This book is far and away the best international comparative study of leadership development for schools. There are countless books highlighting the importance of leadership but none have satisfactorily gone to the heart of the issue especially for developed and developing countries and Tony Bush has done it here. It is a sure guide to policymakers, practitioners and researchers who want to make a difference. Professor Brian J Caldwell, Managing Director of Educational Transformations and former Dean of Education at the University of Melbourne, Australia, states: Leadership is critical to educational development and specific preparation is vital if leaders are to maximise their effectiveness. In this major new text, Tony Bush draws on his extensive international experience and research to examine the case for leadership development and assess the different modes of preparation used in Europe including the U K, North America, Asia Pacific, Australia, New Zealand and Africa. He also examines research on how leadership impacts on school and student outcomes and considers future directions for leadership and management development in education. This text is essential reading for students of educational leadership and management as well as for policy makers, headteachers and principals.

Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U S and the world.
