Wars expanded universe *Convergence To Cosmichobia: The Final Acceptance Of Life As A Cosmic Phenomenon* Nalin Chandra Wickramasinghe, Rudolph Schild, J H (Cass) Forrington, 2024-10-11 Forty years ago Fred Hoyle and Chandra Wickramasinghe challenged the long held belief that life originated spontaneously from a primordial soup on Earth a concept rooted in Aristotelian philosophy and dominant in Western science for over two millennia They proposed that life might have originated elsewhere in the universe and spread to Earth through a process called panspermia Hoyle and Wickramasinghe's research supported by advancements in space technology and astronomy argued that the origins of life required a cosmological scale beyond the solar system or galaxy Their work contributed to the emergence of astrobiology merging astronomy and biology and indicated a shift from Earth centered theories of life Their challenge parallels the Copernican revolution which displaced Earth from the center of the universe Similarly Hoyle and Wickramasinghe's ideas suggest a new paradigm shift in science moving towards a view of life as a cosmic phenomenon Recent discoveries particularly with the James Webb Space Telescope further support this shift indicating that a major transformation in our understanding of life's origins may be approaching Living with Monsters?
