**The Philosopher's Address** Jeff Mason, 1999-01-01 Jeffrey A Mason has written an informative accessible guide to today's most popular form of philosophical writing the journal length essay The Philosopher's Address does what no other book on the market has attempted it takes the reader behind the scenes of the writing process to expose the rhetorical underpinnings of philosophical texts Mason argues that readers need to understand why philosophical writing is constructed as it is and to be aware of the rhetorical devices by which authors seek to persuade them if they are to engage fully with these texts This book is intended for a broad audience of specialists and students alike Professional scholars will appreciate Mason's astute discussion of current trends within analytic philosophy while students will benefit greatly from his comprehensive understanding of the social context in which philosophical discourse is produced its various and competing schools of thought and the theoretical concepts that inform them **Literary Form, Philosophical Content** Jonathan Allen

*Ontology after Philosophical Psychology* Michela Bella, 2019-08-21 *Ontology after Philosophical Psychology* addresses the question of William James s continuity of consciousness with a view to its possible actualizations In particular Michela Bella critically delineates James s discourse In the wake of Darwin s theory of evolution at the end of the nineteenth century James s reflections emerged in the field of physiological psychology where he developed for the case for a renewed epistemology and a new metaphysical framework to help us understand the most interesting theories and scientific discoveries about the human mind Bella s analysis of the theme of continuity makes it possible to appreciate both historically and theoretically the importance of James s gradual transition from making observations of experimental psychology on the continuity of thought to developing an epistemological and ontological argument that continuity is a characteristic of experience and reality This analysis makes it possible both to clarify James s position in relation to his historical context and to highlight the most original results of his work

Philosophical Logic Robert L. Arrington, Peter M. Burkholder, Shannon Dubose, James W. Dye, James K. Feibleman, Bertrand P. Helm, Max Hocutt, Harold N. Lee, Donald H. Weiss, John C. Sallis, Louise N. Roberts, 1968-07-31 With this issue we initiate the policy of expanding the scope of Tulane Studies in Philosophy to include in addition to the work of members of the department contributions from philosophers who have earned advanced degrees from Tulane and who are now teaching in other colleges and universities

The Editor THE LOGIC OF OUR LANGUAGE ROBERT L ARRINGTON Wittgenstein wrote in the *Tractatus* that logic is not a body of doctrine but a mirror image of the world 1 In line with his suggestion that a proposition is a picture Wittgenstein argued that propositions show the logical structure of the real He was insistent however that the apparent logical form of a proposition need not be its real one 2 As a result of this we can misunderstand the structure of fact Philosophical problems arise just when the logic of our language is mis understood 3 It is common knowledge that much of this view of logic was rejected by Wittgenstein himself in the *Philosophical Investigations* There we are told that language has no ideal or sublime 4 logic which mirrors the structure of the extra linguistic world Consequently inferences from the structure of language to

the structure of that extra linguistic world are invalid Reality can be cut up in any of a number of ways by language Wittgenstein adopted a view of philosophy which would render that discipline a non explanatory non critical study of the multiple ways in which language can be used

**Making the Case** Heidi

Grasswick, Nancy Arden McHugh, 2021-04-01 Making the Case brings together established and emerging philosophers who use case studies to address a variety of contemporary social justice causes The contributors show both the depth and breadth of work in this area and highlight the distinctive approaches that feminist and critical race theorists in particular have pursued For these theorists the choice of the kinds of cases analyzed matters not only pushing philosophy as a field to foreground the challenges facing marginalized groups but also affecting the kind of philosophy that results This ensures that their theories do not reproduce the conceptual frameworks of dominant groups By using thickly described cases as opposed to the thinly described or hypothetical situations that have been the historic mainstay of philosophy the contributors strive to create philosophy that never strays too far from the complexities of people s lives on the ground The book provides philosophers with a host of methodologies theories and practical examples for use in social justice case work with topics ranging from census design and gender bias in science to incarceration and the spate of recent police killings of black men and women

**The Philosophical Rupture between Fichte and Schelling** J. G. Fichte, F. W. J. Schelling, 2012-03-23 The disputes of philosophers provide a place to view their positions and arguments in a tightly focused way and also in a manner that is infused with human temperaments and passions Fichte and Schelling had been perceived as partners in the cause of Criticism or transcendental idealism since 1794 but upon Fichte s departure from Jena in 1799 each began to perceive a drift in their fundamental interests and allegiances Schelling s philosophy of nature seemed to move him toward a realistic

philosophy while Fichte's interests in the origin of personal consciousness intersubjectivity and the ultimate determination of the agent's moral will moved him to explore what he called faith in one popular text or a theory of an intelligible world. This volume brings together the letters the two philosophers exchanged between 1800 and 1802 and the texts that each penned with the other in mind. *Meta-Philosophical Reflection on Feminist Philosophies of Science* Maria Cristina Amoretti, Nicola Vassallo, 2015-12-21 This volume offers a meta philosophical reflection on feminist philosophies of science. It emphasizes and discusses both the connections and differences between traditional philosophies of science and feminist philosophies of science. The collection systematically analyses feminist contributions to the various philosophies of specific sciences. Each chapter is devoted to a specific area of philosophy of science: general philosophy of science, philosophy of biology, philosophy of climate sciences, philosophy of cognitive sciences and neurosciences, philosophy of economics, philosophy of history and archaeology, philosophy of logic and mathematics, philosophy of medicine, philosophy of psychology, philosophy of physics and philosophy of social sciences. Since some of these areas have so far rarely been addressed by feminist philosophers, this new collection provides new angles and stimulates the debate on pivotal issues that are part and parcel of both traditional philosophies of science and feminist philosophies of science. Using a range of different methodologies and styles, the essays all show great clarity in both arguments and contents.
