Phil Weyerhaeuser Lumberman:

Phil Weyerhaeuser Charles E. Twining, 2015-08-17 This is a rich and many faceted personal and business biography of the main figure in the third generation of Weyerhaeusers who led the Weyerhaeuser Timber Company through the difficult and decisive years from 1933 to 1956 Although Phil Weyerhaeuser preferred to pass over the importance of his role he was an industry leader and as such could not escape a large public duty The years in which he served from the 1920s in the Inland Empire and from 1933 to 1956 with the Weyerhaeuser Timber Company west of the Cascades were years of great demands and change Within his tenure the country experience the Great Depression and World War II the reluctant acceptance by business of New Deal and Fair Deal legislation and bureaucratic requirements and the adjustments occasioned by the managerial revolution In the case of the Timber Company the period witnessed its transition from what had been primarily a dealer in timberlands to an integrated manufacturer of forest products from a liquidator of forest resources to a managers of tree farms designed to be perpetual in their providence Phil oversaw his responsibilities to good purpose His quiet style is of interest and so too are the effects of just being a Weyerhaeuser The latter of course had much to do with his opportunities and also influenced the manner in which he conducted himself But it was not without its liabilities and the family relationships are an important element in the story The most significant feature however has to do with the study of a period and a place and an industry through the experiences of a very special organization and its leadership The study brings people and events into clearer focus and gives them added meaning This is of particular importance in an industry so given to stereotyping and disapprobation This well written account reveals in detail the operation of a huge family enterprise government industry relations at a key time in United States history labor relations and efforts to expand and continually revitalize a large company dependent on natural resources over a period of half a century Central to these efforts was Phil s conviction that the best way for a forest products company to operate was to own its own timberlands he saw such holdings as necessary if the company was to engage in sustained yield management This biography draws extensively on primary sources correspondence family records memoranda and numerous interviews It will be of interest to historians of the Pacific Northwest and the forest products industry students of business history and all readers interested in the development of a major American company

Legendary Locals of Lakewood Steve Dunkelberger, Walter Neary, 2014-04-21 Lakewood was a vibrant community long before it incorporated in 1996 though cityhood helped give the area one name and identity In the mid 19th century Lakewood was the site of British farms and the first US military base in Washington Territory Men who

became famous in the Civil War such as George Pickett served there Native American leader Leschi the victim of judicial lynching by civilians spent his last days there As Lakewood became a retreat for Puget Sounds rich and famous names such as Carman and Alexanderas famous in their day as the name Weyerhaeuser was and is settled here leaving behind reminders like Lakewold Gardens One of Lakewoods most famous residents was Ivan a captive gorilla who captured the hearts of animal lovers worldwide GEORGE S LONG (cl) , **International Bibliography of Business History** Francis Goodall,Terry Gourvish,Steven Tolliday,2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians **Clearcutting the Pacific Rain Forest** Richard A. Rajala,2011-11-01 This book integrates class environmental and political analysis to uncover the history of clearcutting in the Douglas fir forests of B C Washington and Oregon between 1880 and 1965 Part I focuses on the mode of production analyzing the technological and managerial structures of worker and resource exploitation from the perspective of current trends in labour process research Rajala argues that operators sought to neutralize the variable forest environment by emulating the factory model of work organization The introduction of steam powered overhead logging methods provided industry with a rudimentary factory regime by 1930 accompanied by productivity gains and diminished workplace autonomy for loggers After a Depression inspired turn to selective logging with caterpillar tractors timber capital continued its refinement of clearcutting technologies in the post war period achieving complete mechanization of yarding with the automatic grapple Driviiing this process of innovation was a concept of industrial efficiency that responded to changing environmental conditions product and labour markets but sought to advance operators class interests by routinizing production The managerial component of the factory regime took shape in accordance with the principles of the early 20th century scientific management movement Requiring expertise in the organization of an expanded technologically sophisticated exploitation process operators presided over the establishment of logging engineering programs in the region s universities Graduates introduced rational planning procedures to coastal logging contributing to a rate of deforestation that generated a corporate call for technical forestry expertise after 1930 Industrial foresters then emerged from the universities to provide firms with data needed for long range investment decisions in land acquisition and management Part II constitutes an environmental and political history of clearcutting This reconstructs the process of scientific research concenring the

factory regime's impact on the ecology of the Douglas fir forest assessing how knowledge was utilized in the regulation of cutting practices Analysis of business government relations in British Columbia Washington and Oregon suggests that the reliance of those client states on revenues generated by timber capital encouraged a pattern of regulation that served corporate rather than social and ecological ends

American Far West in the Twentieth Century Earl S. Pomeroy, 2008-10-21 In this richly insightful survey that represents the culmination of decades of research a leading western specialist argues that the unique history of the American West did not end in the year 1900 as is commonly assumed but was shaped as much if not more by events and innovations in the twentieth century Earl Pomeroy gathers copious information on economic political social intellectual and business issues thoughtfully evaluates it and draws a new and more nuanced portrait of the West than has ever been depicted before Pomeroy mines extensive published and unpublished sources to show how the post 1900 West charted a path that was influenced by but separate from the rest of the country and the world He deals not only with the West's transition from an agricultural to an urban region but also with the important contributions of minority racial and ethnic groups and women in that transformation Pomeroy describes a modern West increasingly urban transnational and multicultural that has overcome much of the isolation that challenged it at an earlier time His final book is nothing short of the definitive source on that West

The Pacific Northwest Carlos A. Schwantes, 1996-01-01 Carlos Arnaldo Schwantes has revised and expanded the entire work which is still the most comprehensive and balanced history of the

Community in Conflict Gary Kaunonen, Aaron Goings, 2013-07-01 A mirror of great changes that were occurring on the national labor rights scene the 1913-14 Michigan Copper Strike was a time of unprecedented social upheaval in Michigan's Upper Peninsula With organized labor taking an aggressive stance against the excesses of unfettered capitalism the stage was set for a major struggle between labor and management The Michigan Copper Strike received national attention and garnered the support of luminaries in organized labor like Mother Jones John Mitchell Clarence Darrow and Charles Moyer The hope of victory was overshadowed however by violent incidents like the shooting of striking workers and their family members and the bitterness of a community divided No other event came to symbolize or memorialize the strike more than the Italian Hall tragedy in which dozens of workers and working class children died In *Community in Conflict* the efforts of working people to gain a voice on the job and in their community through their unions and the efforts of employers to crush those unions take center stage Previously untapped historical sources such as labor spy reports union newspapers coded messages and artifacts shine new light on this epic and ultimately tragic period in American labor history

Gateways to Commerce William Patrick O'Brien, Mary Yeater Rathbun, Patrick O'Bannon, 1992

In the Path of Destruction Richard Waitt, 2020-10-14 A napping volcano blinked awake in March 1980 Two months later when that mountain roared Jim Scymanky was about twelve miles northwest logging a north slope above Hoffstadt Creek Rocks zinged through the woods bouncing off trees then the tops of trees snapped off Suddenly I could see nothing it got hot right away then scorching hot and impossible to breathe The air had no oxygen like being trapped underwater I was being cremated the pain unbearable Steve Malone at the University of Washington Seismology Laboratory was inconsolable We'd failed For two months we'd counted and located thousands of earthquakes looked for changes to anticipate an eruption Then it just happened It killed many people It killed David Johnston We could hardly work Author Richard Waitt was part of a U S Geological Survey team doing volcano research in the Cascades and was one of the first to arrive following the mountain's early rumblings His journey collecting eyewitness accounts began with a conversation in a bar the third week after Mount St Helens erupted The couple he met barely outraced a searing ash cloud and Waitt realized their experiences could inform geologic studies He eventually conducted hundreds of interviews sometimes two and three decades later often making multiple visits to gather additional details correct errors and resolve discrepancies A meticulous scientist with intimate knowledge of Mount St Helens Waitt delivers a detailed and accurate chronicle of events He tapped numerous primary sources interviews legal depositions personal diaries geologists field notes radio logs and police records Newspaper stories

and even sun shadows on photographs revealed additional intricacies In the Path of Destruction s eruption story unfolds through unforgettable riveting narratives the heart of a masterful chronology that also delivers engrossing science history and journalism **American Canopy** Eric Rutkow,2013-04-02 In the bestselling tradition of Michael Pollan s Second Nature this fascinating and unique historical work tells the remarkable story of the relationship between Americans and trees across the entire span of our nation s history **The Forested Land** Robert E. Thomas R. Cox,2010 With *The Lumberman s Frontier* Thomas Cox has reconstructed a groundbreaking history that stands apart from all previous studies of American forests Forests were ubiquitous in early America but it was only in selected areas that trees rather than farming attracted settlement These areas constitute the lumberman s frontier which appeared first in northern New England in the seventeenth century followed by upstate New York the Allegheny Plateau the upper Great Lakes states the Gulf South and the Far West The forest frontiers generated capital and building materials important in the nation s development but they also left a legacy of environmental problems class and urban rural divisions and economic frictions The 1930s marked the end of the lumberman s frontier but these consequences continue to shape attitudes and policies toward forests most notably the questions Whose forests are they and How and by whom should forests be used Drawing upon recent work in social and economic history as well as a wealth of historical data on forest industries and individuals *The Lumberman s Frontier* neither glorifies economic development nor falls into the maw of gloom and doom It puts individual actors at center stage allowing the points of view of the workers and lumbermen to emerge *The Lumberman s Frontier* will appeal to students and scholars of forestry public policy and environmental history as well as to general readers interested in the history and settlement of the United States **West Coast Lumberman** ,1929
