Phenomenology And Analysis Ebays On Central European Philosophy:

Forthcoming Books Rose Arny,2003 *Foundational Reflections* H.A. Durfee,2012-12-06 The American University Publications In From its inception Philosophy has continued the direction stated in the sub title of the initial volume that of probing new directions in philosophy As the series has developed these probings of new directions have taken the two fold direction of exploring the relationships between the disparate traditions of twentieth century philosophy and with developing new insights into the foundations of some enduring philosophic problems This present volume continues both of these directions The interaction between twentieth century Anglo Saxon and Continental philosophy which was an implicit theme of our first and third volumes and the explicit subject of our second volume is here continued in a series of studies on major figures and topics in each tradition In the context of these interpretative studies Professor Durfee returns again and again to the question of the relationships between the will and the reason and explores the conflicting goals of creativity and objectivity in formulating a philosophic position In so doing he raises the issue as his title suggests of the foundations of philosophy itself He seriously challenges the belief common to both pheomenology and analytic philosophy that philosophizing can be a presuppositionless activity objectively persued independent of the personal and perhaps arbitrary commitments of the philosopher This issue critical as it is to all forms of philosophy is surely a worthy one for a series such as ours *The Risk of Freedom* Francesco Tava,2015-12-11 The Risk of Freedom presents an in depth analysis of the philosophy of Jan Patocka one of the most influential Central European thinkers of the twentieth century examining both the phenomenological and ethical political aspects of his work In particular Francesco Tava takes an original approach to the problem of freedom which represents a recurring theme in Patocka s work both in his early and later writings Freedom is conceived of as a difficult and dangerous experience In his deep analysis of this particular problem Tava identifies the authentic ethical content of Patocka s work and clarifies its connections with phenomenology history of philosophy politics and dissidence The Risk of Freedom retraces Patocka s philosophical journey and elucidates its more problematic and less evident traits such as his original ethical conception his political ideals and his direct commitment as a dissident

Thinking Adriaan Theodoor Peperzak,2006 Philosophers speak or rather they respond to various forms of speaking that are handed to them This book by one of our most distinguished philosophers focuses on the communicative aspect of philosophical thought Peperzak s central focus is addressing what distinguishes speaking or writing from rumination is their being directed by someone to someone To be involved in philosophy is to be part of a tradition through which thinkers propose their findings to others who respond by offering their own appropriations to their interlocutors After a critical sketch of the conception of modern philosophy Peperzak presents a succinct analysis of speaking insisting on the radical distinction between speaking about and speaking to He enlarges this analysis to history and tries to answer the question whether philosophy also implies a certain form of listening and responding to words of God Since philosophical speech about persons

can neither honor nor reveal their full truth speaking and thinking about God is even more problematic Meditation about the archaic Word cannot reach the Speaker unless it turns into prayer or as Descartes wrote into a contemplation that makes the thinker consider admire and adore the beauty of God s immense light as much as the eyesight of my blinded mind can tolerate Thinking is a work of genuine and original scholarship which responds to the tradition of philosophical thinking with a critique of its language style focus and scope Catriona Hanley Loyola College Maryland *Ricoeur and the Negation of Happiness* Alison Scott-Baumann,2013-10-24 Ric ur lectured and wrote for over twenty years on negation Do I understand something better if I know what it is not and what is not ness and never published his extensive writings on this subject Ric ur concluded that there are multiple forms of negation it can for example be the other person Plato the not knowable nature of our world Kant the included opposite Hegel apophatic spirituality Plotinus on not being able to know God and existential nothingness Sartre Ric ur working on Kant Hegel and Sartre decided that all these forms of negation are incompatible and also fatally flawed because they fail to resolve false binaries of negative positive Alison Scott Baumann demonstrates how Ric ur subsequently incorporated negation into his linguistic turn using dialectics metaphor narrative parable and translation in order to show how negation is in us not outside us language both creates and clarifies false binaries He bestows upon negation a strong and central role in the human condition and its inevitability is reflected in his writings if we look carefully Ric ur and the Negation of Happiness draws on Ric ur s published works previously unavailable archival material and many other sources Alison Scott Baumann argues that thinking positively is necessary but not sufficient for aspiring to happiness what is also required is affirmation of negative impulses we know we are split by contradictions and still try to overcome them She also demonstrates the urgency of analysing current socio cultural debates about wellbeing education and equality which rest insecurely upon our loose use of the negative as a category mistake
