

Natural Resource Minister Rodolfo P. Del Rosario said yesterday that existing rattan regulations will be revised soon to afford greater access to the country's natural resources.

Del Rosario said that under the new Order 5, series of 1980, the grant of rattan-cutting permits will not be consistent with the policy to conserve natural resources.

Present regulations allow only duly organized cooperatives of rattan gatherers and persons who at the time of applications own and operate a duly licensed rattan manufacturing plant or who has been granted a license to set up a rattan manu-

facturing plant. Del Rosario said persons who are eligible for a permit to cut, gather and transport rattan will at least 18 years of age; (2) duly organized cooperative of rattan gatherers registered with the Bureau of cooperative development and who has a rattan supply agreement with the NDC-NACIDA raw materials corporation; (3) owners/operators of rattan processing plants who have a minimum paid-up capital of P250; (4) any association of rattan gatherers/users duly accredited by the KKK municipal/city provincial action

officer, an association of NACIDA registered rattan users or cooperatives; and (5) government instrumentalities.

He said rattan inventory requirement of two percent is insufficient, and insufficient to allow for a better basis in computing allowable cut to be granted.

The present annual allowable cut formula considers rotation period of 15 years and by probably increasing it to 20 years will result in a reduced

allow said. The rotation of rattan must be granted considering the permit to operate a corporation. One revision will terminate other similar applications.

Foreign Direct Investment in a Changing Global Political Economy Steve Chan, 2016-07-27 This book examines foreign direct investment in a changing world economy It offers case studies of this investment in different national and industrial contexts Firms and countries have encountered mixed results in using this investment to further their foreign leverage Conversely potential host countries have faced different opportunities and constraints in attracting or utilizing foreign capital for their development Although some countries have been relatively successful most do not appear to be well positioned to take advantage of the ongoing processes of globalization of national economies **The Political Economy of East Asia** Ming Wan, 2007-10-17 For students of international political economy it is hard to ignore the growth dynamism and global impact of East Asia Japan and China are two of the largest economies in the world in a region now accounting for almost 30 percent more trade than the United States Canada and Mexico combined What explains this increasing wealth and burgeoning power In his new text Ming Wan illustrates the diverse ways that the domestic politics and policies of countries within East Asia affect the region s production trade exchange rates and development and are in turn affected by global market forces and international institutions Unlike most other texts on East Asian political economy that are essentially comparisons of major individual countries Wan effectively integrates key thematic issues and country specific examples to present a comprehensive overview of East Asia s role in the world economy The text first takes a comparative look at the region s economic systems and institutions to explore their evolution a rich and complex story that looks beyond the response to Western pressures Later chapters are organized around close examination of production trade finance and monetary relations While featuring extended discussion of China Japan South Korea and Taiwan Wan is inclusive in his analysis with coverage including Myanmar Thailand Laos Vietnam Cambodia Malaysia Singapore Indonesia Brunei and the Philippines The text is richly illustrated with more than fifty tables figures and maps that present the latest economic and political data to help students better visualize trends and demographics Each chapter ends with extensive lists of suggested readings *The Rise of the Corporate Economy in Southeast Asia* Rajeswary Ampalavanar Brown, 2007-01-24 Backed by detailed empirical data Raj Brown gives a comprehensive analysis of the rise of the corporate economy in Southeast Asia focusing in particular

on corporate organization methods of finance business environment and corporate governance **A Century of Foreign Investment in the Third World** Michael Twomey, 2002-01-04 The late twentieth century has witnessed a dramatic upsurge in foreign direct investment in the Third World Based upon thorough statistical analysis the book presents exhaustive case studies of foreign investment policy in metropolitan countries and of the experiences of host countries throughout Africa Asia and Latin America With a wide geographical and historical focus it also makes an important contribution to current debates on dependency theory **Technological Innovation and Third World Multinationals** Paz Estrella Tolentino, 2003-09-02 This examines the relationship between technological growth and outward direct investment from firms in Asia and Latin America which has become increasingly significant as these countries develop Routledge Library Editions: Business and Economics in Asia Various, 2021-07-14 This set examines a vast range of topics covering all experiences of business and economics from across Asia Dealing with early banking systems in China the industrialisation of Korea and Taiwan the evolution of Japanese business practices economic development protectionist policies industrial investment trade tourism and a host of other topics the books collected here form a vital reference resource across a wide subject area *Asian Nationalism* Michael Leifer, 2002-05-03 This book features completely up to date analysis written by high profile contributors and is invaluable for upper level undergraduates and researchers in Asian Studies and Politics **The Economies of Africa and Asia in the Inter-war Depression (Routledge Revivals)** Ian Brown, 2014-11-13 The great inter war depression has long been seen as an unprecedented economic disaster for the peoples of the non European world This book with its detailed assessment of the impact of the depression on the economies of Africa and Asia challenges the orthodox view and is essential reading for those with a teaching or research interest in the modern economic history of those continents Established specialists in the modern economic history of parts of Africa or Asia put forward a number of revisionist arguments They show that some economies were left essentially unscathed by the depression and that for many export dependent peasant communities which did face a severe drop in cash income as world commodity prices collapsed from the late 1920s there was a range of important responses and reactions by which they could defend their economic welfare For many peasant communities the depression was not a disaster but an opportunity **State and Finance in the Philippines, 1898-1941** Yoshiko Nagano, 2015-04-20 During the First World War ill advised steps by colonial officials in the Philippines who were responsible for the colony's finances created a crisis which lasted from 1919 until 1922 The circumstances shook the foundations of the American colonial state and contributed to Manuel L Quezon's successful effort to replace Sergio Osme as leader of the politically dominant Nacionalista Party These events have generally been blamed on a corruption scandal at the Philippine National Bank which had been established in 1916 as a multi purpose semi governmental agency whose purpose was to provide loans for the agricultural export industry to do business as a commercial bank to issue bank notes and to serve as a depository for government funds Based on detailed archival research Yoshiko Nagano argues that the crisis

in fact resulted from mismanagement of currency reserves and irregularities in foreign exchange operations by American officials and that the notions of a corruption scandal arose from a colonial discourse that masked problems within the banking and currency systems and the U S colonial administration Her analysis of this episode provides a fresh perspective on the political economy of the Philippines under American rule and suggests a need for further scrutiny of historical accounts written on the basis of reports by colonial officials *State Structure, Policy Formation, and Economic*

Development in Southeast Asia Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don t What factors account for different economic performance among states that are vulnerable to external shocks crony capitalism and political instability This book argues that the answer lies in the structuring of state power specifically the way different sets of governing elites political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future **Driving a Bargain** Richard F. Doner, 2023-11-15
