Smith, Jadwiga S. Smith, Daniela Verducci, 2018-07-03 This volume presents discussions on a wide range of topics focused on eco phenomenology and the interdisciplinary investigation of contemporary environmental thought Starting out with a Tymieniecka Memorial chapter the book continues with papers on the foundations theories readings and philosophical sources of eco phenomenology In addition it examines issues of phenomenological anthropology ecological perspectives of the human relationship to nature and phenomenology of the living body and the virtual body Furthermore the volume engages in a dialogue with contemporary behavioral sciences on topics such as eco alienation sustainability and the human relationship to the earth in the context of the cosmos **Women Phenomenologists Past and Present** Jadwiga S. Smith, William S. Smith, Marie Antonios Sassine, 2025-07-24 This edited volume investigates a much needed exploration of women phenomenologists past and present in particular Hannah Arendt Hedwig Conrad Martius Edith Stein and Anna Teresa Tymieniecka The sections covered are devoted to the phenomenological exploration of autobiography subjectivism and posthumanism as dealing with modalities of the real and art poetry and music in particular This volume includes among others a study of the autobiography of Husserl a phenomenological analysis of an immigrant experience a poetic autobiography and a phenomenological recollection of emotions through artistic media Chapters also explore the notions of empathy certain aspects of mental illness and trauma and the experience of patients This book appeals to students and researchers working in applied phenomenology **The Cambridge History of Modern European Thought: Volume 2, The Twentieth Century** Peter E. Gordon, Warren Breckman, 2019-08-29 The Cambridge History of Modern European Thought is an authoritative and comprehensive exploration of the themes thinkers and movements that shaped our intellectual world in the late eighteenth and nineteenth century Representing both individual figures and the contexts within which they developed their ideas each essay is written in a clear accessible style by leading scholars in the field and offers both originality and interpretive insight This second volume surveys twentieth century

European intellectual history conceived as a crisis in modernity Comprised of twenty one chapters it focuses on figures such as Freud Heidegger Adorno and Arendt surveys major schools of thought including Phenomenology Existentialism and Conservatism and discusses critical movements such as Postcolonialism Structuralism and Post structuralism Renouncing a single master narrative of European thought across the period Peter E Gordon and Warren Breckman establish a formidable new multi faceted vision of European intellectual history for the global modern age The Dual Vision Robert Gorman,2013-10-08 This study originally published in 1977 focuses on a critical examination of the life work of Alfred Schutz the most important and influential father of several recent schools of empirical social research The author shows why Shutz and his followers fail in their attempts to humanize empirical social science The problems they encounter he argues are due to their attempt to achieve a methodological synthesis of self determining subjectivity and empirical criteria of validation based on Schutz s heuristic adoption of relevant ideas from Weber and Husserl This is in effect an artificial union of subjectivity and objectivity their dual vision that satisfies neither phenomenological nor naturalist perspectives Dr Gorman suggests that the radical implications of phenomenology must lead to a consistent socially conscious method of inquiry and in a final chapter he re defines the methodological implications of phenomenology with the aid of existential and Marxist categories

Modern Psychoanalysis Judd Marmor,2018-04-17 Modern Psychoanalysis is is a definitive exploration of the expanding horizons of this still controversial approach to and treatment of human behavior In the first paperback release of a work sponsored by the American Academy of Psychoanalysis thirty five authorities explore new approaches to psychoanalytic theory and therapy and examine the growing interaction between this field and the other social and behavioral sciences Modern Psychoanalysis demonstrates how some of the leading figures are bringing their discipline into the mainstream of biological and social through making use of systems theory information processing the constructs of adaptation and learning and other new tools and findings The book is unusually free of the jargon that has separated psychoanalysis in the past from the rest of behavioral and social science Some of the authors and their subjects are Roy Grinker Conceptual Progress in Analysis Jin gen Ruesch Psychoanalysis between Two Cultures Edward Tauber Dreaming and Modern Dream Theory Jules Masserman The Biodynamic Roots of Psychoanalysis Lewis H Wolberg Short term Psychotherapy Stuart M Finch and Albert Cain Psychoanalysis of Children Morris Parloff Analytic Group Psychotherapy Salvador Minuchin The Low Socioeconomic Population Leonard Duhl and Robert Leopold Psychoanalysis and Social Agencies Leo n Edel Psychoanalysis and the Creative Arts Arnold A Rogow Psychiatry History and Political Science and John R Seeley Psychiatry Revolution Reform and Reaction The volume is prepared with the rigor and comprehensiveness that should make the book a standard handbook for psychiatrists psychologists and behavioral scientists And it is written with a sense of curious readers who may simply be interested in the basic stances of this controversial field of theory and practice It has earned sufficient plaudits to be called a classic in the field Judd Manner s new introduction gives added weight to such claims *Themes in Geographic Thought*

(*Routledge Revivals*) Milton Harvey, Brian Holly, 2014-03-18 Themes in Geographic Thought first published in 1981 explores in breadth and depth the interrelationships among the history of Geography geographic thought and methodology specifically focusing on the interactions between geographical research and various contemporary philosophical schools positivism pragmatism functionalism phenomenology existentialism idealism realism and Marxism An attempt is made to synthesise Geography's historically rich tradition with the current diversity in approaches to the discipline based on the belief that geographic thought at any point in time is a manifestation of the mutual influence between the prevailing philosophical viewpoints and the major methodological approaches in vogue Each chapter presents an overview of the concrete ideas of a particular school of philosophy and stresses its relevance and impact on various aspects of Geography Roman Ingarden's Ontology and Aesthetics Jeff Mitscherling, Jeffrey Anthony Mitscherling, 1997 A leading Polish philosopher of the 20th century Roman Ingarden is principally renowned in Western culture for his work in aesthetics and the theory of literature Jeff Mitscherling demonstrates in this extensive work how Ingarden's thought constitutes a major contribution to the more fundamental fields of ontology and metaphysics Unparalleled in existing literature Mitscherling's comprehensive survey of Ingarden's philosophy will give the reader an informed introduction to this major work of phenomenological analysis

Dictionary Of Modern American Philosophers John R. Shook, 2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought *Ingardeniana II* Hans H. Rudnick, 2012-12-06 This Ingardenia volume is the second in the *Analecta Husserliana* series that is entirely devoted to the phenomenology of Roman Ingarden The first was volume IV 1976 Twenty years after Ingarden's death this volume demonstrates that the Polish phenomenologist's contribution to philosophy and literary scholarship has received world wide attention His ideas have proven especially fruitful for the definition of the structure of the literary work of art and the subsequent recognition of its characteristic features Of all the early phenomenologists who were students of Husserl it is Ingarden whose work has faithfully pursued the original tenet that language holds the essence of the life world in readiness *bereit halten* To investigate this premise with the rigor of a science as Husserl had envisioned for phenomenology was Ingarden's life work That Ingarden

did not quite reach his ambitious goal does not diminish his unquestionable achievement The understanding of the nature of the literary work of art has increased enormously because of his analyses and aesthetics The Polish phenomenologist investigated above all the work of art as a structure of necessary components which define and determine its nature That the artistic ingredient was shortchanged under those conditions should not be surprising particularly since Ingarden usually kept a purist's philosophical distance from the concrete detail of the material under consideration He was not concerned with individual works of art but with the principle that was shared by all of them as the defining feature of their being

Inventing Philosophy's Other Jonathan Strassfeld, 2024-05-31 The history of phenomenology and its absence in American philosophy Phenomenology and so called continental philosophy receive scant attention in most American philosophy departments despite their foundational influence on intellectual movements such as existentialism post structuralism and deconstruction In *Inventing Philosophy's Other* Jonathan Strassfeld explores this absence revealing how everyday institutional practices played a determinative role in the development of twentieth century academic discourse Conventional wisdom holds that phenomenology's absence from the philosophical mainstream in the United States reflects its obscurity or even irrelevance to America's philosophical traditions Strassfeld refutes this story as he traces phenomenology's reception in America delivering the first systematic historical study of the movement in the United States He examines the lives and works of Marjorie Grene Alfred Schütz Hubert Dreyfus and Iris Marion Young among others while also providing a fresh introduction to phenomenological philosophy

A Phenomenological Understanding of Certain Liturgical Texts Allan M. Savage, 2001 This book examines the philosophical premises underlying the language used in liturgical prayers Scholastic philosophy the dominant philosophical perspective in the West is no longer satisfactory for contemporary religious formulation Phenomenological philosophy appears to be replacing scholastic philosophy in forming and understanding personal and communal religious beliefs The Collects of the Anglican and Roman Catholic Eucharistic liturgies for Advent and Lent were examined re-written and field tested The focus group for field testing was composed of individuals who formally engage in research into spirituality and religious experiences *A Phenomenological Understanding of Certain Liturgical Texts* encourages further investigation into the growing use of phenomenology in liturgical understanding based on a discernible trend in this direction

The Cambridge History of Modern European Thought: Volume 2, The Twentieth Century Warren Breckman, Peter E. Gordon, 2019-08-29 An authoritative and comprehensive survey of the major themes thinkers and movements in modern European intellectual history

Does the World Exist? Anna-Teresa Tymieniecka, 2012-12-06 Does the World exist There would be no reason to resurrect this question of modernity from its historical oblivion were it not for the fact that recent evolution in science and technology impregnating culture makes us wonder about the nature of reality of the world we are living in and of our status as living beings within it Thus great metaphysical subjacent queries are forcefully revived calling for new investigations to proceed in the light of the innumerable

novel insights of science This collection presents a wealth of material toward an elaboration of a new metaphysical groundwork of the onto-poiesis phenomenology of life sought to effect such investigations The classic postulates of the metaphysics of reality those of necessity and certainty here find a new formulation Away from sclerotized ontological and cognitive assumptions and congenial with the views of contemporary science the understanding of reality of our world of life and of ourselves within it is to be sought in the existential onto-poietic ciphering of life Tymieniecka Synthesis and Backward Reference in Husserl's Logical Investigations J. Lampert, 2013-03-14 In the sixth Logical Investigation Husserl defines meaning objectivity and knowledge by appealing to syntheses of fulfilment each act of consciousness has a meaning intention whereby it anticipates a range of fulfilling intuitions whose ongoing synthesis would identify intended objects in the face of their changing appearances Synthesis is essential to phenomenological description But what does it mean to say that one experience is combined with others This monograph is a speculative exegetical Husserlian analysis of the ground the mechanisms and the results of synthesis Focusing on Husserl's Logical Investigations I argue that synthesizing consciousness must be a self-propelling self-explicating system of interpretative acts driven by ongoing forward and backward references grounding its structures as it proceeds and positing its origins as that which must have been given in advance To this end I develop a dialectical reading of Husserl's largely untreated category of referring backward zur ckweisen Treatments of Husserl's concept of synthesis have tended to focus on Husserl's later work on passive synthesis By drawing out the centrality of the concept of synthesis in the Logical Investigations I show how synthesis is at the foundation of intentionality as such and also indicate the continuity of descriptive categories that run through both the early and the late Husserl The Introduction to this study schematizes the modern history of the concept of synthesis and reviews the secondary literature on Husserl's concept of synthesis Phenomenological Perspectives P.J. Bossert, 2012-12-06 Professor H L Van Breda had hoped to write this preface but his recent unexpected and untimely death has left that task in my hands Although my remarks will not be as eloquent and insightful as his surely would have been some few words are clearly in order here for the phenomenological community has not only lost the leadership of Fr Van Breda these last years but also the scholarship and leadership of Aron Gurwitsch and Alden Fisher both contributors to this volume as well as that of Dorion Cairns and John Wild Our leaders are fewer now but Herbert Spiegelberg is still very obviously one of them This volume thus presents the work of some of the past and presently recognized leaders in phenomenology e.g. Gurwitsch Straus and Fisher but more important perhaps it also presents the work of some of those who are sure to be future leaders of our community of phenomenological philosophers if in fact they have not already achieved this status Most if not all of the contributors to this volume are in some way or another indebted to Herbert Spiegelberg and his work in phenomenology **New Age Thinking** Mel D. Faber, 1996 New Age thinking is sweeping vigorously through Western culture This highly original study is rooted in human developmental psychology as it emerges through the work of M Mahler D Stern and C Bollas It discloses the extent to

which New Agers rely on magical regressive beliefs and behaviours to escape the internal torment that comes with the individual separateness and the stern demands of reason **The Blackwell Dictionary of Modern Social Thought**
William Outhwaite, 2003-01-02 Modern social thought ranges widely from the social sciences to philosophy political theories and doctrines cultural ideas and movements and the influence of the natural sciences Provides an authoritative overview of the main themes of social thought Long essays and entries give full coverage to each topic Covers major currents of thought philosophical and cultural trends and the individual social sciences from anthropology to welfare economics New edition updates about 200 entries and includes new entries suggestions for further reading and a bibliography of all sources cited within the text *American Book Publishing Record Cumulative, 1950-1977* R.R. Bowker Company. Dept. of Bibliography, R.R. Bowker Company. Product Development and Marketing Dept, R.R. Bowker Company. Publications Systems Dept, 1978
