between men and between specific groups of men between some of these parts of the sky there are privileged relationships This book explains which are the astronomical and astrological factors that highlight these ties of kinship thus also indicating the existence of similar relations existing between the things of the world linked to those stars It is a real science based on rigorous criteria and in this book it is illustrated by providing the student with a general method that he can then apply to any person thing or event he intends to study in depth It will be seen how the identification of these stellar links is also essential for correctly interpreting a birth chart Only in this way astrology becomes what it should always be that is the sapiential matter par excellence as the only one capable of explaining and demonstrating the true nature and origin of earthly reality *The Magenta Gamma* Alfa Astartes,2002 The book captures a unique study of the Magenta Gamma as an art of the Far Eastern astrologers who invented the zodiac symbols and the related stars and constellations to understand and predict the human life cycles of the past and the future The book immerses us into the complexity of the zodiac table and the cluster of stars including the Magenta Gamma constellation and provides us with a map of symbols and signs to discover a universe in our place for a glance at our future It describes a variety of tools which we can use to decipher and interpret our fate and destiny Everything in nature has its own

place and every object has to travel through many stages before reaching its final destination which is determined by the combination of many astrological influences and events Human s fate and destiny are a result of the powerful influence of the zodiac signs under which a person is born and the journey of the dominant zodiac stars and constellations in his or her life cycles In the case of couples the zodiac of a partner gives influences to the other and vice versa Further the zodiac combination of the parents would have significant impacts on the children s generation as well as on the following grand children s generation although at a lesser degree The author offers enlightened explanations of historic events insightful answers to the questions of why things happen to some people and at a particular time and place as well as picturesque folk stories about the origin of the zodiac signs The study of the zodiac table is complex and the book guides us through the life forms representing the zodiac signs or members of the table the astrological rotations of the life cycles the conflict and interaction among the members the mechanisms that move or keep the stability of the table The reading of the zodiac table takes us to a different world where the entity of the universe is considered the completion of physical and meta physical dimensions In this world life is created in one of the five dimensions represented in nature These five dimensions are the Wood the Fire the Water the Metal and the Earth Each dimension represents a life form which is placed into six different types with different characteristics to determine the levels of influence For example the Wood life form is set in one of six different types the Fragile Wood the Solid Wood the Great Oak Wood the Willow Wood the Charcoal Wood and the Desert Wood Among the tools for the interpretation of the zodiac table are the observation of the stars the appraisal of natural events the determination of the energy circulation the evaluation of the land configuration the reading of the hands and cards and others In addition to the zodiac table reading the book also guides us through the intricacies of energy circulation from the cold stage of the Yin to the warm stage of the Yang It shows us how both type of energies are represented in the characteristics of the female and male behaviors The male actions are made on the logical and rational decisions Men evaluate their world through physical and measurable characteristics thus living and acting within the three dimensional world However the female actions are based more on emotions and feelings and their world evaluation is based on non physical and unquantifiable boundaries thus females live and act in a fourth dimensional world The book also provides with a detailed account of the stars and constellations that influence human lives the benefits or problems they convey i e happiness financial success changes of life their positions in the universal echelon to determine the level of influence the variety and significance of the pathways traveled by the dominant celestials There are 147 stars and constellations which greatly influence human lives and each one have their own c
